# **Stand Mixer Safety**

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages. m. This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING." These words mean:

DANGER You can be killed or seriously injured if you don't immediately follow instructions.

**WARNING** You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

# **State of California Proposition 65 Warnings:**

**WARNING:** This product contains one or more chemicals known to the State of California to cause cancer. WARNING: This product contains one or more chemicals known to the State of California to cause birth defects or other reproductive harm.

### **IMPORTANT SAFEGUARDS**

When using electrical appliances, basic safety precautions should always be followed, including the following:

- 1. Read all instructions.
- 2. To protect against risk of electrical shock, do not put Stand Mixer in water or other liquid.
- 3. Close supervision is necessary when any appliance is used by or near children.
- 4. Unplug Stand Mixer from outlet when not in use, before putting on or taking off parts and before cleaning.
- 5. Avoid contacting moving parts. Keep hands, hair, clothing, as well as spatulas and other utensils away from beater during operation to reduce the risk of injury to persons and/or damage to the Stand Mixer.
- 6. Do not operate Stand Mixer with a damaged cord or plug or after the Stand Mixer malfunctions, or is dropped or damaged in any manner. Call the KitchenAid Customer experience Center at 1-855-845-9684 for more information.
- 7. The use of attachments not recommended or sold by KitchenAid may cause fire, electrical shock or injury.
- 8. Do not use the Stand Mixer outdoors.
- 9. Do not let the cord hang over edge of table or counter.
- 10. Remove flat beater, wire whip, or dough hook from Stand Mixer before washing.

### Warranty and Service

# 2-Year Hassle-Free Replacement Warranty - 50 United States, District of Columbia, and Puerto Rico

We're so confident the quality of our products meets the exacting standards of KitchenAid that, if your Commercial Stand Mixer should fail within the first two years of ownership, KitchenAid will arrange to deliver an identical or

comparable replacement to your door free of charge and arrange to have your original Commercial Stand Mixer returned to us. Your replacement unit will also be covered by our two year limited warranty.

If your Commercial Stand Mixer should fail within the first two years of ownership, simply call our toll-free Customer experience Center at 1-855-845-9684 Monday through Friday. Please have your original sales receipt available when you call. Proof of purchase will be required to initiate the claim. Give the consultant your complete shipping address (no P.O. Box numbers, please).

When you receive your replacement Commercial Stand Mixer, use the carton, packing materials, and prepaid shipping label to pack up your original Commercial Stand Mixer and send it back to KitchenAid.

### 2-Year Hassle-Free Replacement Warranty - Canada

We're so confident the quality of our products meets the exacting standards of the KitchenAid brand that, if your Commercial Stand Mixer should fail within the first two years of ownership, KitchenAid Canada will replace your Commercial Stand Mixer with an identical or comparable replacement. Your replacement unit will also be covered by our two year limited warranty.

If your Commercial Stand Mixer should fail within the first two years of ownership, simply call our toll-free Customer experience Center at 1-800-807-6777 Monday through Friday. Please have your original sales receipt available when you call. Proof of purchase will be required to initiate the claim. Give the consultant your complete shipping address.

When you receive your replacement Commercial Stand Mixer, use the carton, packing materials, and prepaid shipping label to pack up your original Commercial Stand Mixer and send it back to KitchenAid.

### Arranging for Service after the Warranty Expires, or Ordering Accessories and Replacement Parts

In the United States and Puerto Rico:

For service information, or to order accessories or replacement parts, call toll free at 1-855-845-9684 or write to:

Customer experience Center, KitchenAid Small Appliances, P.O. Box 218, St. Joseph, MI 49085-0218

### **Outside the United States and Puerto Rico:**

Consult your local KitchenAid dealer or the store where you purchased the Commercial Stand Mixer for information on how to obtain service.

### For service information in Canada:

Call toll-free 1-800-807-6777.

#### For service information in Mexico:

Call toll-free 01-800-0022-767.

# **Electrical Requirements**

Volts: 120 A.C. only. Hertz: 60

The power rating for your Stand Mixer is printed on the trim brand or on the serial plate.

