Parts overview

1. Battery compartment cover
2. Battery compartment
3. RESET button
4. Channel switch (1—3)
5. LED indicator

Getting started

- Open the battery compartment cover (1). Set the desired channel with the switch.

NOTE! Each remote sensor that is to be connected must be operated on a different channel. If only one remote sensor is connected, it should be operated on channel 1. The Levenhuk Wezzer LS30 Sensor has only one channel.

- Insert 2 batteries according to the correct polarity. Close the cover.
- To re-establish the sensor connection manually, press RESET using a pin.

Sensor connection

- Place the base station and the remote sensor within the effective transmission range. Ensure that the channels are assigned after you set up the power supply for the base station and all the sensors.
- If the values are not received from a channel, check the batteries and try again.
Check if there is any source of interference.
- When changing batteries, replace the batteries first in the base unit, and then in all the sensors, to re-establish the connection. If an adapter supplies power to any of the devices, briefly disconnect the power to that device when replacing the batteries. If you change the batteries only in one of the devices (for example, in the sensor), the signal may not be received correctly.
- The effective range may differ depending on the unit's position. Due to interference (various remote control devices, etc.), the maximum distance between the base unit and the sensor may be significantly reduced. In such cases, we suggest moving the base unit and sensor a little. Sometimes it is enough to move one of these units a few inches!

NOTE! Although the sensor is weather resistant, never place it in direct sunlight or in the rain or snow.

Care and maintenance

Take the necessary precautions when using the device with children or others who have not read or who do not fully understand these instructions. Do not try to disassemble the device on your own for any reason. For repairs and cleaning of any kind, please contact your local specialized service center. Protect the device from sudden impact and excessive mechanical force. Store the device in a dry cool place. Only use accessories and spare parts for this device that comply with the technical specifications. Never attempt to operate a damaged device or a device with damaged electrical parts! If a part of the device or battery is swallowed, seek medical attention immediately. Children should use the device under adult supervision only.

Battery safety instructions

Always purchase the correct size and grade of battery most suitable for the intended use. Make sure the batteries are installed correctly with regard to polarity (+ and –).

Never short-circuit batteries as this may lead to high temperatures, leakage, or explosion. Never heat batteries in order to revive them. Do not disassemble batteries.

Keep batteries out of the reach of children, to avoid risk of ingestion, suffocation, or poisoning. Utilize used batteries as prescribed by your country's laws.

Warranty: 6 months. For further details, please visit our web site: www.levenhuk.com/warranty

The manufacturer reserves the right to make changes to the product range and specifications without prior notice.
