SAFETY & WARNINGS

- Read these instructions thoroughly before use.
- Please note, the solar light is designed to work when the lighting gets dark. The selected location should not be near a light source such as a porch light or streetlight, as these might keep the solar lights from automatically turning on.

- Although the battery has been charged by the manufacturer, the charge may have dropped by the time the consumer receives the product. Please let the solar light charge for a full day for the maximum performance.
- The surface of the solar panel must be kept clean. Dusty surfaces will reduce charging efficiency.
- Some components of this product are not replaceable. If the part is damaged, the whole product must be disposed of. Do not disassemble and attempt to repair.
- Keep away from fire.
- Always keep the solar panel facing upwards.
- Do not immerse in water or other liquids.
- Ensure the chosen location of the light receives plenty of sunlight or it may require a longer charging time.
- Do not use the light in the temperatures above 45°C or below 0°C. Doing so may affect battery life and normal use.

OVERVIEW

1. Solar panel
2. Indicator
3. Power button
4. LED panel
5. Motion sensor

INSTALLATION

Step 1:

- Select a suitable location that receives a lot of sunlight to ensure the solar panel can charge the built-in Li-ion battery effectively.
- Remove the LED panel

Step 2:

- Using the appropriate mounting hardware for your surface and x2 screws 28mm vertically apart, mount the solar panel.

- Replace the LED panel.

OPERATION

Press and hold the Power button to turn the light on and off.

Wall Light Mode:

Press the power button to cycle through the lighting modes.

- Mode 1 (Red): 50lm with motion sensor
- Mode 2 (Green): no lighting, motion sensor off
- Mode 3 (Orange): 200lm with 6 Hour timer

Portable Mode:

Press the power button to cycle through the lighting modes.

- Mode 1: 100lm
- Mode 2: 200lm

Battery capacity indicator:

- Green: >70%
- Orange: 30%-70%
- Red: <30%

SPECIFICATIONS**Solar panel**

Monocrystalline

Battery

Li-ion battery

Material

Polycarbonate

Working temperature

0°C – 45°C