### Model KSM7990 Only:

Volts: 120 V Hertz: 60 Hz Wattage: 500 W Horsepower: 1.3\*

Do not use an extension cord. If the power supply cord is too short, have a qualified electrician or serviceman install an outlet near the appliance.

A short power supply cord (or detachable power supply cord) should be used to reduce the risk resulting from becoming entangled in or tripping over a longer cord.

#### **Electrical Shock Hazard**

- Plug into a grounded 3 prong outlet.
- Do not remove ground prong.
- · Do not use an adapter.
- · Do not use an extension cord.
- Failure to follow these instructions can result in death, fire, or electrical shock.

# **Troubleshooting Problems**

Please read the following before calling your service center.

- 1. The Stand Mixer may warm up during use. Under heavy loads with extended mixing time periods, you may not be able to comfortably touch the top of the Stand Mixer. This is normal.
- 2. The Stand Mixer may emit a pungent odor, especially when new. This is common with electric motors.
- 3. If the flat beater hits the bowl, stop the Stand Mixer. See "Beater to Bowl Clearance".

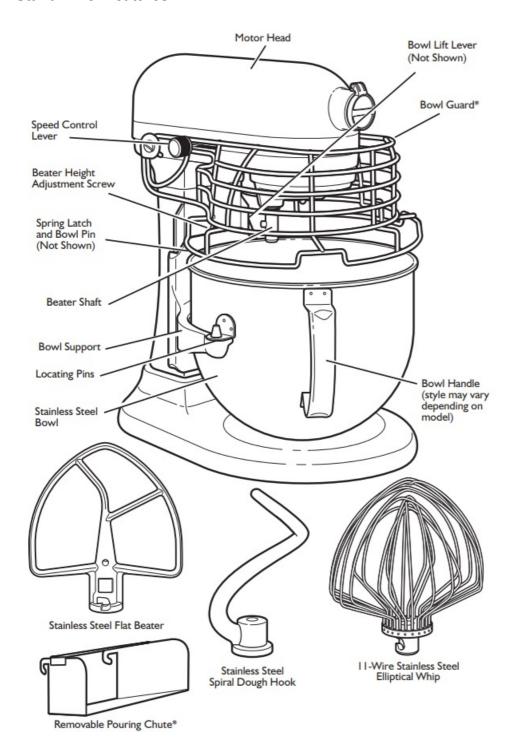

If your Stand Mixer should malfunction or fail to operate, please check the following:

- Is the Stand Mixer plugged in?
- Is the fuse in the circuit to the Stand Mixer in working order? If you have a circuit breaker box, be sure the circuit is closed.
- Turn the Stand Mixer off for 10-15 seconds, then turn it back on. If the mixer still does not start, allow it to cool for 30 minutes before turning it back on.

If the problem is not due to one of the above items, see the KitchenAid Warranty. Do not return the Stand Mixer to the retailer, as they do not provide service.

\*Motor horsepower for our mixer motors was measured using a dynamometer, a machine laboratories routinely use to measure the mechanical power of motors. Our 1.3 horsepower (HP) motor reference reflects the horsepower rating of the motor itself and not the mixer's horsepower output to the mixer bowl. This robust motor, the backbone of our new mixer, delivers .44 HP to the bowl, enabling your mixer to deliver consistent power to small and large loads with less heat build-up; resulting in years of dependable mixing. When combined with and guided by our new advanced motor control board, this is our longest lasting and most efficient motor yet. Simply put, our new, highly efficient, special purpose motor delivers the power you need when you need it.

### **Stand Mixer Features**

<sup>\*</sup>Included with select models. Picture may vary from product depending on model.

#### **Electrical Shock Hazard**

- Plug into a grounded 3 prong outlet.
- Do not remove ground prong.
- · Do not use an adapter.
- · Do not use an extension cord.
- Failure to follow these instructions can result in death, fire, or electrical shock.

