## PA2000w MAC WPS Setup

Before setting up printer you first must, download the Mac Driver from **Kyocera.info** and run the installer. This will install all software required.

Step 1
If your router supports WPS, you can configure network connection using the WPS push button on your router. Check your router manual to WPS support.

1. Turn on the computer.

2. Press Wireless Network on the operation panel of the machine. The wireless network indicator flashes.

3. Press the WPS button on the router.

4. The network between this machine and the router is being configured. If the network connection between this machine and the router completes, Wireless Network will light up.
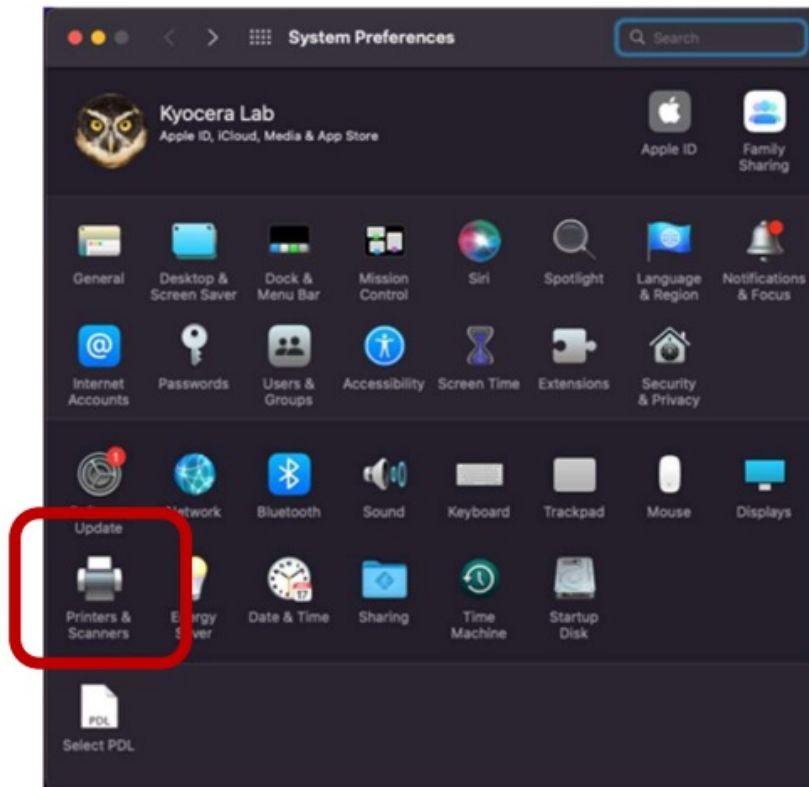

5. Print a Status page.

Press and hold the Main Power button for 5 seconds, this will print the status page.

The attention light will start flashing and status page will be printed.

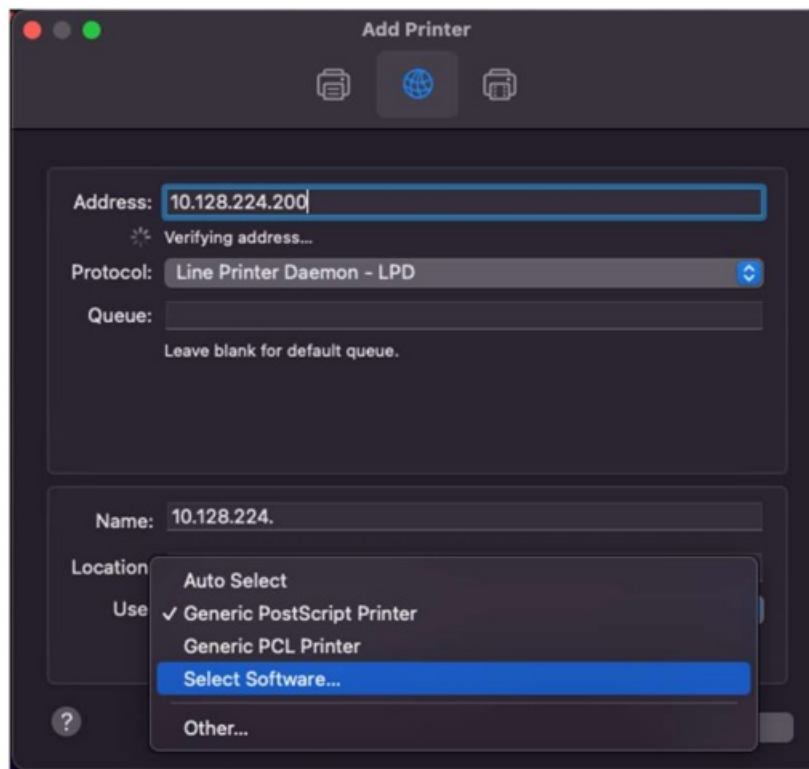

Step 2

1. Select the Apple icon and then System Preferences
2. Select Printers and scanners

3. Select the "+" to add a new printer.

4. Select the center tab (IP) enter the IP address listed on the status page printed from Step 1. Select LPD. Select drop down next to "Use" press Select Software.

5. Scroll to printer and select ok.

6. Press Add
