## Attention

Please handle this product with care and inspect it regularly to ensure it is in good working order.

If the product, power supply cord, or plug shows any signs of damage: stop use, unplug, and contact Kogan.com support.

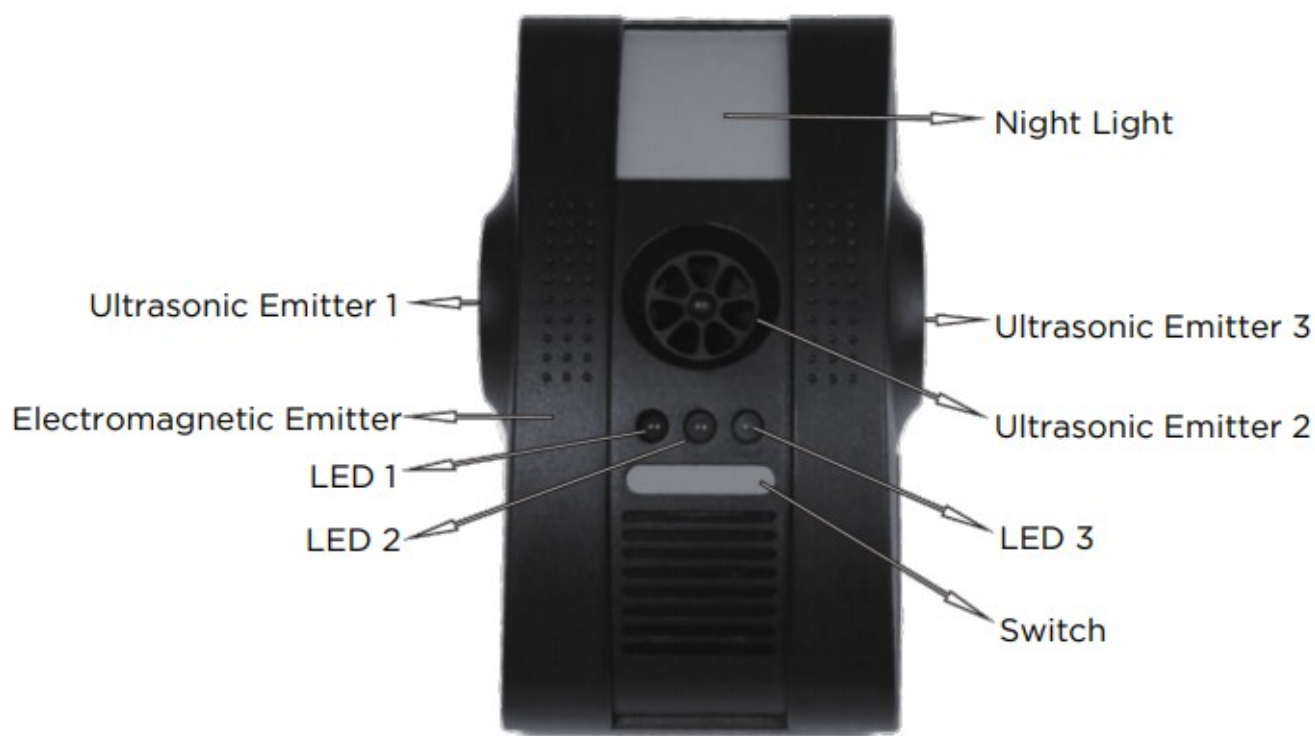

## Before Use

Thank you for buying the Multi-Function Electromagnetic Pest repeller, which will give you a healthy, comfortable, pest-free living environment. Adopting the most advanced pest control technology, it not only repels various pests but will also act as an air purifier. It will control roaches, ants, spiders, mice, rats, crickets, silverfish, earwigs, scorpions, fleas, ticks, bats, etc...

Please read and follow all of the instructions given, even if you feel you are familiar with similar products. Keep a copy of this manual handy for future reference. For your convenience, record the complete model number and the date you received your product, along with your purchase order number. This will assist you in the event that warranty service is required.

**Please read all instructions carefully before using the product.**

## Product Overview

**Specifications**

The multifunction Electromagnetic Pest Repeller has four work patterns for you to choose from, according to your different needs or environments.

Mode 1 (with red LED 1):	<b>Electromagnetic Waves (repels cockroaches/insects)</b>
Mode 2 (with yellow LED 2):	<b>Air Purification</b>
Mode 3 (with green LED 3):	<b>Ultrasonic Waves (repels rodents)</b>
Mode 4 (with all 3 LEDs lit)	<b>Electromagnetic + Air Purification + Ultrasonic</b>

**Control Panel Guide**

Plug the unit into a power socket and the three LED indicator lights will light up in turn. Meanwhile, the nightlight will illuminate and the unit will enter self-check mode, then the device will be ready to work.

- At this time, you can press the switch and the red LED (LED 1) will turn on and the unit will enter into the electromagnetic mode, working for 25 seconds with 35-second intervals.
- Press the switch again and the yellow LED (LED 2) will turn on. The unit will emit negatively charged ions, working for 5 minutes, then resting in 20-minute cycles.
- Press the switch a third time and the green LED (LED 3) will turn on, and the unit will work with a triple ultrasonic frequency ranging from 25KHz to 60KHz.
- Press the switch a fourth time and all of the LEDs will be lit. This means the unit is working with all three modes operating at once.

**Functions**

1. Advanced control switch controls all functions.

2. Nightlight with soft lighting creates a soothing, comfortable environment.
3. Enhanced electromagnetic waves reach deeper into walls, cracks, and crevices throughout your home or office, repelling even the most impossible-to-reach pests.
4. Creates a stream of negatively charged ions which attract airborne dust and pollen before falling away out of the air onto the floor.
5. Triple super-strong function emitter emits ultrasonic waves in all directions, solving the problem of rectilinear propagation of ultrasonic waves, covering all of your rooms.
6. For best results, you can choose to have all three functions combined and working together.

## Warnings

- Please unplug the unit if you will not be using it for an extended period of time.
- Avoid using the unit in extremely humid environments.
- The longer a unit is used in a location, the better performance and results you will get.
- Keep in mind that the frequency waves will decrease in effectiveness when they have to pass through or past furniture or other solid objects.
- Make sure to plug the unit into power outlets that are clear of surrounding objects.
- Completely safe to use around household pets!