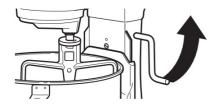

#### To Attach Bowl

- 1. Turn speed control to OFF.
- 2. Unplug Stand Mixer or disconnect power.
- 3. Place bowl lift lever in down position.
- 4. Fit bowl supports over locating pins.
- 5. Press down on back of bowl until bowl pin snaps into spring latch.
- 6. Raise bowl before mixing.
- 7. Plug into a grounded 3 prong outlet or reconnect power.

#### To Remove Bowl

- 1. Turn speed control to OFF.
- 2. Unplug Stand Mixer or disconnect power.
- 3. Place bowl lift lever in down position
- 4. Remove flat beater, wire whip, or dough hook.
- 5. Grasp bowl handle and lift straight up and off locating pins.

# To Raise Bowl

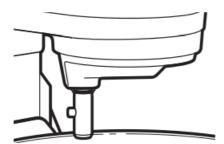

- 1. Rotate lever to straight-up position.
- 2. Bowl must always be in raised, locked position when mixing

1. Rotate lever back and down.

# To Attach Flat Beater, Wire Whip, or Dough Hook

- 1. Turn speed control to OFF.
- 2. Unplug Stand Mixer or disconnect power.
- 3. Slip flat beater on beater shaft and press upward as far as possible.

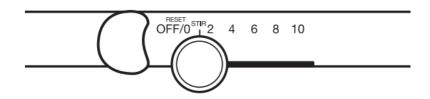

- 4. Turn beater to right, hooking beater over the pin on shaft.
- 5. Plug into a grounded 3 prong outlet or reconnect power.

# To Remove Flat Beater, Wire Whip, or Dough Hook

- 1. Turn speed control to OFF.
- 2. Unplug Stand Mixer or disconnect power.
- 3. Press beater upward as far as possible and turn left.
- 4. Pull beater from beater shaft.
- 5. Plug into a grounded 3 prong outlet or reconnect power.

### **Commercial Stand Mixer Speed Control and Lever Guard**

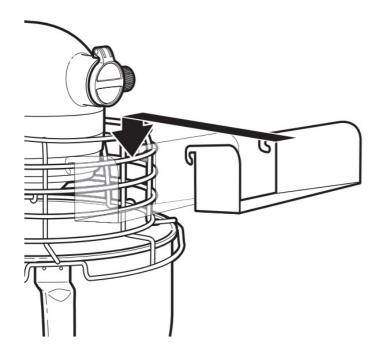

The Soft Start feature minimizes splash-out by starting the mixer slowly before increasing to the selected speed. To further reduce the potential for splash-out, always begin mixing using the Stir Speed, then gradually move to higher speeds as needed. See "Speed Control Guide."

### **Auto-Reset Motor Protection**

If the Stand Mixer stops due to overload, slide the speed control lever to OFF. After a few minutes, the Stand Mixer will automatically reset. Slide the speed control lever to the desired speed and continue mixing. If the Stand Mixer does not restart, see "Troubleshooting Problems."

### Removable Pouring Chute\*

The removable pouring chute is easily attached to the front of the guard as shown in the illustration above. It provides a convenient way to add ingredients to the Stand Mixer bowl.

\*Included with select models. Picture may vary from product depending on model.

# **Using Your KitchenAid Attachments**

# Flat Beater for normal to heavy mixtures:

- cakes
- · creamed frostings
- candies
- cookies
- pie pastry
- biscuits
- quick breads
- · meat loaf
- · mashed potatoes

# Wire Whip for mixtures that need air incorporated:

- eggs
- egg whites
- · heavy cream
- boiled frostings
- sponge cakes
- angel food cakes
- mayonnaise
- · some candies

# Dough Hook for mixing and kneading yeast doughs:

- breads
- rolls
- · coffee cakes
- buns

# **Mixing Time**

Your KitchenAid Stand Mixer will mix faster and more thoroughly than most other electric stand mixers. Therefore, the mixing time in most recipes must be adjusted to avoid overbeating. With cakes, for example, beating time may be half as long as with other stand mixers.

