Instructions for use KTsuit

Do follows work before start our tools

- **A:** Connect your KTsuit with USB cable to laptop
- **B:** laptop or PC must connect to internet

1. **Step1:** go to www.ktmtool.com website downloads the software, install the package.
 2. **Step2:** Check the SN where tie on your box backside , noticy : dont realase that SN to anyone , its a safe code for you ,dont let any thirdparty or guys know that code or it easy let your tools lock.
 3. **Step3:** Send that SN to email :info@ktmtool.com for active and link your tool to your email .(you tool will be lock if you dont send to active)
 4. **Step4 run** the ktsuit manager, and register it with your email , then input the sn active your account, don't close the ktsuit manager before your run ktsuit ,always keep click the active button before you run the ktsuit software.
- Step5: input that SN code to you login windows when you run KTsuit main software, it will ask you input that code ,then you software and tool will be online.
