Overview

Product Description

The KVM console integrates multiple port KVM switches in a 1U height console. It can control multiple computers with a set of device including monitor, keyboard and mouse, thus saves much cost and space to separately equip keyboard, mouse and monitor for every computer.

It is easy and fast to install the KVM console, you just need to connect corresponding cables to the right ports of KVM and its module without software configuration.

The KVM console can control up to 8 or 16 computers, supports multiple hardware platform and multiple operating system.
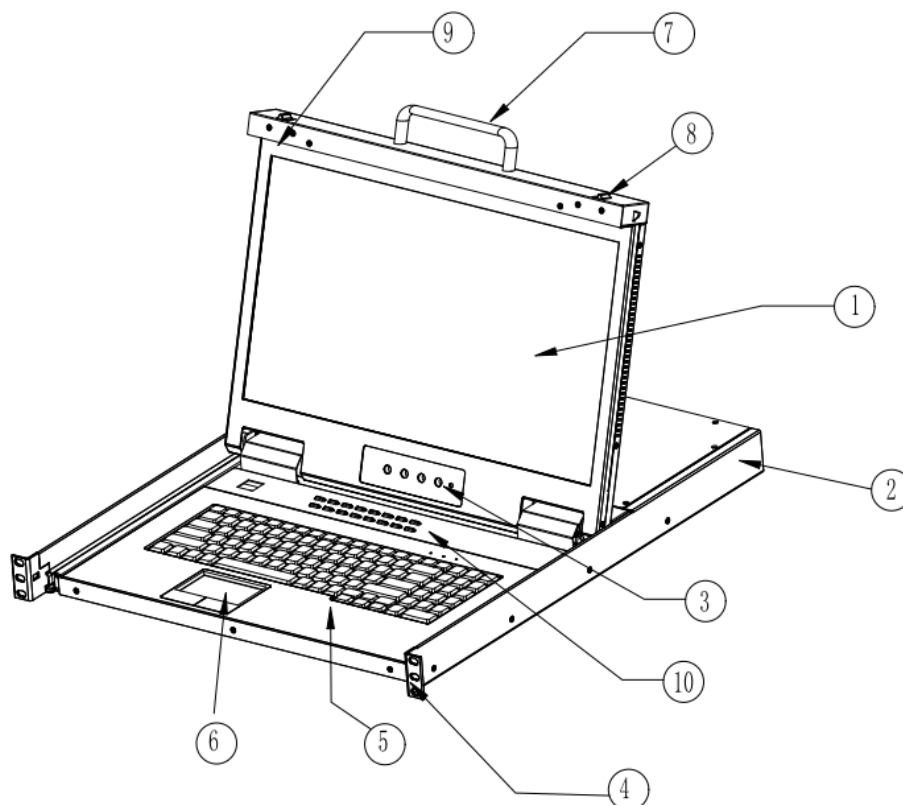

Product Features

- 18.5″FHD TFT monitor, high brightness, high resolution;

- 1U height, suitable height for standard 19" rack mount, metal structure;

- Ultra slim 99 keys keyboard with small numeric keyboard;

- High resolution and high flexibility with touchpad ; with two function buttons and scroll wheel.

Switch Functions

- A single USB console controls up to 8 or 16 computers

- By daisy chaining up to 31 additional Combo-KVM, as many as 512 computers can be controlled from the single KVM console which supports 8 or 16 ports KVM seamless mixed cascade connection

- Supports wireless keyboard and mouse from different suppliers

- Two level password security — only authorized users view and control computers up to four users and an administrator with a separate profile for each

- Users can set up different hot keys(Scroll Lock / Caps Lock / F12 / Ctrl ,auto scanning time, port display time, log out time, buzzer on/off and mouse on/off according to their different needs

- Broadcast mode-operations simultaneously performed on all selected computers

- Multiplatform support -Windows, Linux, Mac and Sun

- Supports multimedia USB keyboard(PC, Mac and Sun)

- USB keyboard emulation —computer boot even the console focus is else where

- Convenient computer switching via front panel push buttons, hotkeys, OSD menu

- Automatically shows the computer position on the front panel LED screen under daisy chaining connection without DIP set by hand

- Auto scan feature for monitoring user-selected computers

- Hot pluggable — add or remove computers without having to power down the switch

- Quickly select your computer by naming the server or inputting SN number of the server

