- Use an exact knife to cut the bits connecting the parts to the frame.

- Most joints are press-fit, but some joints might require a drop of glue to ensure a strong bond.

- Remove the parts from the frame with a rotating motion along the axis formed by the bits you just cut.

- Press the parts together or use a hobby hammer with slight force to assemble them.

Use wood glue for assembly

Assembly

- Some parts might look different than in the assembly instructions, with added decorations/engravings/embellishments.
- Color variations or branch marks are a natural part of the birch plywood
- The burnt smell of wood is natural and will dissipate with time.
- Rarely the laser will not cut through the complete sheet, but this can be fixed with the help of a hobby knife. If that is not possible, please contact us for a replacement!
