klipxtreme KCK-652E FlexPlit Foldable Wireless Keyboard

Hi there!

Congrats on your new KlipXtreme gadget! This foldable, portable keyboard/mousepad is

ready to revolutionize your workspace. With so many perks, make sure to read this manual to fully enjoy your new acquisition. Let's dive in!

What's in the box

Here's what you'll find inside the FLEXPLIT box:

- Keyboard/mousepad
- USB dongle

As you unbox your new gadget, ensure everything is in perfect condition. If you find any parts missing or damaged, get in touch with KlipXtreme's customer support through the contact options on this page: klipxtreme.com/submenu/support. We're here for you!

Power on and pairing

Turn it on

To power your keyboard on, move the switch to the "ON" position. The battery icon will turn red for 2 seconds to confirm you did it right.

Connect it to Bluetooth®

Before we go over the Bluetooth function, keep this in mind: modes Bluetooth and 2.4GHz don't work simultaneously.

Here's the way-too-easy process of BT pairing:

Connect it through a 2.4GHz wireless signal

Quick heads-up: Bluetooth and 2.4GHz modes can't be used at the same time.

- Insert the USB dongle into any available USB port on your computer.
- Press "FN+2" to switch to 2.4GHz mode.
- Success! You're now connected.

Remember: To reconnect your device, press "FN+2" to ensure you're in 2.4G mode. Simple as that, and your Keyboard will be back online.

