Connection Diagram

Product Specification

- Input side: USB-C male connector.
- Output end: 3x USB 3.0 female interface; 1 x HDMI interface; 1 XUSB C (Type-C) charging interface.
- USB Specifications: USB A Standard and USB 2.0/ USB 1.1 compliant downwards.
- HDMI: HDMI2.0, with the support resolution of up to 4K 30Hz; it supports replication (same screen) mode and expansion mode.
- USB C power supply interface: It supports Power Delivery3.0 one-way fast charging and can quickly charge the computer/mobile phone/tablet. It supports the fast charging power up to 100W.
- Support systems such as Mac OS/Windows.

Precautions

1. PD power supply function, which requires a standard PD power adapter to power the product and charge the computer, only supports one-way power supply. The PD power interface does not support data transmission and does not support audio and video transmission.
2. When the mobile U disk/hard disk needs to be removed after the product is used, please first perform the safe removal operation on the computer and then pull out.
Do not forcibly pull out, so as to avoid errors, damage or loss of data or disk.
3. If your device needs to copy or expand the content to other displays through this product, please ensure that the USB C interface on your device supports the audio and video transmission function.
4. When the prompt "Current overload" appears and cannot be used, please restart the computer and connect PD before connecting other interface.
