IN THE BOX

- Keychron K17 Pro Bluetooth Mechanical Keyboard x 1
- Type-C Cable x 1
- Manual x 1
- · Quick Start Guide x 1
- Extra Keycaps Set x 1

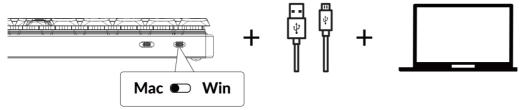

QUICK START GUIDE

If you are a Windows user, please find the appropriate keycaps in the box, then follow the instructions below to find and replace the following key caps.

Switch To The Right System

Please make sure the system toggle on the top left corner has been switched to the same system as your computer's operating system.

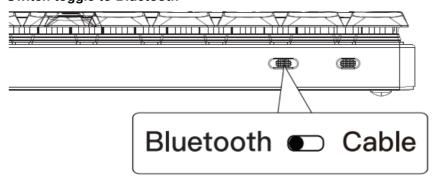

Connect Bluetooth

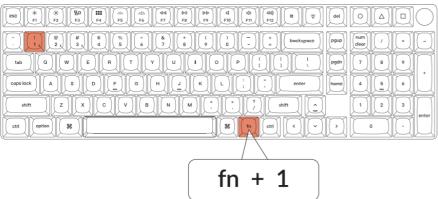

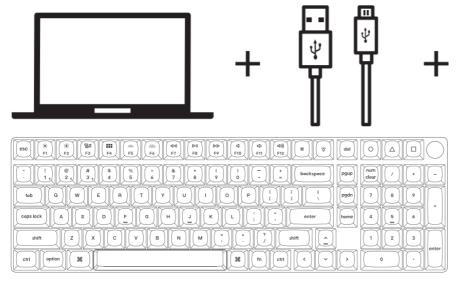

Switch toggle to Bluetooth

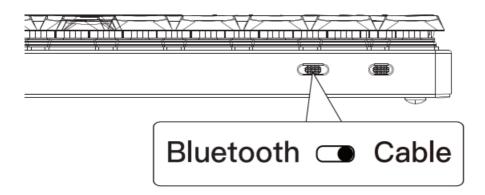

Press fn+1 (for 4 seconds) and pair with device named Keychron K17 Pro

Connect Cable

Switch toggle to Cable

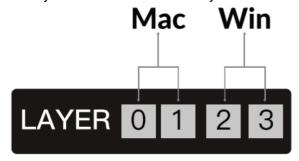

The VIA Key Remapping Software

Please visit usevia. app to use the online VIA software to remap the keys. If the VIA cannot recognize your keyboard. please reach our support to get the instruction.

- The online VIA software can only run on the latest version of Chrome, Edge, and Opera browsers yet.
- VIA only works when the keyboard is connected by wire to the computer.

The Layers

There are four layers of key settings on the keyboard. The layer 0 and layer 1 are for the Mac system. The layer 2 and layer 3 are for the Windows system.

If your system toggle is switched to Mac, then the layer O will be activated.

LAYER 0 1 2 3

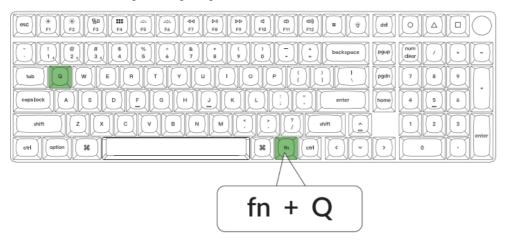

If your system toggle is switched to Windows, then the layer 2 will be activated. Remember that if you are using it in Windows mode, please make changes to the layer 2 instead of the top layer (the layer 0). This is a common mistake people are making.

