LA CROSSE®
TECHNOLOGY

LA CROSSE TECHNOLOGY 617-710B Atomic Analog Alarm Clock

Power Up

1. Select your Time Zone and DST (Daylight Saving Time) settings on the back of the clock.

- **TIME ZONES**

- EST – Eastern
- CST – Central
- MST – Mountain
- PST – Pacific

- **DST OPTIONS**

- ON – DST all year long
- AUTO – Changes spring and fall
- OFF – Standard Time all year long

2. Insert 1-AA battery into your Alarm Clock.

3. Position the clock near an exterior wall that faces Fort Collins, Colorado. The hands will move to the 12 O'Clock position and remain there until the WWVB Atomic Time Signal (page 4) is received.

Note: If your time is incorrect after the signal is received, press and release the RESET button once using a paperclip or similar object – this will allow the clock to set again correctly. See page 3 for manual set instructions.

Set Time Manually

- For immediate setup, use a paperclip or similar object to hold the SET button in until the hands reach the correct time.
- The clock will then run from this time and adjust according to the selectors on the back if the Atomic Time Signal is picked up in the future.

Time Alarm

Set Alarm Time

Turn the ALARM SET knob counterclockwise until the Alarm Time Hand is at your desired wake-up time. When the alarm sounds, it will increase in frequency until snoozed or shut off using the ALARM ON/OFF Switch.

Activate/Deactivate the Alarm

Use the ALARM ON/OFF Switch on the side of the clock to activate (up) or deactivate (down) the alarm.

Snooze

When the alarm sounds, press the SNOOZE/LIGHT button on the top of the clock to silence the alarm for 5 minutes. Snooze may be repeated.

Night Light

Press the SNOOZE/LIGHT button on the top of the clock to enable the Night Light for 5 seconds.

Clock Reset

If the clock isn't working correctly, press the RESET button with a paperclip or similar object. The clock should then follow the same startup process with the hands moving to the 12 O'Clock position while it searches for the Atomic Time Signal.

Atomic Time Signal

- The clock will begin searching for the WWVB Atomic Time Signal when powered on. Depending on your location, this can sometimes take a few days.*
- When the signal is received, the time will be set according to your TIME ZONE and DST Selector settings. The clock will run normally and automatically perform daily searches at 00:50:40, 01:50:40, 03:50:40, 04:50:40, 05:50:40, 06:50:40, 12:50:40, 18:50:40, 22:50:40 and 23:50:40 to keep your time synced and accurate.
- If desired, press the REC button to perform a manual signal search.
- Learn more about Atomic Time: https://bit.ly/atomic_time
- We cannot guarantee the WWVB radio signal coming from Fort Collins, CO, will reliably reach every location. Try moving the clock away from other electronics and near a window for the best results.

Care & Maintenance

When batteries of different brand or type are used together, or new and old batteries are used together, some batteries may be over-discharged due to a difference of voltage or capacity. This can result in venting, leakage, and rupture and may cause personal injury.

- Do not mix Alkaline, Lithium, standard, or rechargeable batteries.
- Always purchase the correct size and grade of battery most suitable for the intended use.
- Always replace the whole set of batteries at one time, taking care not to mix old and new ones, or different battery types.
- Clean the battery contacts and also those of the device prior to battery installation.
- Ensure the batteries are installed correctly with regard to polarity (+ and -).
- Remove batteries from product during periods of non-use. Battery leakage can cause corrosion and damage to this product.
- Remove used batteries promptly.
- For recycling and disposal of batteries, and to protect the environment, please check the internet or your local phone directory for local recycling centers and/or follow local government regulations.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Caution! Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

All rights reserved. This manual may not be reproduced in any form, even in part, or duplicated or processed using electronic, mechanical or chemical process without the written permission of the publisher. This booklet may contain errors or misprints. The information it contains is regularly checked and corrections are included in subsequent editions. We disclaim any responsibility for any technical error or printing error, or their consequences. All trademarks and patents are recognized. The manufacturer is not responsible for any radio or TV interference caused by unauthorized changes or modifications to this equipment. Such changes or modifications could void the user authority to operate the equipment.