Hardware Installation

Rack Mounting
A standard rack mounting kit is provided to mount the switch in a depth of 686-770mm n a standard 19"rack. For other mounting distance, the rear brackets need to be customized accordingly
With one person hold the switch in place and the other person slides the L bracket into the switch's side mounting brackets from the front to the back, then screws the brackets to the rack.(see below installation drawing)
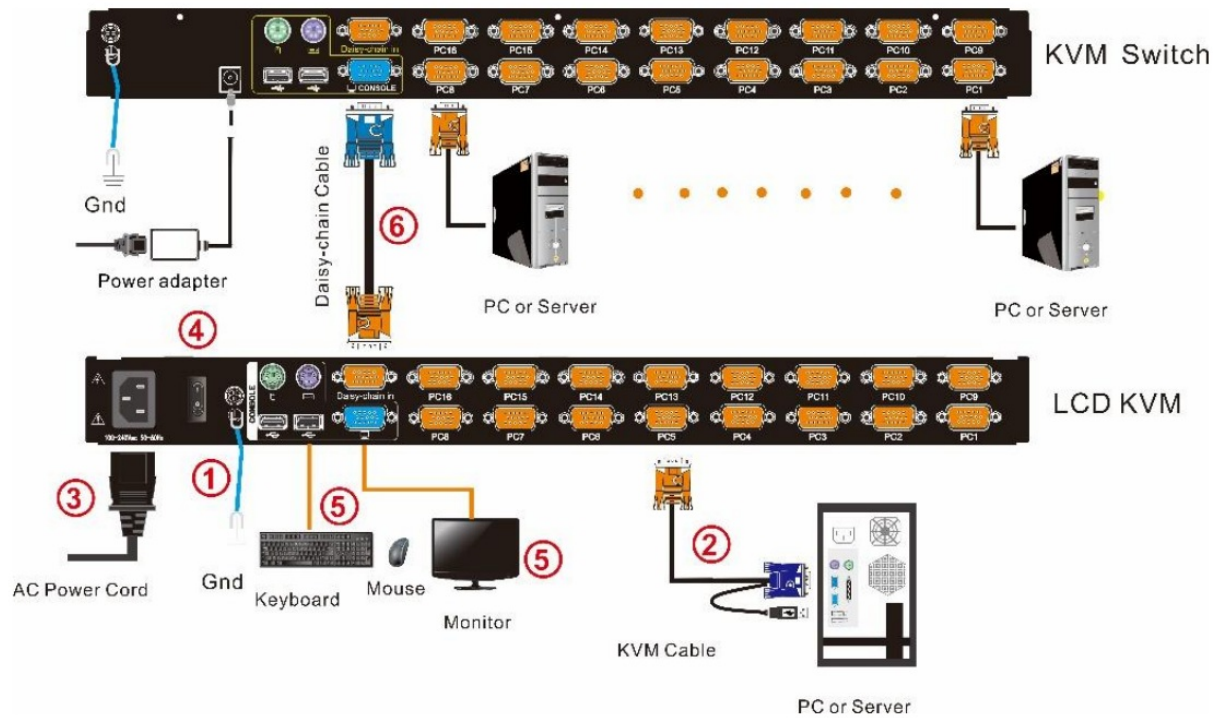

2-1.1 rack mounting (1)

2-1.2 rack mounting (2)

Installation instruction

1. Make sure the rack mounting KVM switch has been connected to the ground (1 in the diagram)
2. Connect KVM switch with the computer according to 2 in the diagram
3. Connect power cable to KVM port as shown in 3 in the diagram
4. Turn on the power, the KVM start to work after power supply(4 in the diagram)
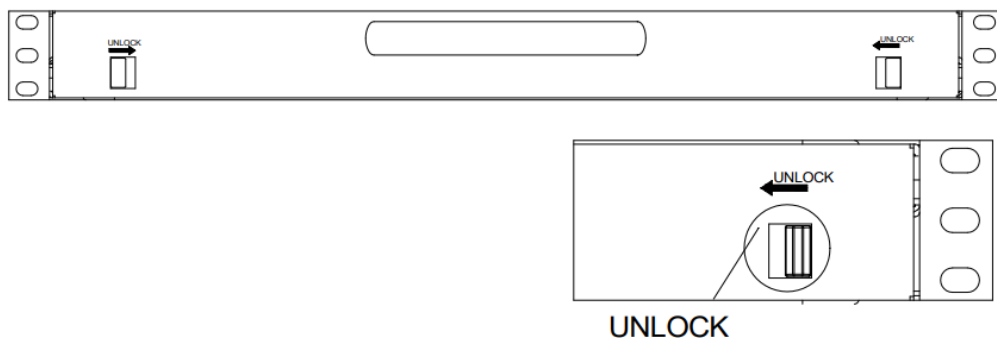

KVM Switch

LCD KVM

Note

1. Connect monitor, USB or PS/2 keyboard and mouse to Console port to connect another console. ⑤in the diagram

   *explain: Not supports OSD on external dispaly, to switch via hotkey Ctrl , see details on page 18 about OSD Hotkey function instructions

2. Daisy chaining multiple KVM switches according to⑥ in the diagram. Plug the yellow port of daisy chaining cable in the yellow "Daisy-Chain in" DB 15 port on KVM series console, then plug the other blue port in the blue "Console" DB 15

   port on KVM series switch, etc.

