- 1x Hex Key

QUICK START GUIDE

If you are a Windows user, please find the appropriate keycaps in the box, then follow the instructions below to find and replace the following keycaps.

Mac / Windows

1. Switch To The Right System

Please make sure the system toggle on the top left corner has been switched to the same system as your computer's operating system.

2. The VIA Key Remapping Software

Please visit caniusevia.com to download the latest VIA software to remap the keys.

If the VIA software cannot recognize your keyboard, please reach out to our support to get the instruction.

3. The Layers

There are five layers of key settings on the keyboard.

The layer 0 is for the Mac system.

The layer 1 is for the Windows system.

The layer 2 is for the Mac Multimedia keys.

The layer 3 is for the Windows Multimedia keys.

The layer 4 is for the Function keys.

If your system toggle is switched to Mac, then the layer 0 will be activated.

If your system toggle is switched to Windows, then the layer 1 will be activated.

4. Multimedia Key and Function Key

Multimedia keys

Function keys

F1 / F2 / F3 / F4 / F5 / F6 / F7 / F8 / F9 / F10 / F11 / F12

In order to get Multimedia Key, you need to press fn1 and Key.

In order to get Function Key, you need to press fn2 and Key.

5. The Backlight

Press fn1 + Q to change the lighting effect

Press fn1 + tab to turn the backlight on/off.

6. Adjust The Backlight Brightness

fn1 + W to increase the backlight brightness

fn1 + S to decrease the backlight brightness

7. Adjust The Backlight Speed

Press fn1 + T to increase the light effect speed

Press fn1 + G to decrease the light effect speed

8. Warranty

The keyboard is highly customizable and easy to be rebuilt.

If anything goes wrong with any of the keyboard components of keyboard during the warranty period, we will only replace the defective parts of the keyboard, not the whole keyboard.

9. Watch The Building Tutorial On Our Website

If you are building the keyboard for the first time, we highly recommend you watch the building tutorial video on our website first, then start building the keyboard yourself.

10. Factory Reset

Troubleshooting? Don't know what's going on with the keyboard?

1. Try factory reset by pressing fn1 + J +Z (for 4 seconds)
2. Download the right firmware for your keyboard from our website.
Remove the power cable from the keyboard.
3. Remove the space bar keycap to find the reset button on the PCB.
4. Hold the reset key while plugging in the power cable and then release the reset key. The keyboard now will enter DFU mode.

5. Flash the firmware with the QMK Toolbox.
6. Factory reset the keyboard again by pressing fn1 + J + Z (for 4 seconds)

* Step by step guide can be found on our website

How to Factory Reset or Flash Firmware for Your Keychron Q2 keyboard?

Troubleshooting? Or don't know what's going on with the keyboard? You may try factory reset.

Note: If everything works fine with your keyboard. Please don't flash the firmware. There is a chance it can damage your keyboard.

1. Download the Q2 firmware (the file needs to be unzipped) and download the QMK Toolbox. (If the download link below does not work, use this link: https://github.com/qmk/qmk_toolbox/releases)

[Download Q2 Non-Knob ANSI Firmware](#)

[Download Q2 Non-Knob ISO Firmware](#)

[Download Q2 Knob Version ANSI Firmware](#)

[Download Q2 Knob Version ISO Firmware](#)

[Download QMK Toolbox for Mac](#)

[Download QMK Toolbox for Windows](#)

2. Unplug the power cable from the keyboard.

3. Open the QMK Toolbox.

4. Remove the space bar keycap to find the reset button on the left side of the space bar switch on the PCB.

5. Press down and hold the reset button.

6. Plug in the power cable. The keyboard will enter into DFU mode. Then, the QMK Toolbox will display in yellow words "****DFU device connected".

6. Click open and choose the Keychron Q2 firmware. Click the Flash button. It will start flashing. (Note: Do NOT unplug the power cable while it's flashing.)

7. Wait a few seconds and when you see the content below, it means the keyboard has flashed successfully factory reset.

If VIA can't pair with your Keychron Q2 after you tried flashing, you need to follow these steps:

1. Reconnect your keyboard power cable.
2. If VIA still doesn't pair together after you reconnect the power cable, download the Keychron Q2 keymap JSON file.

[Download Q2 Knob version ANSI /US keymap JSON for VIA](#)
[Download Q2 Non-Knob version ANSI /US keymap JSON for VIA](#)
[Download Q2 Knob version ISO keymap JSON file for VIA](#)
[Download Q2 Non-Knob version ISO keymap JSON for VIA](#)

3. Open VIA.

Step 1: Click the "DESIGN" section.

Step 2: Drag the JSON file to the tab and then click the "CONFIGURE" section to customize the keymap.

5. VIA should pair together with the Keychron Q2 now.

You may contact support@keychron.com if a defect covered by the warranty arises in your product within the warranty period. Keychron will honor the warranty of our Q and V series keyboard (e.g.: Q1, Q2, V1, V2, etc.) by one of the following methods at our discretion:

– Defects of Q and V series keyboards have been caused by manufacturing: We will only replace the defective parts of the keyboard, not the whole keyboard, as its highly customizable and easy to be rebuilt.

– Defects of Q and V series keyboards have been caused by disassembling our product, improper installation, non-factory repairs/modifications, improper adjustment of the product, or neglect, including but not limited to “burn-in”, and similar wrongful use: We will NOT offer free service. We only offer paid service to replace the defective parts at your own cost (including the cost of parts, shipping fee and tax if applicable).
