**Kbinter KBT-MQFS USB Rechargeable Handheld Fan**

## INTRODUCTION

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan can be used for many things and is easy to take with you. This fan has a battery that can be charged and works perfectly with its USB power source, so it can be used both inside and outside. With 3 speed settings and a strong 7-blade design, the Kbinter KBT-MQFS is made to keep you cool whether you're moving, commuting, or just relaxing at home. The fan has an easy-to-use touch control system and an LED light built right in, so you can use it to cool down or light up your room. The small and light design makes it easy to use, and the standalone mounting type lets you put it on any surface and use it without using your hands. At **\$23.46**, this fan is a great deal for anyone who wants to feel better anywhere. It was made by Kbinter and blends style, functionality, and portability to provide the best cooling experience.

<b>Price</b>	\$23.46

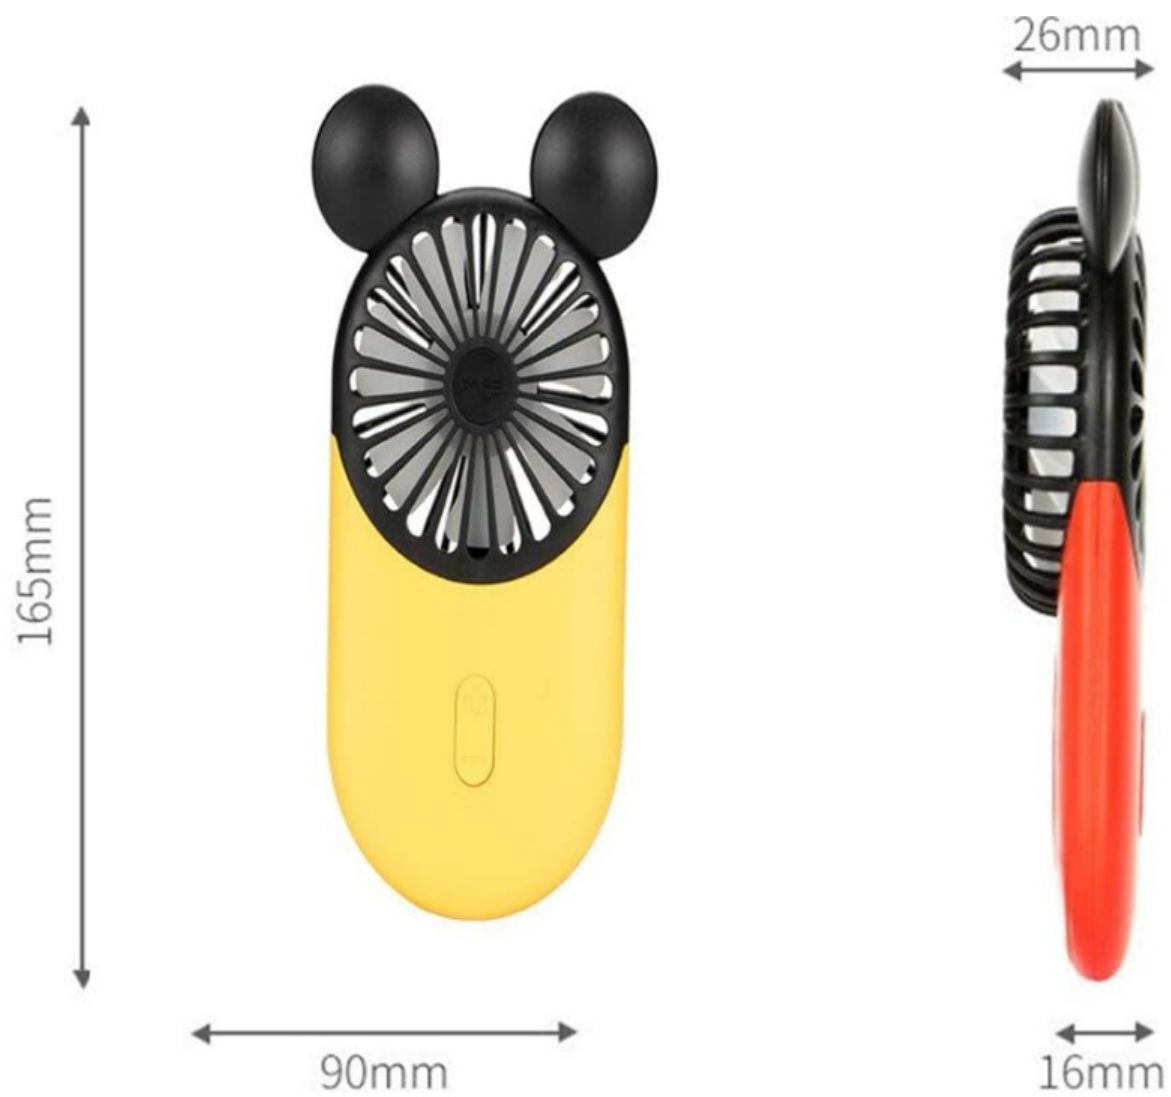

## WHAT'S IN THE BOX

- Handheld Fan
- Charging Cable
- User Manual

## FEATURES

- **Cute Mouse Design:** The fan is made like a cute mouse, which makes it a fun and cute accessory for kids and adults alike.
- **Portable Holder:** The fan comes with a built-in portable holder that lets it stand on a flat surface and be used without using your hands.
- **LED Light:** The fan has an LED light built in that adds a touch of mood lighting and is great for places with low light.

