Quick Start Guide

1 Switch To The Right System

Please make sure the system toggle on the top left corner has been switched to the same system as your computer's operating system.

2 The VIA Key Remapping Software

Please visit caniusevia.com to download the latest VIA software to remap the keys. If the VIA software cannot recognize your keyboard, please reach out to our support to get the instruction.

Your keyboard's best friend

3 The Layers

There are five layers of key settings on the keyboard.

The layer 0 is for the Mac system.

The layer 1 is for the Windows system.

The layer 2 is for the Mac Multimedia keys.

The layer 3 is for the Windows Multimedia keys.

The layer 4 is for the Function keys.

1. Mac
2. Win
3. Windows Multimedia
4. Function
5. Mac Multimedia

If your system toggle is switched to Mac, then the layer 0 will be activated.

If your system toggle is switched to Windows, then the layer 1 will be activated.

Mac ☒ Win

WARRANTY

9 Watch The Building Tutorial On Our Website

If you are building the keyboard for the first time, we highly recommend you watch the building tutorial video on our website first, then start building the keyboard yourself.

TUTORIAL

10 Factory Reset

Troubleshooting? Don't know what's going on with the keyboard?

1. Plug in the power cable and factory reset the keyboard by pressing fnl + J + Z (for 4 seconds).
2. Download the right firmware and QM K Toolbox from our website.
3. Unplug the power cable and remove the space bar keycap to find the reset button on the PCB.
4. Hold the reset key first, then plug in the power cable. Release the reset key, and the keyboard will now enter DFU mode.
5. Flash the firmware with the QMK Toolbox.
6. Factory reset the keyboard again by pressing fnl + J + Z (for 4 seconds).

* Step by step guide can be found on our website.
