**LEWISER Battery Operated Interactive Chickadee**

## INTRODUCTION

The LEWISER Battery Operated Interactive Chickadee is a cute and fun toy that is made to make both kids and pet owners happy. This cute chickadee is powered by batteries and reacts to touch and movement. It's a fun and interesting pet. At only \$9.99, it's a great deal for all the dynamic features it has. When it came out on August 11, 2023, this chickadee was made by LEWISER, a well-known brand that is known for making fun toys that make kids think. With measurements of 4.33 x 2.36 x 3.15 inches and a weight of only 2.12 ounces, the toy is small enough for little hands or pets to handle. The plush, soft material is safe and pleasant to touch, and the AA batteries make it last for hours of fun. If you want to give someone a one-of-a-kind gift or give your pet something fun to play with, this chickadee will keep them entertained for hours.

Weight	2.12 ounces
Date First Available	August 11, 2023
Manufacturer	LEWISER
Country of Origin	China
Battery Type	AA Battery
Material	Plush

**WHAT’S IN THE BOX**

- Battery
- Chickadee
- User Guide

**FEATURES**

- **Hanging Design:** This chickadee toy is made to be hung from door frames or handles. When your cat touches it, it will wiggle and fly back and forth, making for fun play.

## MATCH WITH CAT TEASER

Cat teaser stick is not included in the product.

- **Battery Operated:** It runs on AA batteries (not included) and keeps moving so your cat stays interested without you having to move the toy yourself.

## FREE SWITCH CHIRP CHICKADEE

Motor built-in, supports up to 10000 chirps.

Free switch design, one click closure, ensuring uninterrupted rest.

- **Chirping Mechanism:** It has a built-in chirping feature that sounds like a bird, which will appeal to your cat's natural urge to hunt.
- **Adjustable Elastic Rope:** The toy has an elastic rope that can be stretched from 3 feet to 6 feet (1.8 meters), so it can be placed in different ways and be used for interactive play.
- **Naturally Soft Plush and Feathers:** It's made of naturally soft plush and feathers, so it looks and feels like real food, which makes cats more drawn to it.
- The toy has a switch control system that lets you turn off the buzzing sound whenever you need to, so it won't bother your cat (or you).
- **Boosts Hunting Instincts:** The movement, singing, and feathers help boost your cat's natural instincts to hunt and pounce, which is good for its health.
- This toy helps your cat do both mental and physical tasks, which keeps them from getting bored and keeps them active.
- **Ideal for Indoor Cats:** This is a great way for indoor cats to play and burn off energy since they may not get as much natural excitement.
- **Stress Reliever for Cats:** This toy can help your cat feel less anxious and stressed by giving them something fun to play with and thinking about during the day.
- **Durable Construction:** The toy is made of materials that won't wear down quickly, so it can be played with over and over again without breaking.

- **Perfect for Multiple Cats:** The toy can keep multiple cats entertained at the same time because it can move in many ways and catch their attention from all sides.
- The toy is easy to hang and move around because it only weighs 2.12 ounces. It's also not too heavy for the door frame or handle.
- **Versatile Play:** The chickadee toy is responsive and can be hung from door handles, hooks, or frames, giving your cat a lot of different ways to play with it.
- **Reasonable Price:** At \$9.99, it's a cheap way to keep your cat entertained with a long-lasting, high-quality interactive toy.

## SETUP GUIDE

- **Remove carefully:** Open the box and check that all of the parts are still together. This includes the toy, the feathers, and the stretchy rope.
- **Putting in Batteries:** Put AA batteries in the battery box. Make sure that the batteries are put in the right way, with the right voltage.
- **Test the Toy:** Once the batteries are in, turn the toy on and listen for sounds and movement to make sure it works right.
- **Attach to Door Frame:** Use a door frame, handle, or any other strong surface that can hold the length of the stretchy rope to hang the toy.
- You can change the length of the rope by stretching it from 3 feet to 6 feet. This will depend on how far you

want the chickadee to fly and how much room your cat has to play.

