LANCOM Rack Mount Plus

Product Information

The LANCOM Rack Mount Plus is a mounting adapter designed for 19-inch racks. It allows for the secure installation of LANCOM devices in a rack setup.
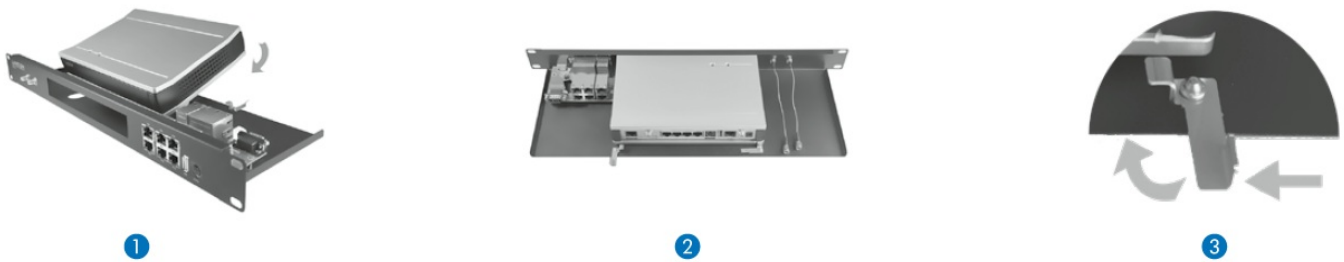

Product Usage Instructions

1. Use the rear angle brackets provided to fix the LANCOM device in the mounting adapter. Ensure that the device is securely attached.

2. Connect the ports of the LANCOM device with the corresponding ports of the Rack Mount Plus using the cables supplied. Make sure to establish proper connections.

3. For mounting in a 19-inch rack, use the enclosed screws. Position the Rack Mount Plus in the desired location within the rack and secure it firmly.

4. Ensure that there is sufficient ventilation around the LANCOM device and leave a distance to other 19-inch

devices whenever possible. This helps prevent overheating and ensures optimal performance.

5. Refer to the appropriate product specifications sheet for the permissible operating temperature range of your LANCOM product. Adhere to these temperature limits to avoid any potential issues.

Mounting instructions

Explanations

- Use the rear angle brackets for fixing the LANCOM device in the mounting adapter.
- Use the cables supplied to connect the ports of the device with the corresponding ports of the Rack Mount Plus.
- Use the enclosed screws for mounting in a 19" rack

Notes

- Always ensure sufficient ventilation and leave a distance to other 19'' devices, if possible.
- The permissible operating temperature range for your LANCOM product can be found in the appropriate product specifications sheet.
