LEDGER

LEDGER Nano X Cryptocurrency Hardware Wallet

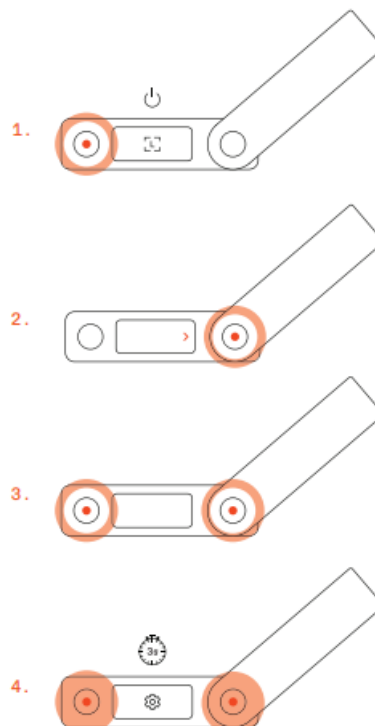

GET STARTED

The Ledger Nano X securely stores the private keys that provide access to your crypto assets.

- To set up your device, follow the instructions at ledger.com/start
- Charge your device before the first use by connecting the USB cable to a power source.

BASIC ACTIONS

Refer to the drawings on the first page.

1. Press the left button shortly to power on your device.
2. Press the left or right button to browse through menus and lists.
3. Press both buttons simultaneously to validate a selection.
4. Press and hold both buttons anytime to access the settings, to power off and more.