- **Putting the Toy Down:** Put the toy down somewhere your cat is likely to see it, like near their favorite place to rest or play.
- **Buzzing:** Press the switch to turn on the buzzing sound. You can also press the switch to turn it off if you'd rather play quietly.
- **Secure Hanging Point:** Make sure the elastic rope is tightly connected to the hanging point so it doesn't come off while you play.
- **Watch the First Play:** When your cat plays with the toy for the first time, make sure they like how it moves and sounds.
- **Change the Hanging Height:** If you need to, change the toy's height to fit your cat's jumping and pouncing skills.
- **As a teaser:** Gently pull or tug on the stretchy rope to make the toy move around more, making it look like prey.
- **Combine with Other Toys:** Keep your cat fully engaged by putting other toys close that it can play with.
- **Playing Interactively with Owner:** You can play with your cat by using the toy with other cat teaser items, like rods or sticks.
- **Safe Distance:** Keep your cat away from the toy when it's not being played with to keep it from getting chewed on or damaged by chance.
- **Option to be recharged (if available):** If the model can be recharged, make sure to do so between play sessions.

## CARE & MAINTENANCE

- **Clean It Regularly:** Use a wet cloth to wipe down the plush and feathers every so often to keep the toy clean and free of fur and dust.
- **Check for Damage:** Check the feathers and stretchy rope for damage every so often. If they get worn or broken, you should get new ones.
- **Maintenance for batteries:** Take the batteries out of the toy when not in use for a long time to stop them from leaking or corroding.
- **Change the Batteries:** If the toy stops moving or making noise, the AA batteries need to be changed to make sure it works at its best.
- **Safely Store:** Keep the toy in a safe, dry place when not in use to keep it from getting broken or lost.
- **Avoid Water:** Keep the toy away from water or damp places to keep the internal parts and battery area from getting damaged.
- **Care for Feathers:** If feathers start to lose their shape or color, you can either replace them with new ones of the same size or clean them gently with a soft brush.
- **Don't Use Too Much Force:** If you pull the toy too hard, you could damage the feathers or the stretchy rope.
- **Use Moderately:** The toy is a great way to get your cat to exercise, but don't leave it on all the time to save battery life and keep your cat from getting too excited.
- **Clean the Rope:** Fur or dust can get stuck in the stretchy rope. You can clean it by wiping it down gently or using a lint brush to get rid of dust and dirt.
- **Check for Loose Parts:** Before playing, make sure that all the parts are firmly attached, including the feathers and rope, so that no one can choke on them.
- **Stop Chewing:** Keep an eye on how your cat plays with the toy and stop them if they start chewing on the rope or other parts of it.

- **Feather Replacement:** If the feathers get worn out, you should get new ones to keep the toy looking nice and fun to play with.
- When it comes to battery compartment safety, make sure the area stays dry and free of dust. Look inside the area for rust or damage that has happened over time.
- **Use for Supervised Play:** The toy is made to be played with alone, but you should always watch your cat to make sure they're playing safely and properly with it.

TROUBLESHOOTING

Problem	Solution
The toy does not turn on	Ensure the battery is correctly installed and has been charged.
Chickadee does not respond to touch	Check if the batteries are properly installed and charged.
Sound is not working	Verify the volume is up and the battery is fresh.
Toy stops moving unexpectedly	Replace the AA batteries if they are running low.
The toy is not activating at all	Ensure the switch is in the “on” position.
Plush fabric becomes dirty	Spot-clean the plush fabric with a damp cloth.
Chickadee moves erratically	Reset the toy by turning it off and on again.
The battery compartment won’t open	Use a small screwdriver to gently open the compartment.
Chickadee’s movements are slow	Replace the batteries with new ones for optimal performance.
The toy overheats	Allow the toy to cool down before using it again.
Flopping action is not smooth	Check if there are any obstructions in the mechanism.
The toy makes an unusual noise	Inspect the toy for any loose parts or damage.
Chickadee is not activating on the first try	Press the activation button and ensure the toy is fully charged.
The toy falls over easily	Try placing the toy on a flat surface for more stability.
It runs out of battery too quickly	Turn off the toy when not in use to conserve battery life.