- **USB Rechargeable:** This fan has a rechargeable battery, so you don't have to use throwaway batteries. It can be charged easily via USB.
- **Three Adjustable Speeds:** It has three sets for wind speed, so you can choose the airflow that works best for you, from a light breeze to a strong gust.
- **Small and Easy to Carry:** The fan is very light (only 9.6 ounces), so it's simple to take it with you anywhere.
- **Freestanding Style:** The fan's freestanding style means it can stand alone, which makes it perfect for use on a desk or table.
- **Touch Control:** The fan is controlled by touch controls, which make changing settings a modern and easy process.
- **Low Noise:** Even though the fan moves a lot of air, it does so quietly, so it can be used in places like beds or offices where noise is not a problem.
- **Multi-Use:** It's great for home use, traveling, outdoor events, and travel, as well as indoor and outdoor activities.
- **Cordless Convenience:** Since the fan doesn't have a cord, you can use it anywhere without having to deal with wires.
- **Energy-efficient:** The fan only uses 2.5 watts of power, so it uses little electricity while still moving enough air.
- **USB Charging:** Any normal USB port can be used to charge the fan. This makes it easy to charge with a laptop, power bank, or car adapter.
- **7 Blades for Smooth Airflow:** The fan has 7 blades that work together to make sure that airflow is smooth and steady so that it cools effectively.
- **Compact Size:** This fan is only 4.2 x 6.2 x 2 inches, which makes it small and easy to carry and store when not in use.

## SETUP GUIDE

- Carefully take out the fan, the USB charging cable, and the user instructions from the box.

- **First Charge:** Connect the USB cord to a power source (laptop, power bank, or wall adapter) and fully charge the fan before using it for the first time.
- **To Turn On the Fan:** To turn on the fan, tap the marked area on the touch control panel.
- **Changing the Wind Speed:** To change the cooling to suit your needs, press the control button and hold it down to cycle between three wind speeds.
- **Using the LED Light:** Press the touch button to turn on the built-in LED light. Separate from the fan, the light can be turned on or off.
- **Freestanding Mode:** Put the fan on a flat surface and use the portable holder to keep it standing up so you can use it without using your hands.
- **Charging While Using:** If you're close to a power source, you can use the fan while it's charging, so it can keep running.
- **Bringing the Fan on Trips:** Since the fan doesn't have a cord, you can put it in your bag or purse and use it to cool off wherever you go.
- **Putting it on a Desk:** Place the fan on your desk and change the speed to enjoy a cool breeze while you work.
- **Use Outside:** The fan is great for doing things outside. It can be used while sitting at a picnic, the beach, or a sports game.
- **Indoor Use:** Put it on your bed, desk, or table at home to stay cool while you sleep or on hot days.
- **Clean the LED Light:** Use a soft cloth to gently wipe the area around the LED light to keep it clean and make sure it shines brightly.

- **Battery Monitoring:** Keep an eye on the battery life sign and charge the fan when the battery level drops to make sure it can be used all the time.
- **To turn off the fan:** Press and hold the touch button for a few seconds. This will save battery life when the fan is not being used.
- **Putting the Fan Away:** Keep the fan in a cool, dry place when not in use to keep it in good shape and avoid damage.

## CARE & MAINTENANCE

- **Regular Cleaning:** Use a soft, dry cloth to wipe down the fan's blades and body every so often to get rid of dust and dirt and keep the air flowing smoothly.
- **To clean the LED light:** Gently wipe the surface with a microfiber cloth so that dust doesn't build up.
- **Keep the Fan Dry:** Do not get the fan wet; water can damage the internal parts and make them work less well.
- **When charging:** Be careful not to leave the fan plugged in for too long after it's fully charged. This will protect the battery. After 3 to 4 hours of charge, disconnect.
- **Avoid Overheating:** To keep the battery and other parts inside the fan from getting damaged, don't put it in full sunlight or near heat sources.
- **Check the Blades:** Make sure to check the fan blades often for any buildup or dirt. To keep the wind going, clean them gently.
- **Keep in a Cool, Dry Place:** If you're not going to use the fan for a long time, keep it in a cool, dry place to keep the battery safe and stop rusting.
- **Maintenance for Batteries:** To make batteries last longer, don't let them die fully before charging them again. When the battery gets to about 20 to 30 percent, charge it.
- **Touch Control Care:** To make sure the touch control works right, keep the area around it clean and free of oils and dirt. Soft cloths are the best way to clean it.
- **Blades Care:** If the blades come loose or aren't lined up right, carefully tighten them or call customer service to find out how to fix them.
- **Periodic Charging:** Even if you don't use the fan for a while, charge the battery once a month to keep it in good shape.
- **Being Careful Not to Drop:** Be careful not to drop the fan, as it could damage or break inside.
- **Should You Replace a Damaged USB Cable:** If the USB charging cable is frayed or broken, you should replace it with a suitable USB cable to make sure it charges properly.
- **Maintaining an LED light:** If the light dims or doesn't work right, check the link and clean the area around the light. If it doesn't work, contact help.

