SETUP INSTRUCTIONS

- Plug controller USB cable to a free USB port on a Windows based computer.
- The computer should detect the controller and automatically setup basic drivers for use.
- Once the drivers are finished installing you can check the controller has been setup in the "Bluetooth & Other Devices" tab under "Settings".

- Next open a gaming application such as Steam, Epic Games Store, Xbox Game Pass etc.

- The controller does not need any calibration, but you can configure it using the individual App's Controller Settings option.

TROUBLESHOOTING

My PC cannot detect the controller.

- Go to Settings > Devices and check if your PC has installed the controller under "Other Devices".
- Try another USB port on your PC.
- Try the controller on another PC.
- Check you are using one of the following Windows versions: XP, Vista, 7, 8, 10 & 11.

Where can I download the drivers?

- This device is plug-and-play only. No drivers are required.
