LACOKI CL-01 Rechargeable LED Reading Light

INTRODUCTION

For voracious readers seeking comfort and convenience, the LACOKI CL-01 Rechargeable LED Reading Light is a great illumination option. This portable and effective light, which was released at a reasonable price of **$12.99**, blends functionality with a stylish appearance. Touch control makes it simple to operate the 28 LEDS on the LACOKI CL-01, which have nine programmable settings, including three color options and three brightness levels. When reading or working at night, this eye-friendly light protects your eyes by not emitting blue light. It is an excellent partner for studying at a desk or reading in bed because of its 1800mAh rechargeable battery, which lasts for up to 28 hours on low. It can be used for several purposes, including nursing light, bedside lighting, and even as a portable desk lamp, thanks to its flexible neck and sturdy clip.

When you travel, turn off the safety switch to prevent power loss due to accidental touch

WHAT'S IN THE BOX

- LED Reading Light
- USB Cable
- user Manual

FEATURES

- **Nine Distinct Configurations**: There are nine possible combinations for personalized lighting thanks to the three color options (Warm, White, Warm + White) and brightness settings (High, Medium, Low).
- **28 LEDs**: Clearer lighting and more consistent brightness are provided by the 28 LEDs and 28 LED beads.
- **Touch Control**: Easy mode and brightness level change is made possible by simple touch controls.
- **Eye Protection**: By simulating natural diffuse light, the circular lamp head lessens glare and eye strain while shielding the eyes from blue light.

EYE-PROTECT

Circular Lamp Head Design, Simulating Natural Light

The natural light reflected from all directions to the eye, soft and not glare, called the principle of diffused light. The light is repeatedly refracted, enter the eye is more uniform, clearer vision, better protect eyes. Other reading light lines direct the eyes from a single source, prolonged exposure to such source will cause eye fatigue

- Light Source
- Circular Light Guide Plate
- → Primary Refraction
- ····· Secondary Refraction

- **Rechargeable**: Long hours of continuous illumination are provided by the integrated 1800mAh rechargeable battery.
- **Fast Charging**: Three hours of fast charging ensures that the illumination is immediately usable.
- **Adjustable Brightness**: For varying lighting requirements, select between 30%, 60%,

or 100% brightness.

- **Heavy-Duty Clip**: This sturdy clip, which has a cushioned surface to avoid scratches, firmly fastens to tables, books, furniture, and other surfaces.
- **Flexible Neck**: The light may be positioned precisely where it is needed by bending and twisting the flexible neck.
- **Small & Portable**: This device is lightweight and portable, making it ideal for use in a variety of settings.
- **Versatile Use**: Perfect for nursing, reading, night illumination, bedside lighting, and desk lamps.
- **Silent and Flicker-Free**: There is no glaring lighting, flickering, or buzzing, creating a calm, distraction-free atmosphere.
- **Battery-Powered**: This device does not require a steady power source because it is powered by a rechargeable battery.

10-12 Hours 60% Brightness
25-28 Hours 30% Brightness

WHILE CHARGING

FULLY CHARGED

- **Energy Efficient**: It is an energy-efficient lighting solution because it uses only 3 watts of power.
- **No Requirement for External Cords**: When charging, the USB charging feature does away with the requirement for external connections.

SETUP GUIDE

- **Unpack the Light**: Take the light out of the box and make sure all the parts are there.
- **Charge Before Use**: Before using the light for the first time, plug it into a USB port and let it charge for three hours.
- **Attach the Clip**: For convenient use, firmly fasten the light to a desk, headboard, or book.
- **Turn on the Power**: To begin the charging process, make sure the light is turned on.
- **Turn on Touch Controls**: To change the brightness and switch between color modes, touch the control panel.
- **Choose Your Favorite Color**: Warm, white, or a combination of the two light hues.

- **Set Brightness Level**: Depending on your surroundings, set the brightness to high, medium, or low.
- **Position the Neck**: To focus the light where it's needed, bend and twist the flexible neck.
- **Set on Furniture**: If the light isn't fastened to a surface, you can also set it on nightstands or tables.
- **Verify the Charging Status**: It usually takes three hours for the light to fully charge, at which point it is ready for use.
- **Use for Various Purposes**: Modify the settings based on your task, such as working, reading, or unwinding.
- **Use as a Nightlight**: To create a soft nightlight effect, turn the brightness down.
- **Place on Wall** : For hands-free lighting, place the light on a wall using the clip.
- **Use as a Desk Lamp**: For task lighting, attach it to a shelf or desk edge.
- **Travel-Friendly**: For portable, adaptable lighting wherever you go, bring the light with you on vacation.