## TROUBLESHOOTING

Issue	Possible Causes	Solutions
The fan not turning on	The battery is drained or not charged	Charge the fan fully before use
Weak airflow	Low fan speed or dirty blades	Clean the blades or adjust the speed to a high
Fan vibrating or making noise	Loose parts or debris inside the fan	Check for debris and ensure all parts are secure
LED light not working	LED light is not switched on or faulty	Ensure the LED light is activated or replace it
Overheating	Overuse or improper charging	Let the fan cool down before using it again
Charging issues	Faulty USB cable or charging port	Try using a different USB cable or charging port
Battery draining quickly	Battery not fully charged or worn out	Fully charge the fan or replace the battery
Fan speed control is not responsive	Faulty touch control or software malfunction	Reset the fan or clean the touch panel
The charging indicator not lighting up	The charging cable is not connected properly	Ensure the cable is connected securely
USB connector loose	Poor connection between USB and charging port	Check and adjust the USB connection
The fan's button control not working	Dirt or obstruction in the button area	Clean the button and ensure no obstruction
Uneven airflow	Blades misaligned	Gently adjust the blades back to their correct position
Battery overheating	Charging too long or overusing	Avoid overcharging and use in intervals
The fan becomes hot during use	Operating on high speed for too long	Turn the fan off periodically to cool down
Noisy operation	Dust or debris inside the fan	Clean the fan regularly to prevent noise

## PROS & CONS

### PROS:

- Rechargeable and energy-efficient, ideal for travel.
- 3 adjustable speeds for personalized comfort.
- USB-powered, easy to charge with various devices.
- Lightweight and portable for on-the-go use.
- Built-in LED light adds extra functionality.

### CONS:

- Limited to indoor use due to its design.

- Relatively small blade size for large spaces.
- No oscillation feature for wider air circulation.
- Might not provide strong airflow for extremely hot conditions.
- Can be a bit noisy at higher speeds.

## WARRANTY

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan comes with a **1-year manufacturer's warranty**. This warranty covers any manufacturing defects under normal use. If you experience issues with the fan within this period, the manufacturer will offer a repair or replacement depending on the circumstances.

## FREQUENTLY ASKED QUESTIONS

What is the brand of the KBT-MQFS USB Rechargeable Handheld Fan?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan is made by Kbinter, a brand known for its high-quality portable fans.

What is the price of the KBT-MQFS USB Rechargeable Handheld Fan?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan is priced at \$23.46, offering good value for its features.

What type of power does the KBT-MQFS USB Rechargeable Handheld Fan use?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan is powered by USB, making it easy to recharge.

How much does the KBT-MQFS USB Rechargeable Handheld Fan weigh?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan weighs 9.6 ounces, making it lightweight and portable.

What are the dimensions of the KBT-MQFS USB Rechargeable Handheld Fan?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan has dimensions of 4.2 inches in depth, 6.2

inches in width, and 2 inches in height.

What is the voltage of the KBT-MQFS USB Rechargeable Handheld Fan?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan operates at 5 Volts, providing efficient performance.

What type of switch does the KBT-MQFS USB Rechargeable Handheld Fan use?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan features touch control for convenient operation.

How many power levels does the KBT-MQFS USB Rechargeable Handheld Fan have?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan offers 3 power levels, allowing users to choose the desired airflow.

How many speeds does the KBT-MQFS USB Rechargeable Handheld Fan have?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan provides 3 speeds for adjustable airflow.

What is the wattage of the KBT-MQFS USB Rechargeable Handheld Fan?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan has a wattage of 2.5 watts, ensuring energy-efficient operation.

How many blades does the KBT-MQFS USB Rechargeable Handheld Fan have?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan is equipped with 7 blades, which help deliver powerful airflow.

What type of light does the KBT-MQFS USB Rechargeable Handheld Fan use?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan features LED light, providing visibility and a modern look.

What controller type does the KBT-MQFS USB Rechargeable Handheld Fan have?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan uses button control, allowing for easy operation and adjustment.

What is the reusability of the KBT-MQFS USB Rechargeable Handheld Fan?

The Kbinter KBT-MQFS USB Rechargeable Handheld Fan is rechargeable, meaning it can be used multiple times after charging, offering long-lasting performance.

Why won't my Kbinter KBT-MQFS USB Rechargeable Handheld Fan turn on?

Ensure that the fan is charged. If it's not turning on, plug it into a USB charger for a full charge and try again. If the fan still doesn't turn on, check for damage to the power button or charging port.