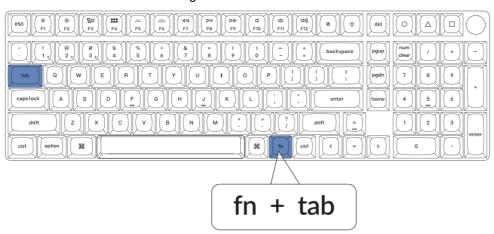

The Backight

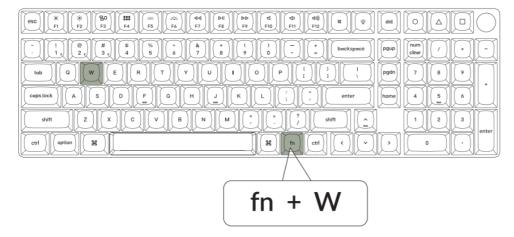

• Press fn + Q to change the lighting effect

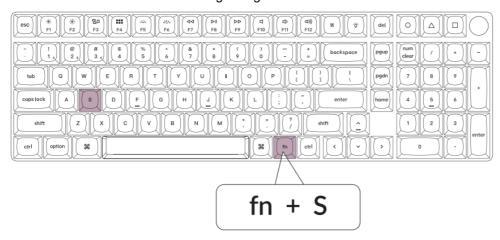

• Press fn + tab to tum the backlight on/off

• Press fn + W to increase the backlight brightness

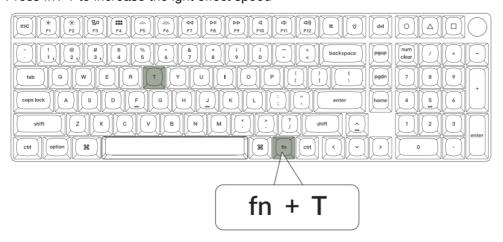

• Press fn + S to decrease the backlight brightness

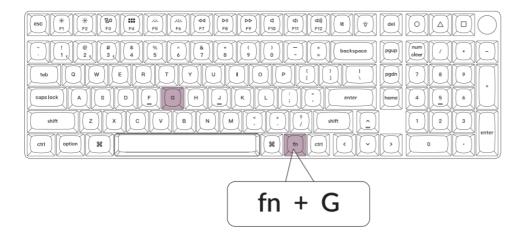

Adjust The Backlight Speed

• Press fn+ T to increase the lght effect speed

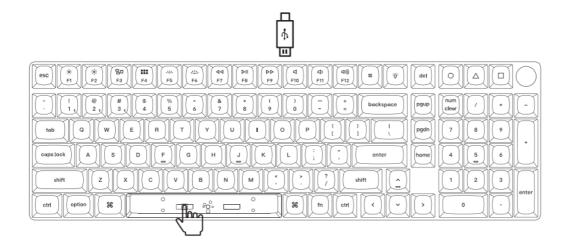

• Press fn + G to decrease the light effect speed

Watch The Bulding Tutorial On Our Website

If you are building the keyboard for the frst time, we highly recommend you watch the building tutorial video on our 'website first, then start building the keyboard yourself.

Factory Reset

Troubleshooting? Don't know what's going on with the keyboard?

- 1. Plug in the power cable and switch the keyboard to Cable mode. 2) Factory reset the keyboard by pressing fn+J+Z (for 4 seconds).
- 2. Download the right firmware and QMK Toolbox from our website.
- 3. Switch the keyboard to OFF mode and remove the space bar keycap to find the reset button on the PCB.
- 4. Hold the reset key first, then switch the keyboard to Cable mode.
- 5. Release the reset key, and the keyboard will now enter DFU mode.
- 6. Flash the firmware with the QMK Toolbox
- 7. Factory reset the keyboard again by pressing fn+J+Z (for 4 seconds).

Step by step guide can be found on our website.

INPUT METHOD SWITCH Forios: Input method switch: Ctrl + Space Caps Lock: Caps (Enable General>Keyboards>Hardware Keyboard>Caps Lock Language Switch) For Android: Input method switch: Shift + Space

NOTE: Functions of certain multimedia key may be disabled due to compatibility, versions, brands and drivers of Windows/Android OS. We also recommend not to switch OS frequently as it may impact keyboard operations.

TROUBLESHOOTING

If unable to pair keyboard to device, confirm that the device you're trying to pair with is Bluetooth-capable. If so, restart the device and try pairing it with the keyboard again.

Note: On a Windows computer, a new Bluetooth connection will sometimes require additional software updates—a process that may still be ongoing after a message appears indicating a successful completion. Wait at least 20 minutes after pairing to make sure all updates are completed before restarting the computer.

Confirm that the device is configured to accept Bluetooth connections (Windows) and supports an external keyboard (HID profile).

Go to Bluetooth Devices > Open Settings and select the following:

Allow Bluetooth devices to find this computer

Allow Bluetooth devices to connect to this computer Alert me when a Bluetooth device wants to connect

My keyboard isn't working. For the computer/smartphone: Go to your device Bluetooth settings>Select the keyboard and remove/delete/unpair it Then restart your device.

For the keyboard: Turn the keyboard off and back on. Then reconnect it to your device. Bluetooth connection is interrupted even within 10 meters.

Check if the keyboard is resting on a metal surface that can interfere with the Bluetooth signal.

Third-party input tools are not compatible with the keyboard.

Due to compatibility, versions, brands and drivers of Windows/Android OS, functions of third-party input tools may be affected while using the keyboard. Please make sure your operating system and drivers are up to date.

Certain multimedia keys or function keys do not work.

Functions of certain multimedia keys may be disabled due to compatibility, versions, brands, and drivers of devices.