### **Mixer Use**

### **Injury Hazard**

- Unplug mixer before touching beaters.
- Failure to do so can result in broken bones, cuts, or bruises.

**NOTE:** Do not scrape bowl while Stand Mixer is operating.

The bowl and beater are designed to provide thorough mixing without frequent scraping. Scraping the bowl once or twice during mixing is usually sufficient. Turn Stand Mixer off before scraping.

The Stand Mixer may warm up during use. Under heavy loads with extended mixing time, you may not be able to comfortably touch the top of the Stand Mixer. This is normal.

If the Stand Mixer becomes overloaded, it will automatically shut off to prevent damage. See "Auto-Reset Motor Protection" in "Assembling Your Bowl Lift Stand Mixer" section.

# Speed Control Guide – 10 Speed Stand Mixers

All speeds feature Soft start operation, which minimizes splash-out and flour puff. The mixer will start slowly before increasing to the selected speed.

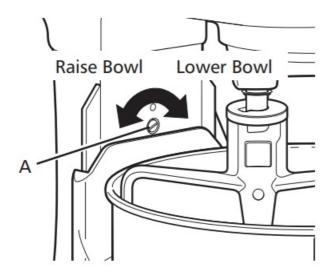

Speed	Used For	Description
Stir	STIR	For slow stirring, combining, mashing, and starting all mixing procedures. U se to add flour and dry ingredients to batter, and add liquids to dry ingredients. Do not use STIR speed to mix or knead yeast doughs.
2	SLOW MIXING	For slow mixing, mashing, and faster stirring. Use to mix and knead yeast d oughs, heavy batters, and candies; start mashing potatoes or other vegeta bles; cut shortening into flour; mix thin or splashy batters.
4	MIXING, BEATING	For mixing semi-heavy batters, such as cookies.  Use to combine sugar and shortening and to add sugar to egg whites for m eringues. Medium speed for cake mixes.
6	BEATING, CREAMI NG	For medium-fast beating (creaming) or whipping.  Use to finish mixing cake, doughnut, and other batters. High speed for cake mixes.
8	FAST BEATING, W HIPPING	For whipping cream, egg whites, and boiled frostings.
10	FAST WHIPPING	For whipping small amounts of cream, egg whites, or for final whipping of mashed potatoes.

**NOTE:** Use Speed 2 to mix or knead yeast dough or fondants. Use of any other speed with heavy doughs may cause mixer to stop rotating to limit mixer damage. This is normal operation. If this occurs, turn the speed selector to off, and then turn back on to a lower speed.

### **Beater to Bowl Clearance**

Your Stand Mixer is adjusted at the factory so the flat beater just clears the bottom of the bowl. If, for any reason, the flat beater hits the bottom of the bowl or is too far away from the bowl, you can correct the clearance easily.

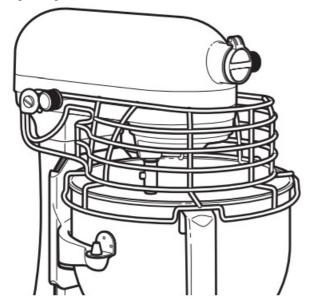

- 1. Unplug Stand Mixer or disconnect power.
- 2. Place bowl lift lever in down position.
- 3. Attach flat beater.
- 4. Adjust so flat beater just clears bottom surface of bowl when in lifted position by turning screw (A) counterclockwise to raise the bowl and clockwise to lower the bowl. Just a slight turn is all that is required: the screw will not rotate more than 1/4 turn (90 degrees) in either direction. (The full range of adjustment is 1/2 turn, or 180 degrees.)
- 5. Place bowl lift lever in up position to check clearance.
- 6. Repeat steps 4 and 5 if necessary.

**NOTE:** When properly adjusted, the flat beater will not strike on the bottom or side of the bowl. If the flat beater or the wire whip is so close that it strikes the bottom of the bowl, the beater or whip may wear.

# **Using the Bowl Guard\***

If your Stand Mixer comes with a bowl guard, make sure that the guard is returned to the down position before beginning to use the Stand Mixer. The Stand Mixer will not run if the bowl guard is not in the proper position.

