LATICRETE AIA-09 Surface Preparation

Product Information

- **Product Name:** AIA-09 Surface Preparation
- **Provider:** LATICRETE International, Inc.
(J-037)
- **Program:** Surface Preparation
- **Program #:** AIA-09
- **Credits:** 1 LU Hour
- **SD:** YES
- **HSW:** Yes

Description: This educational seminar provides architects and specifiers with information on proper surface preparation for tile and stone installations. It outlines different acceptable substrates and defines the minimum standards required for a successful tile and stone installation.

Learning Objectives:

1. Identify acceptable substrates for tile and stone installations.
2. Know how to prepare the substrate for tile and stone.
3. Understand how the substrate can affect the finished tile and stone appearance.
4. Identify unacceptable substrates.

5. Know where to access resources for innovative design and specification information.

Approach: The program utilizes a PowerPoint presentation that incorporates photo images, project installations, and computer animation. The program encourages questions throughout and includes a dedicated question-and-answer period at the end.

A/V Needed:

- Electric power
- A screen, video system, or blank wall for the PowerPoint presentation
- The CES facilitator will provide the laptop and projector.

Target Audience: Architects, Engineers, Specifiers, Owners, and other Design Professionals in the commercial, residential, and industrial markets.

Facilitator Qualifications: CES facilitators receive in-house training on CES guidelines and presentation skills. They have extensive construction industry experience and up to 25 years in the tile and stone industry.

Cost: Not Applicable. There is no fee for bringing this program into a firm or chapter meeting.

Product Usage Instructions

The AIA-09 Surface Preparation program is designed to provide architects and specifiers with information on proper surface preparation for tile and stone installations. To make the most out of this educational seminar, please follow the instructions below:

1. Ensure you have access to an electric power source.
2. Set up a screen, video system, or a blank wall for the PowerPoint presentation.
3. The CES facilitator will provide the necessary laptop and projector for the presentation.
4. Pay attention to the PowerPoint presentation, which incorporates photo images, project installations, and computer animation.
5. Throughout the program, feel free to ask questions and engage in interactive discussions.
6. At the end of the program, there will be a dedicated question-and-answer period.
7. Make sure to take notes and actively participate to enhance your learning experience.

This program is targeted toward architects, engineers, specifiers, owners, and other design professionals in the commercial, residential, and industrial markets. It is recommended to attend this educational seminar if you are involved in tile and stone installations or have an interest in learning about proper surface preparation techniques.

Description

This educational seminar will provide architects and specifiers with information on proper surface preparation for tile and stone. Outline different acceptable substrates and define the minimum standards required for a successful tile and stone installation.

Learning Objectives

At the end of the program, the participant will be able to:

1. Identify acceptable substrates for tile and stone installations.
2. Know how to prepare the substrate for tile and stone.
3. Know how the substrate can affect the finished tile and stone appearance.
4. Identify unacceptable substrates.
5. Know where to access resources for innovative design and specification information.

Approach:

A PowerPoint presentation that incorporates photo images, project installations and computer animation will be used. There will be a questions and answer period at the end of the program, however, the program is designed to be interactive, and questions are encouraged throughout as well.

A/V Needed:

Electric power and a screen, video system or blank wall for the PowerPoint presentation. (The CES facilitator will provide the laptop and projector).

Target Audience:

Architects, Engineers, Specifiers, Owners, and other Design Professionals in the commercial, residential, and industrial markets.

Facilitator Qualifications:

The CES facilitators receive in-house training on CES guidelines and presentation skills. All have extensive construction industry experience and up to 25 years in the tile and stone industry.

Cost:

Not Applicable. There is no fee for bringing this program into a firm or chapter meeting.
