ledscom de LC-L-316 Clamp Light

Product Information

Specifications:

- **Model:** LC-L-316
- **Voltage:** 230V ~50Hz
- **Protection Class:** II (two)
- **Protection Class:** IP20
- **Bulb Type:** E27, max 60 watts

Product Usage Instructions

Safety Instructions:

Operate the product only when it is working properly. In case of a fault, follow these steps:

1. Do not touch the product.
2. Turn off the product at an external switch.
3. If the product does not work properly, smokes, overheats, or smells burnt, do not operate it until repaired by an authorized electrician.

Intended Use:

Ensure the following for safe and effective use:

- Operate at 230V ~50Hz.
- Connect according to Protection Class II (two).
- Use in accordance with Protection Class IP20.
- Operate firmly mounted on stable ground.
- Avoid strong mechanical stresses and do not modify the product.
- Operate only with E27 bulbs up to 60 watts.

Maintenance & Care:

Protect the product from environmental influences like high salt content and cleaning chemicals. Follow these maintenance steps:

- Disconnect from power before cleaning.
- Clean regularly with a slightly damp, lint-free cloth.

Storage:

Store the product in a dry place, protected from contamination and mechanical stress. After damp or dirty storage, have it checked by an authorized electrician before use.

Please read these installation instructions carefully before installing this product and keep them for future reference.

SAFETY INSTRUCTIONS**safety instructions Operate the product only when it is working properly.**

In the event of a fault, do not touch the product.

Immediately turn off the product at an external switch. In the event of contact or continued operation in the event of a fault, there is a danger to life due to burns, electric shock or fire.