\*Included with select models. Picture may vary from product depending on model.

# **Mixing Tips**

# **Using Your Recipes with the Mixer**

There are a number of methods that can be used for making cake with your KitchenAid Stand Mixer.

For example, the "quick mix" method (sometimes referred to as the "dump" method) is ideal for simple cakes, such as yellow cake and white cake. This method calls for combining dry ingredients with most or all liquid ingredients in one step. More elaborate cakes, such as a torte, should be prepared using the traditional cake mixing method. With this method, sugar and the shortening, butter, or margarine are thoroughly mixed (creamed) before other ingredients are added. For all cakes, mixing times may change because your KitchenAid Stand Mixer works more quickly than other mixers. In general, mixing a cake with the KitchenAid Stand Mixer will take about half the time

called for in most cake recipes.

To help determine the ideal mixing time, observe the batter or dough and mix only until it has the desired appearance described in your recipe, such as "smooth and creamy."

To select the best mixing speeds, see "Speed Control Guide."

### **Adding Ingredients**

Always add ingredients as close to side of bowl as possible, not directly into moving beater.

**NOTE:** If ingredients in very bottom of bowl are not thoroughly mixed, then the beater is not far enough into the bowl. See "Beater to Bowl Clearance."

#### **Cake Mixes**

When preparing packaged cake mixes, use Speed 2 for low speed, Speed 4 for medium speed, and Speed 6 for high speed. For best results, mix for the time stated on the package directions.

### Adding Nuts, Raisins, or Candied Fruits

In general, solid materials should be folded in the last few seconds of mixing on Stir Speed. The batter should be thick enough to prevent the fruit or nuts from sinking to the bottom of the pan during baking. Sticky fruits should be dusted with flour for better distribution in the batter.

#### **Liquid Mixtures**

Mixtures containing large amounts of liquid ingredients should be mixed at lower speeds to avoid splashing. Increase speed only after mixture has thickened.

### **Basic White Bread**

### 1/3 cup (80 mL) low-fat milk

2 tbs (30 mL) sugar 2 tsp (10 mL) salt 2 tbs (30 mL) butter or margarine

### 11/2 packages active dry yeast

1 cup (240 mL) warm water (105°F to 115°F) [40°C to 46° C] 4 cups (950 mL) all-purpose flour

Place milk, sugar, salt, and butter in small saucepan. Heat over low heat until butter melts and sugar dissolves. Cool to lukewarm.

Dissolve yeast in warm water in warmed mixer bowl. Add lukewarm milk mixture and 4½ cups (1 L) flour. Attach bowl and dough hook to mixer. Turn to Speed 2 and mix about 1 minute.

Continuing on Speed 2, add remaining flour, 1/2 cup (120 mL) at a time, and mix about 1-1/2 minutes, or until dough starts to clean sides of bowl. Knead on Speed 2 about 2 minutes longer, or until dough is smooth and elastic. Dough will be slightly sticky to the touch.

Place dough in greased bowl, turning to grease top. Cover. Let rise in warm place, free from draft, about 1 hour, or until doubled in bulk.

Punch dough down and divide in half. Shape each half into a loaf, and place in greased  $8\frac{1}{2} \times 4\frac{1}{2} \times 2\frac{1}{2}$ " (21.25 x 11.25 x 6.25 cm) baking pans. Cover. Let rise in warm place, free from draft, about 1 hour, or until doubled in bulk.

Bake at 400°F (200°C) for 30 minutes, or until golden brown. Remove from pans immediately and cool on wire racks.

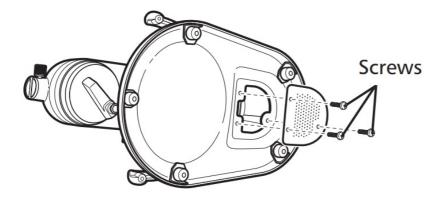

Yield: 32 servings (16 slices per loaf).