PROS & CONS

Pros:

- **Interactive fun** with touch-sensitive features that make the chickadee come to life.
- **Compact and lightweight**, perfect for children and pets to play with.
- **Affordable price** at **\$9.99**, offering great value for interactive play.
- Made from **soft plush material** that’s safe and comfortable.
- **Easy to operate** with simple AA battery power.

Cons:

- Requires **AA batteries** that may need frequent replacement.

- May not be suitable for **larger pets** due to its small size.
- Limited interaction features; it mainly responds to touch.
- **Fabric may wear** down with rough play.
- **Battery compartments** may be tricky to open for some users.

## WARRANTY

The **LEWISER Battery Operated Interactive Chickadee** comes with a **1-year limited warranty**. This warranty covers defects in material or workmanship but does not apply to damages caused by misuse, rough handling, or accidents. To claim the warranty, please retain proof of purchase and contact **LEWISER** customer service for assistance.

## FREQUENTLY ASKED QUESTIONS

What is the price of the LEWISER Battery Operated Interactive Chickadee?

The price of the LEWISER Battery Operated Interactive Chickadee is \$9.99.

What are the dimensions of the LEWISER Battery Operated Interactive Chickadee?

The toy measures 4.33 x 2.36 x 3.15 inches.

How much does the LEWISER Battery Operated Interactive Chickadee weigh?

The weight of the LEWISER Battery Operated Interactive Chickadee is 2.12 ounces.

When was the LEWISER Battery Operated Interactive Chickadee first available?

The toy was first available on August 11, 2023.

Who is the manufacturer of the LEWISER Battery Operated Interactive Chickadee?

The manufacturer of the toy is LEWISER.

Where is the LEWISER Battery Operated Interactive Chickadee made?

The toy is made in China.

What type of battery does the LEWISER Battery Operated Interactive Chickadee use?

The LEWISER Battery Operated Interactive Chickadee uses AA batteries.

How does the LEWISER Battery Operated Interactive Chickadee work?

The toy features battery-operated movements that engage pets, making it perfect for encouraging play and interaction.

What makes the LEWISER Battery Operated Interactive Chickadee unique?

The LEWISER Battery Operated Interactive Chickadee stands out with its plush design and battery-powered interactive features that mimic the motions of a chickadee.

How long does the battery last in the LEWISER Battery Operated Interactive Chickadee?

Battery life varies depending on use, but the toy is designed to provide hours of interactive fun on a single set of AA batteries.

Why won't my LEWISER Battery Operated Interactive Chickadee turn on?

Ensure the LEWISER Battery Operated Interactive Chickadee has fresh batteries installed. Double-check that the battery compartment is properly closed, and that the power switch is turned to the on position.

Why is my LEWISER Battery Operated Interactive Chickadee not making sounds or moving?

If the LEWISER Battery Operated Interactive Chickadee is not responding, check the battery orientation to ensure they are inserted correctly. If the batteries are low or depleted, replace them with fresh ones.

Why does the LEWISER Battery Operated Interactive Chickadee make weak or distorted sounds?

Weak or distorted sounds may indicate a battery that is nearly dead. Replace the batteries in the LEWISER Battery Operated Interactive Chickadee with new ones to restore sound quality. If the issue persists, the speaker might be obstructed or damaged.

Why does the LEWISER Battery Operated Interactive Chickadee stop moving after a short time?

If the LEWISER Battery Operated Interactive Chickadee stops moving, it may be due to low battery power. Try replacing the batteries. Additionally, check if any objects are blocking the movement or if the toy needs to cool down after continuous use.

Why is the LEWISER Battery Operated Interactive Chickadee moving erratically?

Erratic movement could be caused by low battery power or dirt/debris interfering with the motor. Replace the batteries and clean the toy to ensure smooth motion. If the issue continues, check the internal mechanisms for any loose parts.
