Warm Tips

Since this product was designed for kids, we recommend shooting outdoors in bright light

Does this camera need to be charged prior to first use?

– Yes, we suggest you fully charge the camera before use.

After putting in the Micro SD card and everything else, it still says card error and what should I do?

– Please make sure your card is class 10 U1 32GB card, and put it in the slot again, if it still can't work, please contact the seller for help.

The camera freezes up and can't turn off, what can I do next?

– Please remove the battery, then install the battery again and turn the camera on, format SD card.

What is the best shooting distance?

– Since this camera is a fixed focus lens and cannot be replaced, the best shooting distance is 3.3 feet away. Please note that this camera cannot autofocus.
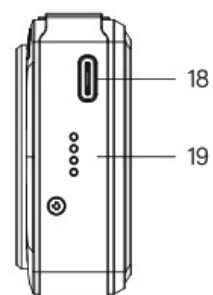

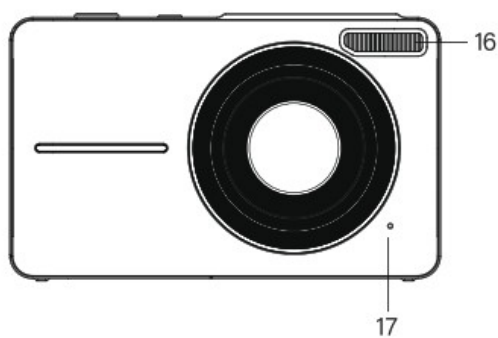

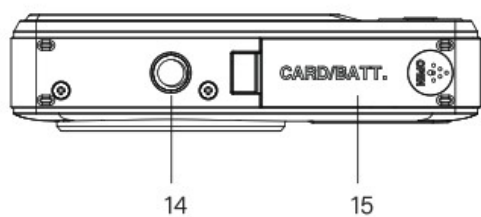

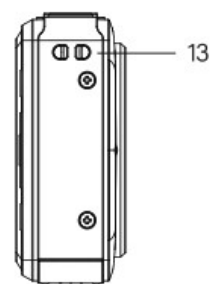

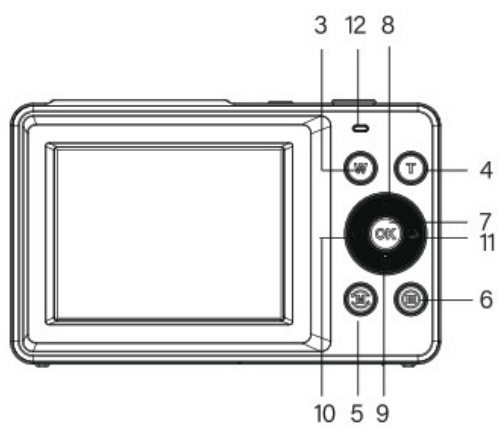

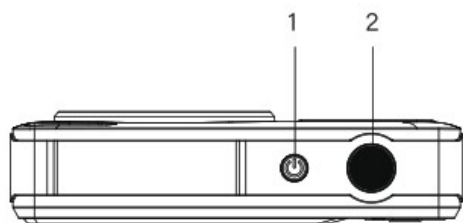

Important Battery Safety Tips

For your better experience with this product, please pay attention to the following safety tips
If the battery pack is mishandled, the battery pack can burst, cause a fire, or even chemical burns. Observe the following cautions.

- Do not disassemble.
- Do not crush and do not expose the battery pack to any shock or force such as hammering, dropping, or stepping on it.
- Do not short circuit and do not allow metal objects to come into contact with the battery terminals.
- Do not expose to high temperature above 60°C (140°F) such as in direct sunlight or in a car parked in the sun.
- Do not incinerate or dispose of in fire.
- Do not handle damaged or leaking lithium ion batteries.
- Be sure to charge the battery pack using a genuine battery charger or a device that can charge the battery pack.
- Keep the battery pack out of the reach of small children.
- Keep the battery pack dry.
- Replace only with the same or equivalent type recommended by seller.
- Dispose of used battery packs promptly as described in the instructions.
