41023 ParagonX Input Map System

QUICK START GUIDE

1. Unpack and inspect all items.
2. Install Polygraph Pro Suite software. Current versions are available via download from our website.
<https://lafayettepolygraph.com/software>
3. Launch Polygraph Pro Software. Upon initial launch, the software will prompt you for a password. There is no default password; enter the password of your choice and click ok.
Note: Once you have entered the software you will not be prompted to enter the password again.
4. Using the provided USB Cable, connect to the computer (with software installed) via the USB output located on the back panel of the ParagonX.
Note: The USB Indicator will be lit once a USB connection is made.
5. Verify connectivity between the software and the ParagonX.