Switching operating systems

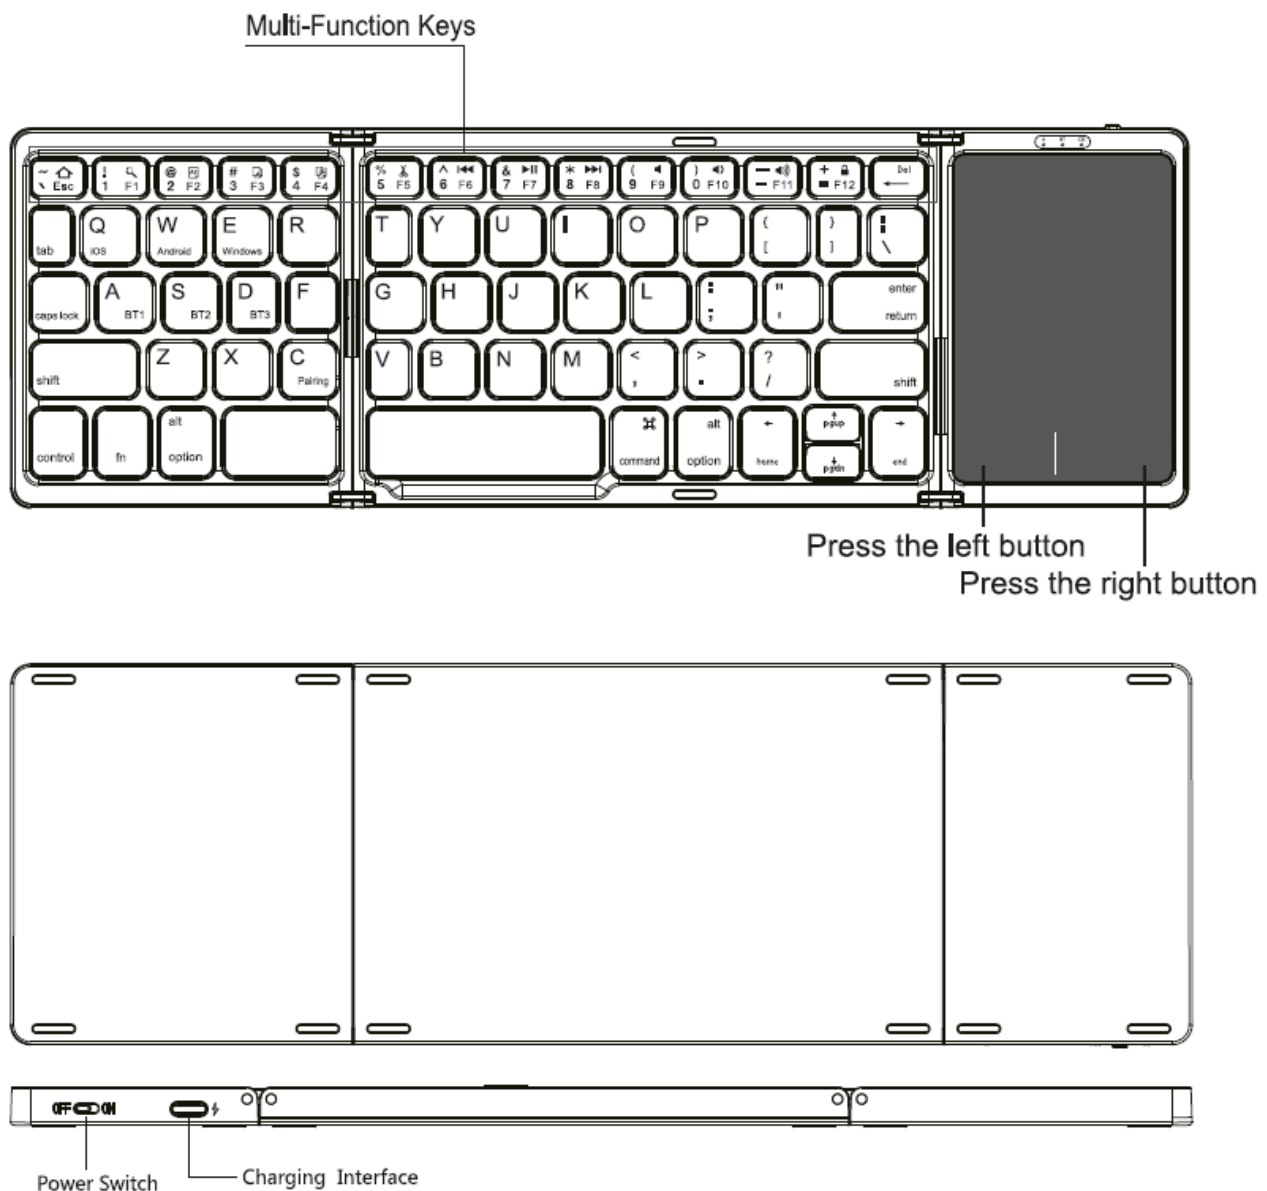

One the best things about your Keyboard is that you can pair it with Windows, Apple iOS or Android™ gadgets. Here's how it works:

For Windows and iOS mode:

- FN+Q = iOS
- FN+W = Andriod
- FN+E = iOS

FN media shortcuts

Instead of searching online for keyboard shortcuts for every system, take a look at this table. It has all the information you need in one place.

Product features

iOS/Android		Windows		Windows

Keyboard Maintance

1. Keep the keyboard away from liquids or humid environments: Avoid saunas, swimming pools, steam rooms, and rain.
2. Avoid extreme temperatures: Do not expose the keyboard to very high or very low temperatures.
3. Keep out of direct sunlight: Do not leave the keyboard under the sun for extended periods.
4. Keep away from flames: Avoid placing the keyboard near cooking stoves, candles, or fireplaces.
5. Avoid sharp objects: Prevent scratches and ensure timely recharging to maintain normal use.

Product specifications

And now, for the grand finale: a sprinkle of mildly tedious yet absolutely essential info that you simply can't skip – or else...

FAQ

1. The tablet PC can't connect to the Bluetooth keyboard?

- Ensure the Bluetooth keyboard is in pairing mode, then enable Bluetooth on the tablet PC to connect.
- Check if the Bluetooth keyboard is discoverable.
- Verify the Bluetooth keyboard has sufficient battery power; if not, charge it.

2. Why is the keyboard indicator always flashing?

- A constantly flashing indicator light means the keyboard is low on power. Please charge it as soon as possible.

3. Why does the tablet PC display that the Bluetooth keyboard is disconnected?

- If the Bluetooth keyboard is idle for a while, it will enter sleep mode to save power. Press any key to wake it up, and the Bluetooth connection will automatically restore.