CARE & MAINTENANCE

- **Charge Frequently**: To preserve battery health and guarantee correct operation, charge the light on a frequent basis.
- **Clean the Surface**: Wipe the lamp's body and clip with a gentle cloth. Steer clear of abrasive items.
- **Avoid Direct Water Exposure**: To prevent electronics damage, keep the light away from water.
- **Store Correctly**: To prevent overheating, store in a cool, dry location while not in use.
- **Examine the LED Panel for Dirt**: To guarantee optimal light output, wipe the LED beads with a microfiber cloth.
- **Avoid Overcharging**: To avoid battery deterioration, disconnect the light as soon as it is fully charged.
- **Prevent Dropping**: Use caution when handling to prevent harm to the flexible neck, clip, or LED parts.
- **Do Not Force the Neck**: Instead, bend it gradually and refrain from pushing it in unbending directions.
- **Choose the Correct Charging Cable**: To prevent harming the charging port, only

use the included USB cable for charging.

- **Check Battery Life**: The battery may need to be replaced if it isn't holding up as well as it should.
- **Replace Battery if Necessary**: Swap out the battery for a compatible 1800mAh rechargeable battery if the old one is no longer able to hold a charge.
- **Avoid High Temperatures**: Keep the light away from hot surfaces such as heaters and direct sunshine.
- **Verify Clip Tightness**: To prevent sliding when in use, make sure the clip is firmly fastened.
- **Regularly Examine for Wear**: Look for indications of wear and tear on the base, clip, and neck.
- **Switch Off When Not in Use**: Switch off the light when not in use to conserve battery life and prolong its lifespan.

TROUBLESHOOTING

Issue	Possible Cause	Solution
The light is not turning on	The battery is dead or not charged	Recharge the battery for at least 3 hours before use
Flickering or dim light	Low battery or high brightness setting	Charge the light or lower the brightness level
Not holding a charge	Faulty battery or charger	Try a different charger or replace the battery
Touch control is not working	Dirty touch surface or malfunction	Clean the touch panel and ensure proper connection
Clip not securing to furniture	The surface is too thin or slick	Ensure the surface is thick enough and adjust clip for a tighter fit
Light not staying in place	The neck is too loose	Tighten the flexible neck until it holds the light in position

Issue	Possible Cause	Solution
Charging time is too long	Using a low-power charging adapter	Use a higher wattage USB charger for faster charging
No light after charging	An incorrect charging cable was used	Ensure the correct charging cable is being used
No colour change when selecting mode	Faulty touch control or internal wiring	Reset the light and try again or contact support
Light dims after prolonged use	Battery depletion or malfunction	Fully recharge and test with lower brightness levels

PROS & CONS

PROS

- 9 adjustable settings for personalized brightness and color
- Eye protection with no blue light to reduce strain
- Rechargeable battery provides long hours of usage
- Flexible neck to direct light exactly where needed
- Heavy-duty clip securely attaches to furniture without damage

CONS

- Not waterproof for outdoor use
- Clip might be too tight for very thin surfaces
- Requires USB charging, so a power outlet is needed
- Some users may find the clip bulky
- Takes 3 hours to fully charge

WARRANTY

The LACOKI CL-01 Rechargeable LED Reading Light comes with a **1-year warranty** covering defects in material or workmanship. Additionally, the manufacturer offers

lifetime technical support, and customer service is available for troubleshooting, replacement parts, or product guidance. In case of any issues, users can reach out to the customer support team for assistance.

FREQUENTLY ASKED QUESTIONS

What are the key features of the LACOKI CL-01 Rechargeable LED Reading Light?

The LACOKI CL-01 Rechargeable LED Reading Light offers 9 different settings with 3 color modes and 3 brightness levels. It features a touch control system, eye protection, a rechargeable 1800mAh battery, and a flexible neck for adjustable positioning.

How long does the LACOKI CL-01 Rechargeable LED Reading Light battery last on a full charge?

The LACOKI CL-01 light offers up to 3-5 hours on high brightness, 10-12 hours on medium brightness, and 25-28 hours on low brightness with its 1800mAh rechargeable battery.

How do I adjust the brightness and color on the LACOKI CL-01 Reading Light?

The LACOKI CL-01 allows you to adjust brightness and color using touch control. There are 3 color modes (Warm light, White light, and Warm & White light) and 3 brightness levels (High, Mid, Low), giving you 9 possible settings.

How do I charge the LACOKI CL-01 Rechargeable LED Reading Light?

The LACOKI CL-01 is equipped with a built-in 1800mAh rechargeable battery. Simply connect the included USB cable to a power source. It takes approximately 3 hours for a full charge.

How long does it take to fully charge the LACOKI CL-01 LED Reading Light?

It takes about 3 hours to fully charge the LACOKI CL-01 light. Once charged, the lamp can provide up to 28 hours of use on its lowest brightness setting.

How can I prevent the LACOKI CL-01 LED Reading Light from overheating?

To prevent overheating, make sure the light is placed on a flat, stable surface and avoid prolonged use at high brightness for extended periods. The light's design ensures it remains safe under normal usage.

What type of batteries does the LACOKI CL-01 Reading Light use?

The LACOKI CL-01 uses a built-in 1800mAh rechargeable battery, which is included with the lamp. Theres also a backup AAA battery included for emergency use, but the primary power source is rechargeable.
