## OVERVIEW

## OPERATION

1. Connect the USB-C connector on the hub into the USB-C port on your laptop or tablet.
2. HDMI output: Connect your device to an HDTV or projector using an HDMI cable connected to the HDMI output port.
3. USB 3.0 data transfer: Connect your phone, tablets, hard drive or other USB peripherals via the USB 3.0 ports to transfer data between your laptop and the connected devices.
4. SD/microSD card reader: Insert your memory card into either the SD or microSD card slot to directly access files. Both memory cards slots can be used simultaneously.
5. USB-C power delivery: Power your laptop using the original USB-C power adapter connected to the USB-C PD port. Note: This setup won't support data transfer and video functions simultaneously.
6. USB-C data transfer: Connect your USB-C device via the USB-C port to transfer data between your laptop and the connected devices.

### Notes:

1. This package includes x1 USB-C hub. Power adapters, SD cards, cables, or other accessories are not included.
2. To ensure optimal performance, ensure that the total current drawn by devices connected to this hub does not exceed 900mA when the hub is not connected to a power source. Exceeding this limit may result in unstable or disconnected output.  
When using high-power devices, connect a power adapter to the hub.
3. The USB-C female port on this product is solely intended for charging USB-C laptops that support USB Power Delivery (PD) through their USB-C port. Please note that the USB-C female port on this product does not

support data transfer.

4. Achieving a 4K resolution requires both a display capable of 4K resolution and a HDMI cable that supports 4K.

### Tips:

To help reduce the USB 3.0 radio frequency interference to the wireless connection of some laptops.

- Connect the laptop to a 5GHz Wi-Fi network.
- Connect devices (e.g., mouse and keyboard) to USB 2.0 ports on the laptop.
- Connect the USB 3.0 hub to the laptop with a high-quality 1-foot or longer USB 3.0 extension cable; keep USB 3.0 devices away from the host computer.
- Use high-quality shielded USB 3.0 devices/cables/connectors.

## SPECIFICATIONS

Connector	USB-C
HDMI output port	Up to 4K@60Hz, 2K@60Hz or 2K/1080p/720p/480p/360p
USB 3.0 Type-A	Data transfer up to 5Gbps
USB 3.0 Type-C	Data transfer up to 5Gbps
SD/microSD card slot	Capacity up to 512GB, Read/write speed up to 104MB/S
USB-C female PD charging port	Charging up to 100W of power charging port delivery (Only for laptop charging)
System requirements	Laptop with an available USB-C port Chrome, Linux, Windows 10 / 8.x / 7 / Vista / XP, macOS v10.6 or above operating systems
