KIRAVANS VW T5-T6 DoorStore Range

The document is a multi-language fitting guide for the Kiravans DoorStore Range. It includes a step-by-step installation process with important notes and tips.

Specifications

Product	Kiravans DoorStore Range
Available Languages	English (En), German (De), French (Fr), Spanish (Es), Italian (It)
Additional Features	No Quibble Returns, Online Support

Important Pre-Installation Notes

Insulation behind DoorStore: The DoorStore has not been designed for use with insulation. However, many customers have still used insulation successfully. If you do this, you must ensure the DoorStore still fits tightly against the door metal. Any bulging could lead to scratching the outside of the van upon opening.

Lining the DoorStore: If you've covered your DoorStore with fabric, you must be extra careful to ensure the DoorStore sits tightly against the door metal before opening. Any bulging could lead to scratching the outside of the van upon opening.

Installation Steps

1. Remove whatever is currently on your door panel. For VW T6.1 Vans: You will need to bend down the 3 metal tabs to ensure they don't interfere with installation.
2. Present the DoorStore panel to your door, aligning the CNC cut holes with the OEM fixing holes in your door and insert the poppers as shown.
3. Once pushed through, the popper end will expand to secure the DoorStore as shown.
4. **Please note:** The three poppers that go across the ridge of the DoorStore will be very tight. The door has a concave shape so you need to press firmly on the ridge (X) with one hand while inserting the popper with the other.
5. Before opening, ensure the DoorStore is sitting tightly against the door metal to avoid any contact with your van metal. This is especially important if you have covered your DoorStore with fabric or used insulation behind it.

Additional Tips and Warnings

- A set of trim tools will help with the removal of your trim clips.
- Press your poppers in firmly to ensure the DoorStore sits tightly against the door metal. If it doesn't sit tightly, it could scratch the van's exterior when opened.
- **Important:** When using your DoorStore, never leave any items hanging over the edge of the pockets as this could lead to scratching the van exterior when opening the sliding door.

After Installation

Visit the Kiravans YouTube channel for handy how-to videos and more support. They offer a no quibble guarantee which means no fuss will be made, and you'll just get your money back if you are in any way dissatisfied with your purchases. They are confident you'll be a happy camper and offer a 3 year No Quibble Return on all their products.

FAQ

Can I install insulation behind the DoorStore?

Although the DoorStore is not specifically designed for use with insulation, many customers have successfully used it with insulation, ensuring it fits tightly against the door metal.

What if I have covered my DoorStore with fabric?

If you have covered your DoorStore with fabric, make sure it fits snugly against the door metal to prevent any bulging that could scratch the van when the door is opened.

Are there any special considerations for VW T6.1 Van owners?

For VW T6.1 Van owners, it is necessary to bend down the three metal tabs on the door to ensure they do not interfere with the DoorStore installation.

What is the 'no quibble' returns policy?

Kiravans offers a 'no quibble' returns policy, allowing customers to receive a full refund if they are dissatisfied with their purchase within a three-year period.

Where can I find additional installation support?

Additional support, including how-to videos, is available on the Kiravans YouTube channel.

INSTALLATION

1. Remove whatever is currently on your door panel.

VW T6.1 Vans: On some T6.1 's, you will need to bend down the 3 metal tabs to ensure they don't interfere with installation.

Tip: A set of trim tools will help with removal of your trim clips.

2. Present the DoorStore panel to your door, aligning the CNC cut holes with the OEM fixing holes in your door and insert the poppers as shown.
3. Once pushed through, the popper end will expand to secure the DoorStore as shown.

Press your poppers in firmly to ensure the DoorStore sits tightly against the door metal. If..i1 doesn't sit tigbily, it could scratch the van's exterior when oriend.

4. Please note: The three poppers that go in across the ridge of the DoorStore will be very tight. The door has a concave shape so you need to press firmly on the ridge (X) with one hand while inserting the popper with the other.

These need to be tight as this part of the door is under tension and wants to spring out away from the concave curve.

5. Before opening, ensure the DoorStore is sitting tightly against the door metal to avoid any contact with your van metal.

If you've covered your DoorStore with fabric or used insulation behind it, this is especially important.

6. Important: When using your DoorStore, never leave any items hanging over the edge of the pockets as this could lead to scratching the van exterior when opening the sliding door.
