PAIRING BLUETOOTH

1. Toggle the switch to the Bluetooth side, then press Fn+Q/W/E to initiate the Bluetooth mode
2. Hold Fn+Q/W/E for 3-5 seconds till the indicator flashes fast, the keyboard is ready to pair.
3. Turn on your Bluetooth device and find “KIIBOOM64 5.0” or “KIIBOOM64 3.0”, then connect. When the keyboard is connected to the Bluetooth device, the first indicator stops flashing.
4. Press Fn+Q/W/E to toggle between the Bluetooth devices 1/2/3.

PAIRING WIRELESS 2.4GHz

1. Toggle the switch to the 2.4G side, then press Fn+R to initiate the 2.4G mode
2. Hold Fn+R for 3-5 seconds till the first indicator flashes fast, the keyboard is ready to pair.
3. Insert the 2.4G dongle to your device, the first indicator stops flashing green and the connection is done.

Note: The keyboard will enter sleep mode after 2 minutes of inactivity, the keyboard lights go off, and it can be reactivated by any keypress.

WIRED MODE

Toggle the switch to the wired mode, the keyboard enters to the wired mode successfully.

BATTERY CHECK

Hold Fn+Backspace, the keys from 1 to 0 lights up to show the battery percentage; for example, if the keys from 1 to 6 light up when holding Fn+ Backspace, it means that the battery life is currently 60%; if keys of 1-0light up, battery life is 100%.

1. Keycap Puller
2. Switch Puller
3. Switch Pins

REMOVE SWITCHES

1. Grab your Switch Removal Tool and align the gripping teeth vertically (on the Y-Axis) at the center of the switch, as shown in the example graphic above.
2. Grab the switch with the Switch Puller and apply pressure until the switch releases itself from the plate.
3. Using firm but gentle force pull the switch away from the keyboard using a vertical motion.

INSTALL SWITCHES

1. Check that all the switch metallic pins are perfectly straight and clean.
2. Align the switch vertically . The pins should align themselves to the keyboard PCB.
3. Press the switch down until you hear a click. This means your switch clips have attached themselves to the keyboard plate.
4. Inspect the switch to ensure it's properly attached to your keyboard, and test it.

Note: If the key doesn't work its possible you may have bent one of the switches while installing it. Pull the switch out and repeat the process.

Pins may be damaged beyond repair and need replacement if this process is not done correctly. Never apply excessive force when replacing keycaps or switches. If you cannot remove or install keycaps or switches please contact customer service as soon as possible to avoid damage to the keyboard due to operating errors.

WARRANTY

KiiBOOM's Warranty covers any factory defects that might affect the proper functionality of your purchase. It doesn't cover any damage that may occur from normal wear and tear. If your product is defective we will send you a replacement unit. Replacement units might require you to send the defective unit back to KiiBOOM.

We provide a 1 year warranty for our products when bought from our website (KiiBOOM.com). Your item will not be covered by your 1 year warranty if the inspection shows any sign of modification or changes unsupported by the original product, these include: Changing internal components, Assembling and reassembling the product, Replacing Batteries, etc.

We will ONLY cover the item if it is bought from our official stores. You do not have a warranty with us if you bought

the item from another reseller or likewise. Please contact the store that you bought your product from to resolve issues.
