Disclaimer:

1. This mobile phone has a health feature that calculates heart rate and blood pressure rate.
2. The health feature incorporated in the mobile phone is only for assistance in measuring the well-being of the user and not a substitute of medical equipment (such as heart rate calculator and sphygmomanometer). Before acting upon the result based on the mobile phone, user may resort to medical practitioner for professional check-up. While all efforts are made to provide accuracy in the results, it is subject to technical configurations of the sensor.
3. The recommendation is as per ACC/AHA.
