Multi-port connectivity for various external devices.

Installation and Usage

1. **Connecting Devices**

Use a USB data cable to connect the host interface to the computer's USB port. Plug peripherals (such as keyboard, mouse, printer) into the output ports of the USB Switch. Connect the charging cable to the power supply port.

2. **Switching Operation:**

Button Switching: Press the physical switch button on the device to select the target host.

Precautions

1. Avoid frequent plugging and unplugging of devices to extend the lifespan of the ports.
2. If peripherals are not recognized after switching, check the data cable connections or reconnect the devices.
3. Some high-power peripherals may require additional power support.

Customer Support

If you need assistance, you can contact us at any time by following these steps:

1. Log into your account and go to "Your Orders."
2. Select "Order Issues" next to the relevant order.
3. Send us a message via "Contact Seller."
4. If you encounter issues while using the product, please contact technical support at support@lemorele.com for further assistance.

FAQs and Solutions

The device is not recognized after switching.

Ensure the data cable is securely connected; if necessary, reconnect the device.

The transfer speed is slow.

Check if the USB port is functioning normally.

The peripheral is not working properly.

Check if the correct port needs to be switched.
