KBDcraft

KBDcraft Adam 0110b Mechanical Keyboard Merging Kit

Product Information

- **Product Name:** Adam 0110b Merging Kit
- **Instruction Manual Version:** 1.0
- **Intro Project0110:** Adam0110a – The modularity of the first art

Features:

- Flexible mechanical attachment of multiple independent modules
- Deep integration of two modules
- Two layout options with left- or right-positioned Numpad
- Ability to transmit data and be powered by one cable
- Modular application ready

Product Usage Instructions

Assembly

1. For right-handed Numpad assembly, follow Step 4-6. For left-handed Numpad assembly, follow Step 4(L)-6(L).
2. Attach 4 base plates to Adam0110b.
3. Put the gaskets on. For left-handed Numpad, use the gasket position indicated for (L).
4. Put both Cores in.
5. Attach rubber feet and check the sit.

Firmware Installation The Numpad requires the correct firmware for different connections.

1. Download the firmware from: <https://kdbcrafft.store/pages/opensource>
2. Follow the steps below to install/change the firmware: Unplug the Numpad.
 1. Press and hold the first button (Numlock) in the upper left corner of the Numpad.*
 2. While still holding the button, plug in the cable.
 3. A disk drive called Addams0110 will appear on your system, then release the button.
 4. Drag the firmware (.uf2 file) into the storage disk.
 5. The PCB will install the firmware and restore the factory settings.

VIAL

To activate the key value of Layer(1), hold Fn or Numlock. You can change all the shortcut keys and light settings on VIAL. Visit <http://get.vial.today> for more information.
