15. Enter the password for your WiFi then tap "Submit."
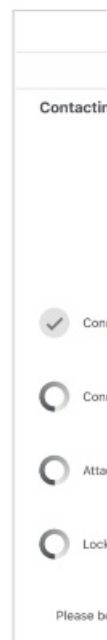

16. The lock will contact the remote server to finalize

17. A message will appear signifying that the lock activation process was successful. Tap "Ok" to continue. You may now re-hide your network, if applicable.

Enter a name for the first Access Code. Enter an Access Code or tap "Generate Random Code," then tap "Submit."

Access Code names must be 2 to 14 characters, and:
- Can include letters and numbers
- Cannot include special characters

For more information about Schedule Types, see Code Schedule page on www.kwikset.com

⚠ Important Information About Access Codes

- Always test each new Access Code after creating it to make sure it works.
- For security reasons, the first 4 digits of each Access Code must be unique. For example, you are unable to program an Access Code **1-2-3-4-5,** as well as an Access Code **1-2-3-4-6.**
- A total of 250 Access Codes can be programmed.

Kwikset.
