## Keychron B1 Handheld Wireless Intelligent Keyboard

## New Operating Methods for Computers and Mobile Phones

Do you recognize this small keyboard? What does it do

### It can:

- Control computers, control mobile phones, control devices with USB drivers and Bluetooth.
- As an input tool for these devices.

### Which devices are applicable

The first step to getting it is to know which devices it can connect to?

### Can connect:

Android phones/tablets (Huawei, Honor, Oppo, Vivo, Xiaomi, Samsung, etc.) Apple products (MacBook series, iPhone series, iPad series, etc.) Liunx system (with Bluetooth), Windows handheld (SteamDeck, GPD, ROG, etc.)

### Can two devices be connected simultaneously?

Yes, this product is a dual-mode product that has the ability to connect both 2.4G wireless communication devices and Bluetooth wireless devices. For example, when a USB receiver is plugged into a Windows based computer and Bluetooth is connected to a phone/tablet, this product can be switched to any device at any time. The switching method is to short press the combination key FN+2.4G (switch to computer), short press the combination key FN+BT (switch to phone/tablet Bluetooth)

### How to connect devices

For Windows and other computers, simply plug in the USB receiver and use the keyboard in 2.4G mode It can be directly connected. If the user is not sure what mode the keyboard is currently in, they can press FN+2.4G briefly Use combination keys to adjust to 2.4G mode.

For devices with Bluetooth such as smartphones and tablets, the connection and switching methods are the same. The first connection requires long pressing the FN+BT combination key for 2 seconds.

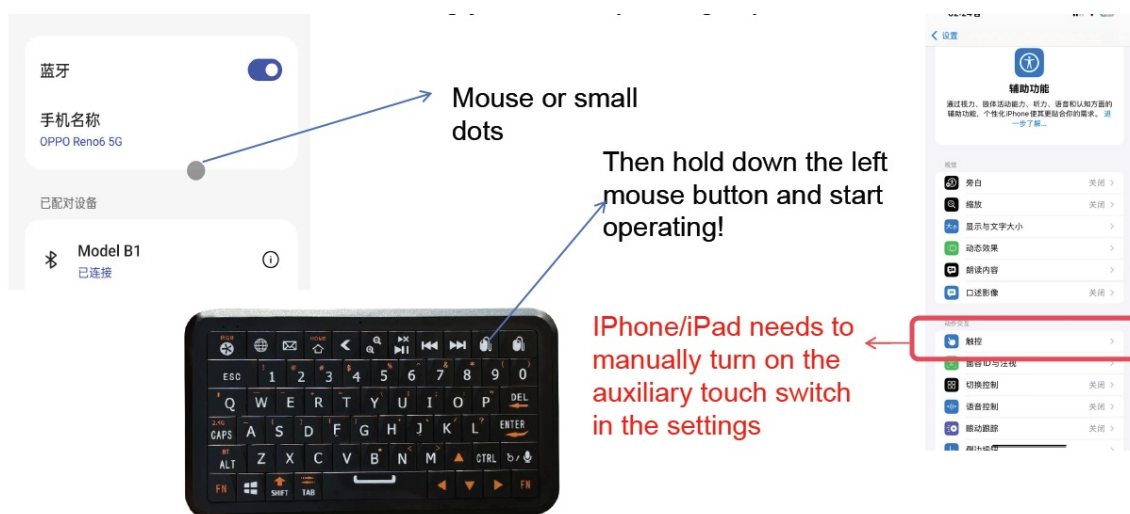

After the blue light flashes and shrinks, the keyboard enters the searched state. At this point, find model b1 in the Bluetooth of your phone and connect it. Short press the FN+BT combination key to switch back to Bluetooth mode from 2.4G mode.

### How to operate after successful connection

After successful connection, the screen will display a mouse cursor or small dots, which will move with the keyboard. This is the built-in motion sensing mouse of this product, which will bring you a new operating experience!

### Key Position Description Diagram

### Additional explanation for combination keys:

- CTRL+1=F1 in WIN system
- CTRL+2=F2, and so on
- CTRL+0=F10 The commonly used CTRL+5=F5 (refresh)
- FN+X=Full screen screenshot
- Background light on/off=FN+RGB
- Switching between Chinese and English input methods: shift
- Character switching: Hold down
- FN+character (release to restore current input method)

### Keyboard input experience and skills

The input of the keyboard is a complete call to the input method of the connected device, so the input experience is similar to typing on a virtual keyboard on a mobile phone,

Intelligent error correction: Even if you type the wrong letter, you can rely on input methods to intelligently correct it back

## Control Area Button Description

Play/Pause/Mute button

Previous song (long press for 1 second=volume reduced by 1 grid)

Next song (long press for 1 second=volume increases by 1 grid)
