## INSTALLATION INSTRUCTIONS

## PRODUCT: LED LIZBONA

**PARAMETERS:** DC 5V, 120°, 3,5W, IP54, CCT 3000K-6500K

### ATTENTION:

- Devices with visible damage to the enclosure or the power supply line must not be installed.
- During installation, disconnect the power supply and follow Occupational Safety and Health regulations.
- A properly installed device may only be connected to a properly operating electrical installation.
- The electrical connection must be performed by a specialist holding an appropriate authorisation for electrical works.
- It is necessary to observe the proper connection of the power cord. Its incorrect connection may result in permanent damage to the device (see connection diagram).
- If installed and operated properly, the device is highly resistant to water and dust.
- The device may be installed directly on the normally flammable surface (i.e. ignition temperature of the surface at least 200°C, does not deform and soften at this temperature, e.g. wood and wood-derivatives, thickness above 2 mm) or on a non-flammable surface (i.e. not supporting fire, e.g. metal, gypsum, concrete).
- Light source of this fixture is unchangeable. When light source is used up, please replace whole lighting fixture.
- Technical changes reserved.
- Keep the instruction manual.

In accordance to European Directive 2012/19/EU regarding electrical and electronic equipment, the WEEE

label indicates the need of separate collection of used out electrical and electronic equipment. Products with such label, under penalty of fine, can not be thrown into ordinary garbage together with other wastes. These products may be harmful to the natural environment and human health, it requires a special form of treatment / recovery / recycling / disposal. You can find out about the utilization possibilities of a worn out device in the appropriate city or commune office.
