Lenovo Commercial Vantage Installing With Missing Menus

Product Information

Specifications

- **Model:** Commercial Vantage 10.2407.66.0
- **Features:** Smart Care integration, Smart Modes integration, Power Controller addition, Display Brightness Control, Intelligent cooling update, System Update enhancements
- **ADMX Group Policies:** GenericMessagingAddin, LenovoAuthenticationAddin, LenovoCompanionAppAddin, LenovoSystemUpdateAddin, MultimediaAddin, ThinkKBDAddin, ThinkSmartSenseAddin, ThinkSpectrumAddin, VantageCoreAddin

Product Usage Instructions

Power Management
To manage power settings, navigate to the Power page. Here you can control the Power Controller, adjust Display Brightness, and access the System Total power management section.

System Update
To update the system, go to the System Update section. You can choose between Manual and Auto update filtering policies. IT admins can also control the update process via command line.

ADMX Group Policies
The ADMX Group Policies provide additional functionalities with changes and upgrades to various add-ins such as GenericMessagingAddin, LenovoAuthenticationAddin, and more. Check the specific version upgrades for each add-in.

FAQ

- **How do I access the Smart Care integration feature?**

  Smart Care integration can be accessed through the main menu under the Smart Care option.

- **What is the purpose of the Intelligent cooling update?**

  The Intelligent cooling update enhances cooling functionality for CS24 products or later models to improve overall system performance.

- **How can I enable the new ADMX Group Policies?**

  The new ADMX Group Policies can be enabled through the settings menu where you can find options to configure policies for different add-ins.
