Settings	Touch the icon
View files	Touch the icon
Switch between displays	Hold down the MODE button
Return back	Touch the icon <

USING THE CAMERA FOR THE FIRST TIMF

A Insert the microSD card into the camera as shown (connectors toward the lens)

- Press the lock button at the bottom of the camera. Slide the door outwards and open it.
- Insert the card only when the camera is turned off and not connected to the computer.
- Format the card directly in the camera itself the first time you use it.
- We recommend memory cards with a higher write speed (UHS Speed Class – U3 and higher) and a maximum capacity of 256 GB.
- **Note:** Only use microSDHC or SDXC cards from reputable manufacturers. Generic cards do not guarantee the proper functioning of the data storage.

B Connecting the camera to the power

- You can charge the camera either by connecting it to a computer or using an optional AC adapter.
- It takes approximately 4.5 hours to charge the battery from 0 to 100 %. The charge indicator turns off after charging.
- **Note:** Charging the battery from 0 to 80 % takes 2.5 hours.

WIFIAPPLICATION

Thanks to the mobile app, you will be able to change camera modes and settings or view and download recorded videos and photos directly to your mobile device.

A Scan the QR code to download the application.
B Install the application on your mobile device.
C Turn on WiFi on the camera by swiping down and then touching the WiFi icon.
B On your mobile device, connect to the WiFi network with the camera's name. The WiFi password is displayed on the camera screen (factory setting is 12345678).
