**Leguwu-Direct T821 Bluetooth In-Car Speakerphone**

Thanks for choosing this Bluetooth in car Speakerphone from Leguwu Direct . It is specially designed for safe driving, easy to call out and answer incoming calls while driving. It has clear and loud sound, so you can hear phone talking or music or GPS navigation clearly even though you are in noisy downtown or on highway. The most important is that it keeps your eyes and attention on the road when driving to keep safe. Please read below user manual carefully before using it.

### Unit Picture & Button Description

### Operation

#### 1. Charge your Bluetooth In car Speakerphone

Make sure that your Bluetooth in car speakerphone is fully charged before you start selling it. Please use micro USB cable to charge it. When the LED is red, it's charging. When the LED light turns off, it's fully charged. (Some will show solid blue when fully charged) When it's with low battery, it will have voice prompt of "Battery Low". Please charge the unit when you hear voice prompt to ensure this Bluetooth in car speakerphone work

well.

## 2. Turn on your Bluetooth in-car Speakerphone

Please toggle ON/OFF button to turn on/turn off the speakerphone.

## 3. Pairing it with your phone:

When using this device first time, you need to pair it with your cell phone

1. Turn on the device, you will hear the voice "Pairing";
2. Activate the Bluetooth Function of your phone and search Bluetooth signals
3. Select pairing name "T821" on your phone, and click it to pair (some mobile phones require entering password "00 00"). When pair successfully, you can hear the voice prompt "CONNECTED".

**NOTE:** If not paired successfully first time, please turn off then turn on the device to repeat above steps for pairing.

### Connecting To Phone 2

This device supports to connect 2 phones simultaneously on working. If you want to connect it to another Bluetooth Enabled phone, please follow up below steps:

- Cut off the 1st mobile phone Bluetooth function to disconnect with this device;
- Turn off and turn on the device again;
- Follow the steps above of connection with 1st phone and pair it with 2nd phone
- Turn on your 1st phone Bluetooth function and click T821 to pair it.
- **NOTE:** After switch on/off, the device will automatically connect with above 2 connected phones.

## 4. Support Multiple Languages:

This speakerphone supports English/French/Spanish/Chinese voice prompt. Please turn off the device and turn it on, then press the volume button "++" and "--" at same time to switch languages. You will hear voice.

## 5. Answer / Reject / End Up Phone Calls:

When phone rings, press the calling button once to answer call; Press calling button again to end up talking. Long press the calling button for 3 seconds to reject calls.

## 6. Redial Last Calling Number:

When speakerphone is on, shortly press the calling button twice to redial last call number.

## 7. Volume Control

Press the volume button on the speakerphone to increase or decrease the volume.

## 8. Play music

When speakerphone is on standby mode, shortly press calling button once to play music, and long press the button +/ to switch the songs.

## 9. Activate Siri Google assistant

On standby mode, long press calling button for 3 seconds then release it to activate Siri or Google assistant (Your phone should support Siri or Google assistant function)

## 10. AUTO POWER

This Bluetooth car speakerphone has built in motion sensor, so it could turn on automatically when it senses shocking. Please clip it on your sun visor. When you leave your car, you don't need to turn it off by switching the ON/OFF button. Just leave it there. It will turn to sleep mode after it disconnects with your phone for about 5 minutes. Then when you come back, get in your car, open and close your car door, it will sense your car shocking, then it will turn on and re connect with your phone automatically.
