Product description

Environmental noise cancellation

LEVN Noise Canceling Bluetooth Headset uses advanced ENC technology, it can block listeners from hearing your background noise by pre-computing environmental noise frequency band. No more awkward working remotely!

Two connection methods & wide compatibility

LEVN Bluetooth earbuds use Bluetooth 5.0 technology to support the connection of computers, mobile phones, phones and other Bluetooth devices. For devices without Bluetooth function, you can use the USB dongle that came with the device to connect. Connecting this PC headset to the computer via the USB connection method is more stable and there is no transmission delay.

Hands-free of MFB. Button

Levn Bluetooth 5.0 Thanks to the Headset MFB button, you can easily exit with the phone call. Headset MFB may not be compatible with   PC software. You need to answer incoming calls on the laptop. Wireless workspace -33 feet / 10 meters, device for a short time, call center, office, telecommunications, home, classroom, skype, zoom, VoIP, webinar, and webinar, and VOIP, webinar, Van.

Mute button

Our wireless Bluetooth headset supports mute function during calls. If you need to temporarily hang up the call, you can mute it to freely block your voice so that nothing can be heard by the listener's terminal. Note: The mute feature is only useful for phone calls.

## Long battery and exclusive charging base

This Bluetooth headset is equipped with a 350 mAh battery that provides continuous working time up to 35 hours and 110 hours of standby time. It provides a stable and long service for call center agents, employees, and remote truck drivers. In addition, this wireless headset comes with a plug and playback facility, you can use the Pogo charging base to download or use Cable C downloads for downloads.

How to connect levn Bluetooth headset to your PC?

Tips:
If you have any problems in use of the product, please feel free to contact us. *levn001@outlook.com*

Through USB dongle connection:

- Plug the USB dongle to the USB port of the computer and then wait until the computer processes it
- While the device is pairing the Led Indicator on the USB dongle will flash blue
- Then you have to press and hold on the multifunction button to enter the pairing mode. The indicator light on the usb dongle will flash blue and red consecutively and you will head a guidance voice saying 'pairing'
- Pairing of the device would be successful when you heard paired and now the led indicator flashes solid blue

Through Bluetooth connectivity:

- On your device, press and hold the MFB button of LEHS010 for 5 seconds to enter pairing mode, making it discoverable by the computer. the indicator flashes blue and red consecutively. You will hear the voice saying , "Pairing".
- On your PC, select Start > Settings > Bluetooth & other devices > Add Bluetooth or another device> Bluetooth > Click on the model number on the device. A window will appear that shows the Bluetooth connection is complete.

Sound settings

The headset's microphone and speakers may be disabled or not set as default devices on your computer.

- Right-click on the Speaker icon in the bottom right then click Open Sound Settings
- Select [LEHS010 Superior] as the output device (speaker)
- Select [LEHS010 Superior] as input device (microphone)
- Make sure that [LEHS010 Superior] is selected as both input and output Then close Settings.

Verdict

So let's start by saying it's really elegant. I like the look of it and it's wireless. The headset is quite light, comfortable and the call quality is very good. Plugging it in was easy and it seemed to have decent battery life and that seemed to be more than enough to get me through the day. Overall the headset is great.

PROS

- Great sound quality
- Noise-canceling
- Lightweight
- Adjustable headband
- Microphone feature
- Adjustable microphone
- Bluetooth connectivity
- Great battery life
- Volume control
- Toggle mute

CONS

- Inconsistent

FAQ'S

How to connect levn Bluetooth headset to your PC?

Plug the USB dongle to the USB port of the computer and then wait until the computer processes it.
While the device is pairing the Led Indicator on the USB dongle will flash blue.
Then you have to press and hold on the multifunction button to enter the pairing mode.

How to charge the earphones?

First connect the earphones with your phone via Bluetooth connection, then put it into charging box. The earphones will be charged automatically when it is in charging box.

Why is my Bluetooth not pairing?

For Android phones, go to Settings > System > Advanced> Reset Options > Reset Wi-fi, mobile & Bluetooth. For iOS and iPad OS device, you'll have to unpair all of your devices (go to Setting > Bluetooth, select the info icon and choose Forget This Device for each device) then restart your phone or tablet.

How do you reset wireless headphones?

Unplug the headphones from their charging port. Press and hold the power button for 10 seconds. Wait for the LED light to blink to indicate that you have successfully reset your headphones.

Why won't my wireless headphones turn on?

If the power on the headphones is not turning on, the battery may not be inserted correctly or the battery may need to be replaced. Check the following items to troubleshoot this issue.
IMPORTANT: If model-specific information is needed to complete any of the steps, refer to the instructions supplied with the product.

Why is only one of my wireless headphones working?

Check the settings
Headsets may play only in one ear depending on your audio settings. So check your audio properties and make sure that the mono option is turned off. In addition, make sure that voice levels are balanced on both earbuds.

Why Bluetooth headset is connected but no sound?

Ensure Media Audio is switched on
There is a setting within Android's operating system that allows you to set what audio is received by each connected device. You may find that Media Audio has been switched off for your headphones. This is how to check this setting: Open the [Settings] App on your device.

Does it have a mute?

Yes this headset features a mute button you can just simply press to mute the call
