Kestrel LiNK App

Specifications

- Product Name: Kestrel LiNK App
- Compatibility: iOS devices
- Functionality: Remote monitoring and data transmission

Set up the Kestrel LiNK App

- Download and install the app on your device.
- Ensure your device is charged and has an active internet connection (Wi-Fi may be preferred for downloading the app).

- Open the App Store .
- Search for 'Kestrel LiNK' and install the app listing with the blue & white icon.

- Ensure that your Kestrel is powered on and Bluetooth is active. Open the app and navigate to the Devices tab. Locate your new device in the list and tap "Connect."
- You may have to accept prompts to allow access to Bluetooth.
- If your device is not listed, refresh to find available Bluetooth pairing

devices.

NOTE: It might take a couple of attempts to successfully connect to your device.

Set up the Kestrel LiNK App (cont)

Once you connect your device, you might receive a prompt stating “Firmware update available.” Tap the “Settings” button on your device to check for new firmware. Tap “Check for Firmware Updates”. Tap “Update” if a new firmware update is available.

Enable continuous monitoring

*Tap on "Options"
in the LiNK app.*

Go to "App Preferences"

*Device power saving
should be "Off" and
Continuous Monitor should
be "On" as shown below.*

Configure your dashboard display

Send data to AmbientWeather.net for remote monitoring.

Tap on the "Devices" icon at the bottom left of your screen to return to your Kestrel synced devices.

Then tap on "Dashboard".

Use the "edit" button to select what measurements you want added and removed from the live dashboard.

Press the "Full Screen" icon to display live measurements in full screen mode.

If connecting more than one Kestrel device, switch to the "Multi-device" dashboard.

Full Screen example. Full Screen can show up to six screens at one time. To exit full screen mode, press "Close" at the top of the screen.

Connect to Awn

In Kestrel LiNK, go to your "Devices" and tap on "Settings"

Select "Manage Device Data"

Slide toggle on to send data to AmbientWeather.net. This will also show your MAC Address.

NOTE: For continuous data transmission to Ambient Weather Network, make sure the Kestrel LiNK App is open, not minimized, and showing the dashboard screen on the remote device.

- Using another internet-connected device such as a laptop or mobile phone, go to AmbientWeather.net.
- Tap the “Login” button.
- Log in to an existing account or create a new account.

Connect to AWN (cont)

- Once you create or log in to your AWN account, select “Devices”
- On the top left and tap the + icon to add a new device.

Enter the MAC Address displayed on the Kestrel LiNK app for the device you would like to use for remote viewing and tap “Next”.

Connect to AWN (cont)

Enter a name for your Kestrel device.

» Enter the MAC Address displayed on the Kestrel LiNK app for the device you would like to use for remote viewing and tap “Next”.

- Enter your device location.
- The location will be displayed on the AWN map.
- Select your time zone.
- Check if you would like to make your device data viewable on the public map.
- Select ‘Create’ to finish setting up.

Connect to AWN (cont)

Now let's get some details:

Give your device a name

Ex: My Weather Station

Where is your device located?

Street Address or Region

[Select location from map view](#)

Timezone

America/New_York

Community

☒ Allow others to view my weather station data. Add a location to your device above so others can find it on the map.

Create

- Go to your dashboard to select which Kestrel device
- You would like to view from the dropdown.
- Set up complete!

NOTE: It may take up to five minutes for data to start reporting.

Set up the Kestrel LiNK App

Awn Dashboard View

Ensure a stable connection (Wi-Fi recommended) and follow on-screen instructions for installation.
