LILIN P2P Pro Adding NVR Standalone Network Video Recorder

Product Information

Specifications:

- **Product:** LILIN NVR
- **Remote Access:** P2P support using LILINPro app

Product Usage Instructions

Enabling P2P on NVR

1. Access the NVR menu.
2. Navigate to `Network` and select `Advance`.
3. Under `Advance`, choose `P2P`.
4. Turn the dropdown option labeled `Enable` to `On` and click `Apply`.

Adding NVR to LILINPro using P2P

1. Download LILINPro from the app store.
2. Run the LILINPro app and select `Add/Change Devices`.
3. Select `Scan QR code` and scan the QR code displayed on the NVR.
4. Enter your Username, Password, and Device Name as per your site's specifications.
5. Press `Step 1` to verify the entered details.
6. Press `Step 2` to connect to NVR and display cameras.

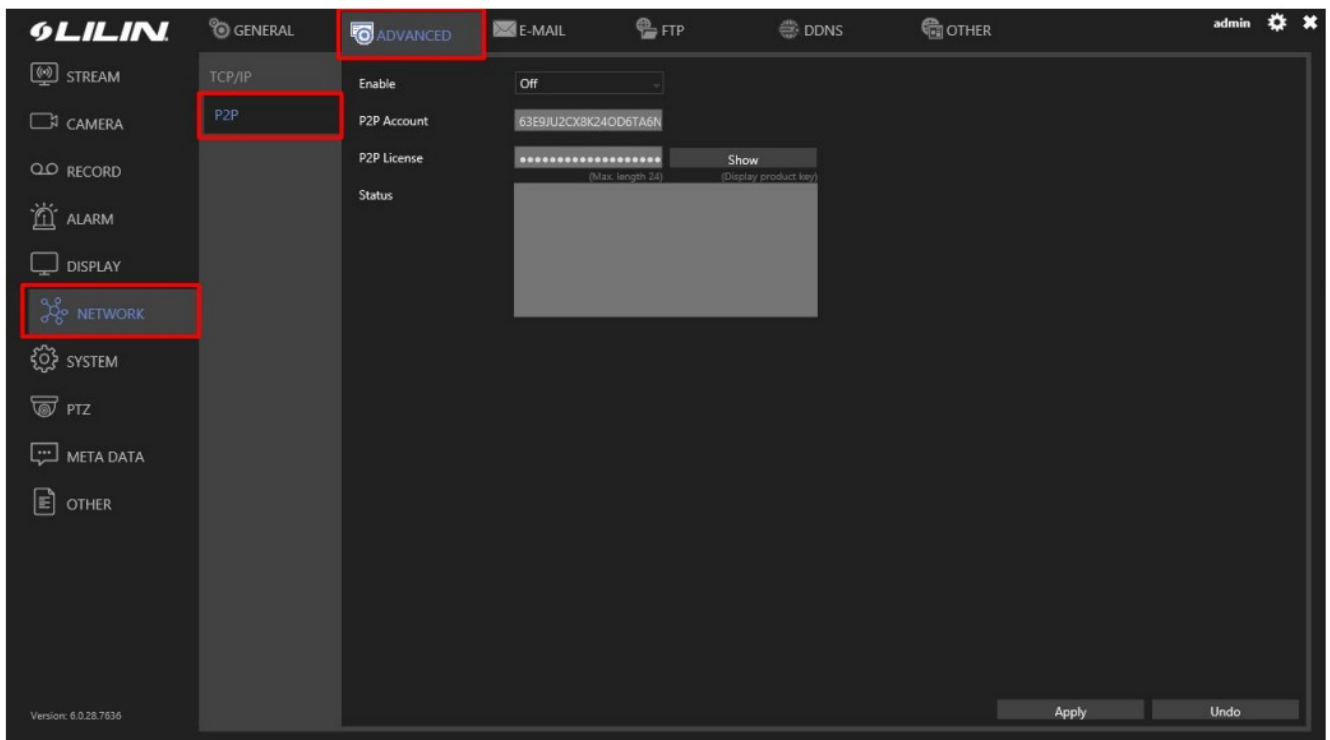

FAQ

Q: What should I do if the app does not connect to the cameras after Step 2?

A: Close the app and reopen it. The app should then display the cameras correctly.

