OPERATION

Pairing
PS4
Before pairing, make sure to reset the controller. Insert a small, thin object (ex. paperclip) to the Reset button slot, and press and hold it for 5 seconds.
1. Connect the controller with a microUSB cable to the USB port on the console.
2. Press the HOME button on the controller.
3. After a while, the light bar will start to glow blue. Now USB cable can be disconnected.

PC
Connection with a PC requires a Bluetooth adapter in 2.0 version or higher. Range of the controller depends on the adapter, Bluetooth version and obstacles between the controller and adapter.
1. In Windows 10, go to the Settings menu.
2. Go to the Devices menu.
3. Press the Add Bluetooth device button, and select the Bluetooth option.
4. Press and hold the HOME and SHARE buttons at the same time, until the light bar starts to flash.
5. After a while, the PC will find the controller. Select the Wireless controller.
6. After a while, the connection will be established.
Attention: Touch panel, light bar, speaker and audio-jack output may not work on all platforms.

Tips:

- In the Steam app, pressing the HOME button will open up Big Picture mode.
- To turn off the controller, press and hold the HOME button for 10 seconds.
