Keychron

Keychron V1 Wired Custom Mechanical Keyboard Barebone Knob

Specifications

- **Model:** XYZ-123
- **Color:** Black
- **Material:** Plastic
- **Dimensions:** 10 inches x 5 inches x 3 inches
- **Weight:** 1 pound

Quick Start Guide

- If you are a Windows user, please find the appropriate keycaps in the box, then follow the instructions below to find and replace the following keycaps.

1. Switch To The Right System

- Please make sure the system toggle on the top left corner has been switched to the same system as your computer operating system.

2. The VIA Key Remapping Software

- Please visit caniusevia.com to download the latest VIA software to remap the keys.
- If the VIA software cannot recognize your keyboard, please reach out to our support to get the instruction.

3. The Layers

- There are four layers of key settings on the keyboard. The layer 0 and layer 1 are for the Mac system. The layer 2 and layer 3 are for the Windows system.
- If your system toggle is switched to Mac, then the layer 0 will be activated.
- If your system toggle is switched to Windows, then the layer 2 will be activated. Remember that if you are using it in Windows mode, please make changes to the layer 2 instead of the top layer (the layer 0 This is a common mistake people are making.

4. The Backlight

Press fn + Q to change the lighting effect

Press fn + tab to turn the backlight on/off

5. Adjust The Backlight Brightness

Press fn + W to increase the backlight brightness

Press fn + S to decrease the backlight brightness

6. warranty

- The keyboard is highly customizable and easy to be rebuilt. If anything goes wrong with any of the keyboard components of keyboard during the warranty period, we will only replace the defective parts of the keyboard, not the whole keyboard.
