1. Power input (AC or DC)
2. Power Switch
3. Ground connecting screw
4. PC connection port: integrating VGA, keyboard, and mouse signal
Cable Connection

1-4 cable connection

To ensure signal integrity and simplify cable layout, we strongly recommend you use high-quality cables with different lengths as shown in the above table.
Rack Mounting

A standard rack mounting kit is provided to mount the switch at a depth of 686-770mm n a standard 19" rack. For other mounting distances, the rear brackets need to be customized accordingly With one person holding the switch in place and the other person sliding the L bracket into the switch's side mounting brackets from the front to the back, then screwing the brackets to the rack. (See below installation drawing)
2-1 rack mounting

Opening the Console

- Power on the KVM after connecting cables.
- Power on the server or PC after power on the KVM.
- Release the release catch.

UNLOCK

2-3 unlocking

***Note: The release catch can only do horizontal locking, it can't bear any load.**

- Pull the KVM console all the way out and the slide rail automatically locked to its place.
- Rotate the LCD panel all the way back to expose the LCD screen; the LCD module can be rotated up to 108°.

2-4 open angel of the console

Closing the Console

- Close the console and the power automatically shut down.
- Push the release catch in the direction of the arrow, push the LED panel all the way in until it automatically locks up.

Push the KVM into the cabinet

2-5 unlocking the slide rail

Operating the Monitor

3-1 Operating the Monitor

The LED OSD allows you to set up and configure the LED display.

Buttons	Functions
MENU SELECT	Brings up the main menu.
EXIT/AUTO	Exits the current menu and returns to the previous menu or exits the LED OSD. Press AUTO for automatic configuration.
SL-/SL+	Moves the menu to make the corresponding adjustments.
LED state	Green: Running Red: Power off or access nonstandard VESA signal Flashing green: Energy saving mode or no signal

Press AUTO if the screen migrates after power on or under other circumstances, then the screen auto-configures to its best display state.
Note:

- It may not be adjusted to its best state if part of the display mode is not standard VESA mode. If so, return back to the OSD menu to RESET, then it will revert back to normal.

- It is recommended to set up the display mode at 1920×1080, refresh rate of 60Hz.

Specifications