To ensure signal integrity and simplify cable layout, we strongly recommend you using high quality cables with different length as shown in above table.
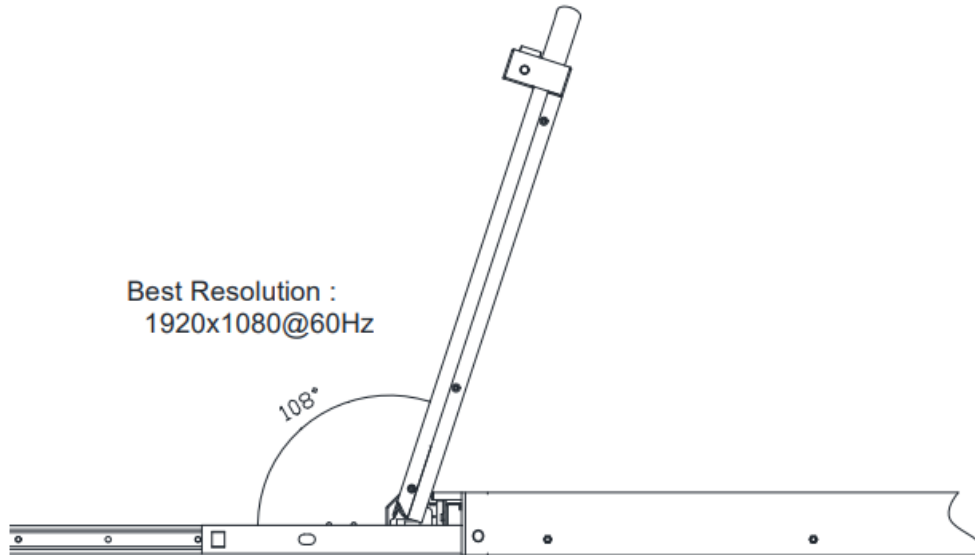

Opening the console

- Release the release **catch;**

UNLOCK

2-1.3 unlocking

*Note The release lock can only do horizontal locking, it can't bear any load.
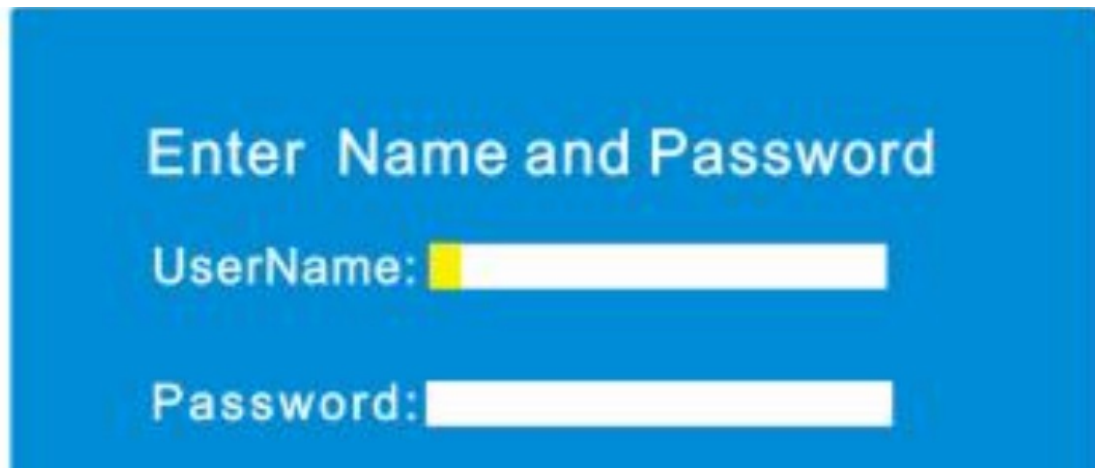

- Pull the LED panel all the way out until it clicks into place.

