- User guide

## INSTALLATION

Step 1:

- Open the battery compartments on the keyboard.
- Insert x2 AAA batteries paying attention to orientation of the polarity symbols **(+ , –)**.
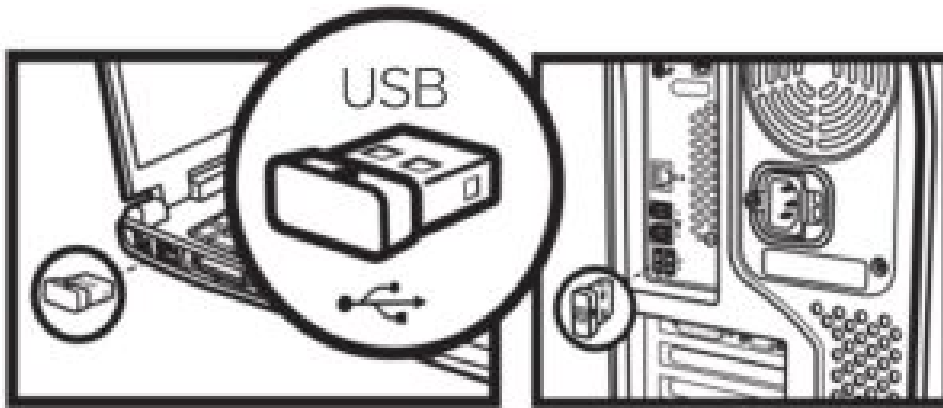

Step 2:
Turn on the power switch.

2.4G WIRELESS CONNECTION

- Remove the USB receiver from the battery compartment.

- Plug the USB receiver into a USB port on your computer.

The keyboards default factory setting is 2.4G wireless mode (The 2.4G keyboard indicator lights up in white). When the connection is successful, the indicator will go turn off.
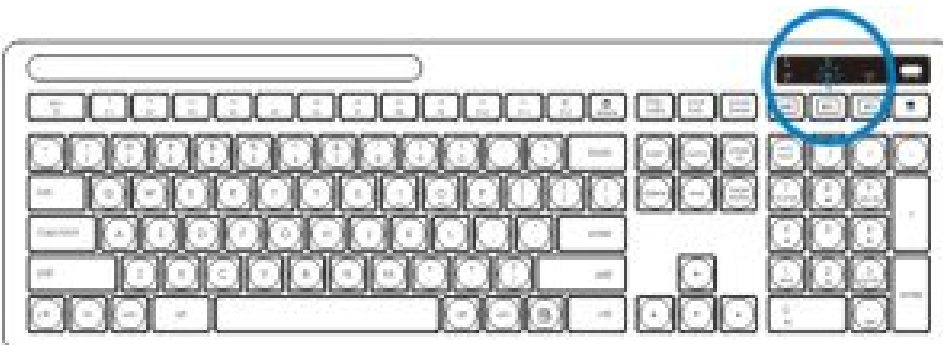

Note:
It may take a few minutes for the keyboard to be usable as required drivers may automatically install to facilitate usage.

BLUETOOTH CONNECTION

Windows:

1. Press and hold the BT1 button on the keyboard for 3-5 seconds until the white light begins to flash rapidly.
2. Ensure that computer supports Bluetooth and is turn on.
3. select Start > Settings > Devices > Bluetooth & other devices > Add Bluetooth or other device > Bluetooth
4. Search for "BT 3.0 Keyboard" or "BT5.0 KB" and click to pair your keyboard.
5. The keyboard is now connected and can be used normally.

Note:
Bluetooth 3.0 supports Windows XP/7/8/10 and MacOS 10.14. Bluetooth 5.0 supports Windows 8/10 Mac10.14

MacOS:

1. Press and hold the BT2 button on the keyboard for 3-5 seconds until the white light begins to flash rapidly.
