LANCOM Systems GS-3528X Multi Gigabit Ethernet Access Switch

Installation Steps

Configuration interface (Console)

- Connect the configuration interface via the included serial configuration cable to the serial interface of the device you want to use for configuring / monitoring the switch.

TP Ethernet interfaces

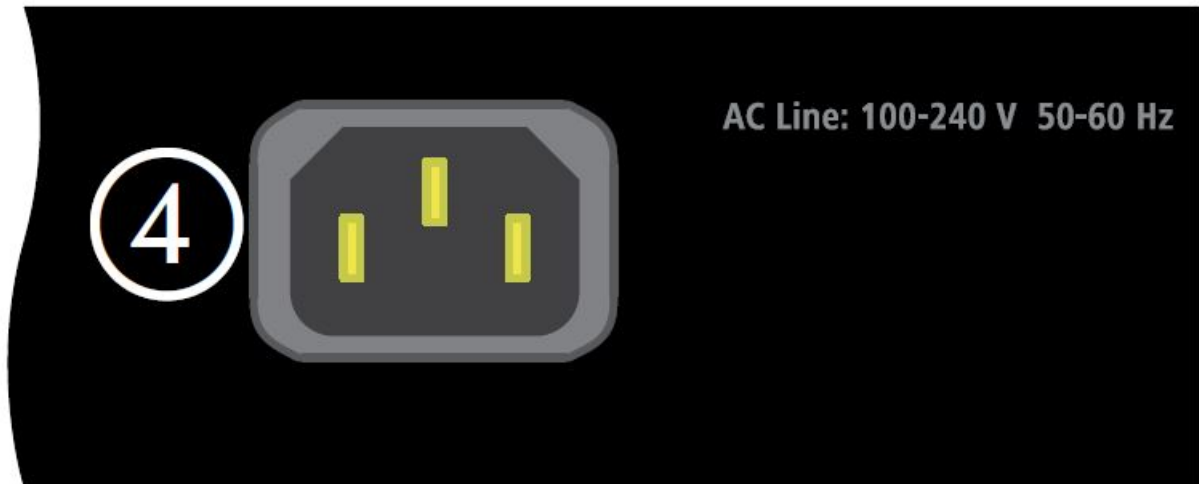

- Use Ethernet cables to connect the interfaces 1 to 24 to your PC or a LAN switch.

SFP+ interfaces

- Insert suitable LANCOM SFP modules into the SFP+ interfaces 25 to 28. Choose cables which are compatible with the SFP modules and connect them as described in the module's documentation.

Power connector (device back side)

- Supply power to the device via the power connector. Please use the IEC power cable supplied or a country-specific LANCOM Power Cord.

Please observe the following when setting up the device

- The mains plug of the device must be freely accessible.
- For devices to be operated on the desktop, please attach the adhesive rubber footpads.
- Do not rest any objects on top of the device and do not stack multiple devices.
- Keep the ventilation slots on the side of the device clear of obstruction.
- Mount the device into a 19" unit in a server cabinet using the provided screws and mounting brackets

Before initial startup, please make sure to take notice of the information regarding the intended use in the enclosed installation guide! Operate the device only with a professionally installed power supply at a nearby power socket that is freely accessible at all times