- Rotate the LED module all the way back to expose the LED screen, the LED module can be rotated up to108°.

Best Resolution :
1920x1080@60Hz

108°

2-1.4 rotate angle of the console

- Turn on power switch KVM will be issued two "beep" sound, The Port LEDs light flashes 4 times , the LED displays the prompted to enter the user's password.

Enter Name and Password

UserName:

Password:

2-1.5 password window

- LED panel is powered on when the power LED is green.
- Power on computer or server after power on KVM and you will see green light at each port.
- The factory default password is blank, it will be OK after double click "Enter".

Closing the console

- Close the LED display panel and the power automatically shut down.
- Push the KVM into the cabinet: When pushing forward, the rail will be unlocked automatically; push forward until the KVM is fully pushed into the cabinet, the KVMwill be automatically locked.

USB Keyboard Emulation

Mac keyboard
The PC compatible (101/104 keys) keyboard can emulate the functions of the Mac keyboard. The emulation mappings are listed in the below table:

PC keyboard	MAC keyboard
[Shift]	Shift
[Ctrl]	Ctrl
⊞	⌘
L_Win & "1"	🔇
L_Win & "2"	🔈
L_Win & "3"	🔊
L_Win & F12	🌙
[Alt]	Alt
[Print Screen]	F13
[Scroll Lock]	F14
🗒	=
[Enter]	Return
[Backspace]	Delete
[Insert]	Help

Sun keyboard

The PC compatible (101/104 keys) keyboard can emulate the functions of the Sun keyboard when the control key [L_Win] is used in conjunction with other keys.The corresponding functions are shown in the below table:

PC keyboard	Sun keyboard
L_Win&L_Alt	Stop
L_Win&F4	Again
L_Win&L_Ctrl	Props
L_Win&F5	Undo
L_Win&F1	Front
L_Win&F6	Copy
L_Win&F2	Open
L_Win&F7	Paste
L_Win&F3	Find
L_Win&F8	Cut
L_Win&"1"	V_DN
L_Win&"2"	Mute
L_Win&"3"	V_UP
L_Win&F12	Power
L_Win&F11	Help
L_Win&L_Shift	Compose

FAQ

1. The KVM console do not work when I connect and use the console for the first time.

   Solutions:

   Please re-connect the KVM console according to below steps:

   1. Disconnect all the signal and power cables connected to KVM.

   2. Then power on KVM and you hear the boot indicating sound from the beeper, a screen automatically pop up for you to enter the user name and password.

3. Type in the correct user name and password, the original password is clicking Enter twice, then the OSD main menu pop up on the screen.

4. Check the KVM console and make sure it can normally switch ports .

5. Connect one server(PC) to one of the KVM ports with signal cable and check port switching function, check the keyboard and mouse, if they are not working, try to re-start the server(PC).

6. After successfully finishing all above steps, gradually add server(PC) to this console until meet your need.

2. There is no pop up window to type in user name and password or the pop up window is not normally displayed.

Solutions:

1. Check the AC/DC output.

2. Make sure you have heard the indicating sound and the keyboard LED is on after starting up the computer.

3. Check the LED power and make sure the LED signal cable has connected to the KVM console.

3. I can't log in the KVM system after starting computer.

Solutions:

1. Make sure the KVM keyboard is working, the user name and password is correct. The default value is blank, you can log in after press Enter.

2. If you still can't log in the system, try to connect an external USB or PS/2 keyboard.(The original default value is blank, you can log in after double clicking Enter)

4. I can't switch from one port to another after logging in the KVM system.

Solutions:

1. Invoke the OSD main menu and check the user name on the top left, make sure the user has got the access permission from the administrator.

2. Please contact the distributor or the KVMmanufacturer.

5. Bad display quality of PC screen.

Solutions:

1. Check the signal cables, make sure they are connected.

2. Reset the monitor's display settings.

6. When I switch to one port, the keyboard and mouse do not work.

Solutions:

1. Make sure you have exited the OSD menu.

2. Invoke the OSD main menu and check the user name on the top left, make sure the user has got the access permission from the administrator.

3. Pull out the USB port of the server(PC) then plug in.

7. I can't invoke the OSD main menu.

Solutions:

1. Check the keyboard to make sure it is working.

2. Double click Scroll_Lock .

3. Double click F12

4. Double click Caps Lock

5. Double click Ctrl + Space

8. The OSD code is in disorder or abnormal displayed when daisy chaining.

Solution:

Invoke the OSD menu after daisy chaining, press F1 and choose Load default ,then press enter to refresh OSD

ROM.