Per serving: About 95 cal, 3 g protein, 18 g carb, 1 g fat, 0 mg chol, 148 mg sodium.

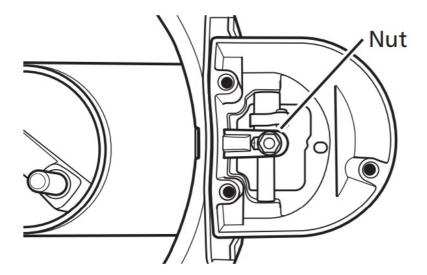

### Care and Cleaning

- Unplug the Stand Mixer before cleaning or disconnect power.
- Stainless steel bowl, flat beater, wire whip, and spiral dough hook may be washed in an automatic dishwasher.
   Or, clean them thoroughly in hot sudsy water and rinse completely before drying. Do not store beaters on shaft.
- The bowl is dishwasher-safe. It can also be hand-washed in hot sudsy water, rinsed thoroughly, and dried.
- Wipe the Stand Mixer with a clean damp cloth. Do not use abrasive cleansers or scouring pads and do not immerse the Stand Mixer in water.
- Wipe the beater shaft frequently, removing any residue that may accumulate.

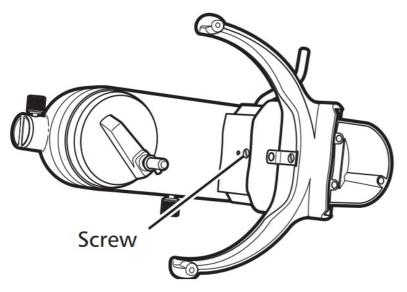

### To Remove the Bowl Support for Cleaning

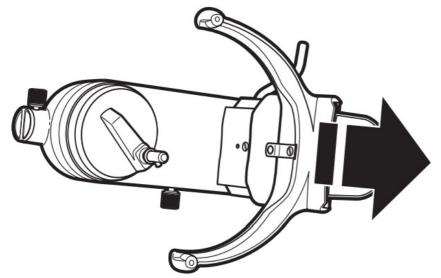

- 1. Unplug Stand Mixer or disconnect power.
- 2. Remove the Stand Mixer base by removing the 3 screws located on the bottom of the mixer. Remove the vent screen and the mixer base.
- Remove the nut from the lifter rod located inside the column, then remove the washer and spring.
   NOTE: Note the order that they were assembled (the washer goes between the spring and nut), for reassembly.

4. Loosen the screw holding the bowl clip to the front of the bowl support – it is not necessary to remove the screw all of the way. This allows the bowl support to slide down.

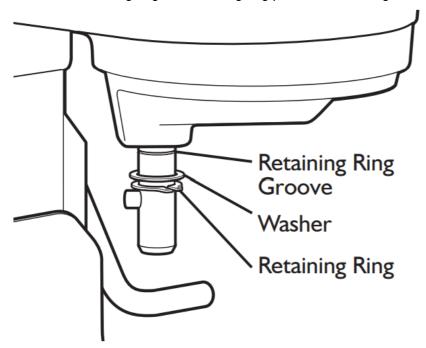

5. Slide the bowl support down so that the tabs on the back of the bowl support line up with the slots in the column. Remove the bowl support by passing the tabs through the slots.

- 6. Clean the bowl support and column with a mild detergent and a wash cloth. Do not use abrasive cleansers or scouring pads.
- 7. To reassemble, reverse steps 1 through 6.

# **Planetary Cleaning Instructions**

- 1. Unplug the Stand Mixer or disconnect the power.
- 2. Remove the retaining ring with retaining ring pliers, slide the ring and the washer down the shaft.

Clean the shaft, retaining ring, and washer with a mild detergent and wash cloth. Do not use abrasive cleaners or scouring pads. Do not immerse the Stand Mixer in water.

3. To reassemble, reverse steps 1 through 4, making sure retaining ring is fully seated into groove.

# **Flat Beater Cleaning Instructions**

1. To clean the drain hole in the flat beater, use a small round brush, toothpick, or skewer to run through the hole.