Usage Instructions

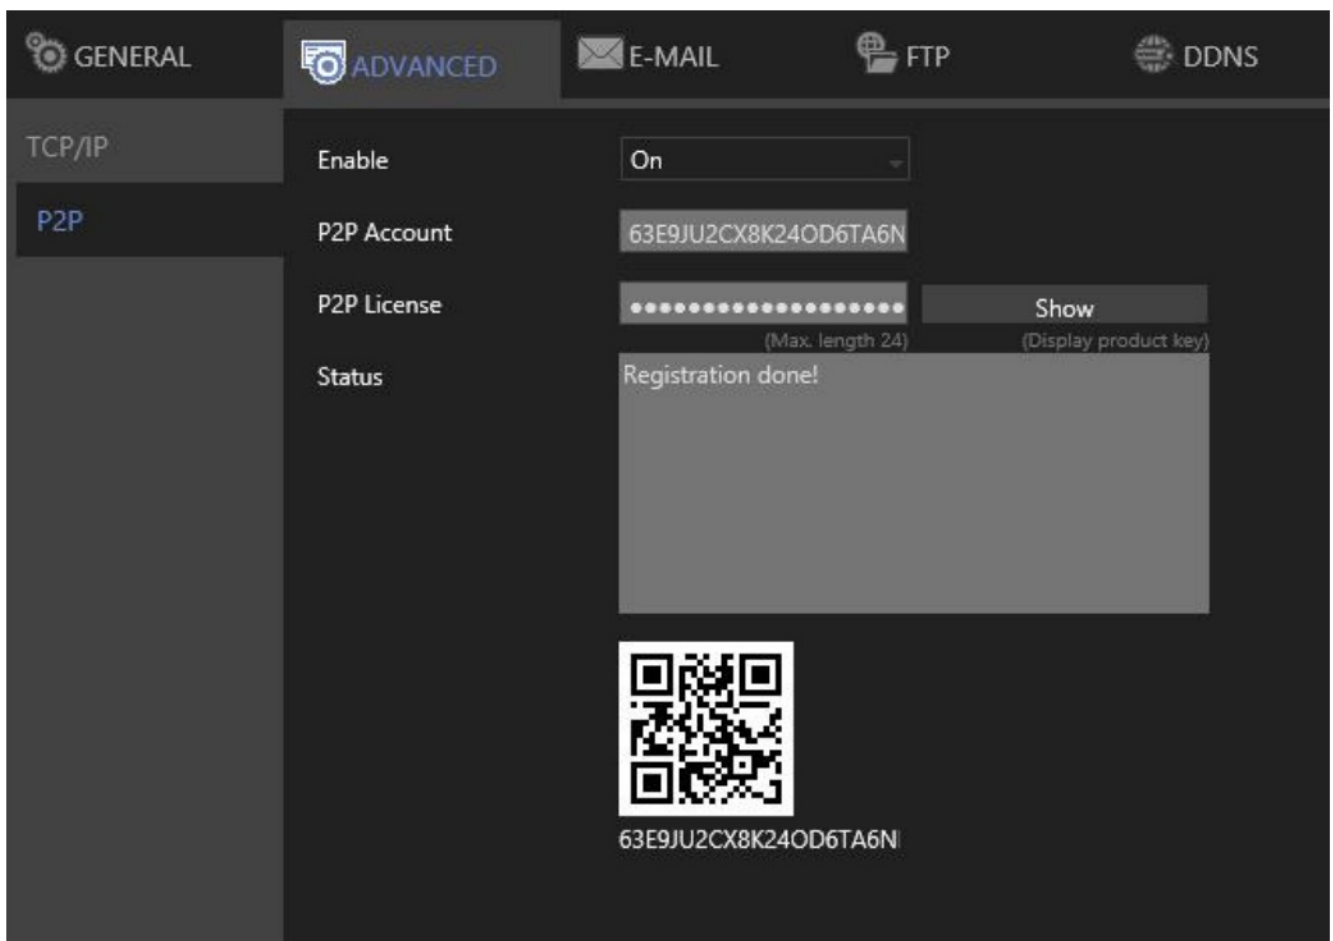

- LILIN NVR range supports P2P as the standard for remote access using the LILINPro app.
- Although the NVR has the P2P license already added to the NVR the feature may need to be enabled before use.
- Enter the NVR menu, then navigate to `Network` from the menu bar on the left, and then select `Advance` from the tabs at the top of the Network screen. Under the Advance menu, select `P2P` from the bar to the left.

- You will see a dropdown option labeled 'Enable', turn this option to 'On' and click 'Apply'.

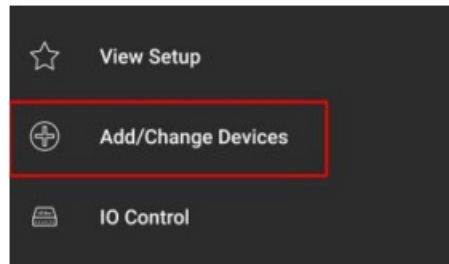

- The NVR will now generate a unique QR code which is displayed below the license status box with the correct information based on the license key entered.

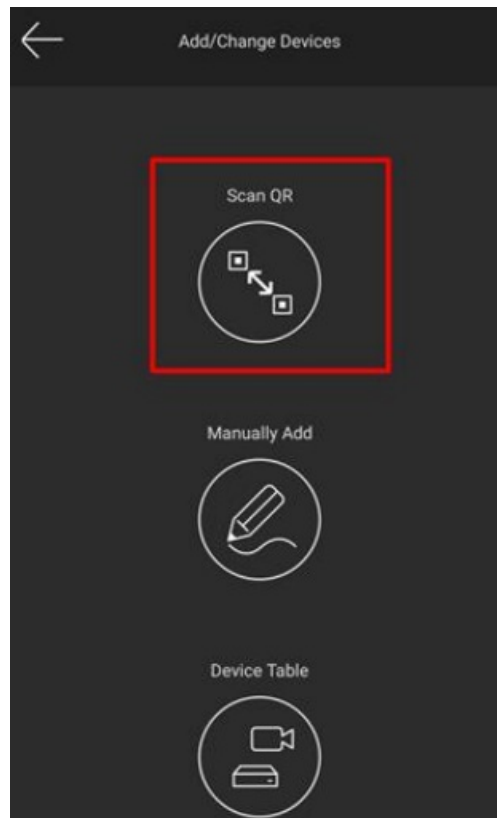

- Now the QR code is configured on the NVR the next step will be to add the NVR to the LILIN Viewer app.

Adding an NVR to LILINPro using P2P

- Download LILINPro from the relevant app store applicable to your mobile device.
- Once downloaded, run the LILINPro app on your mobile device.
- When the app opens, select 'Add/Change Devices' from the menu bar.

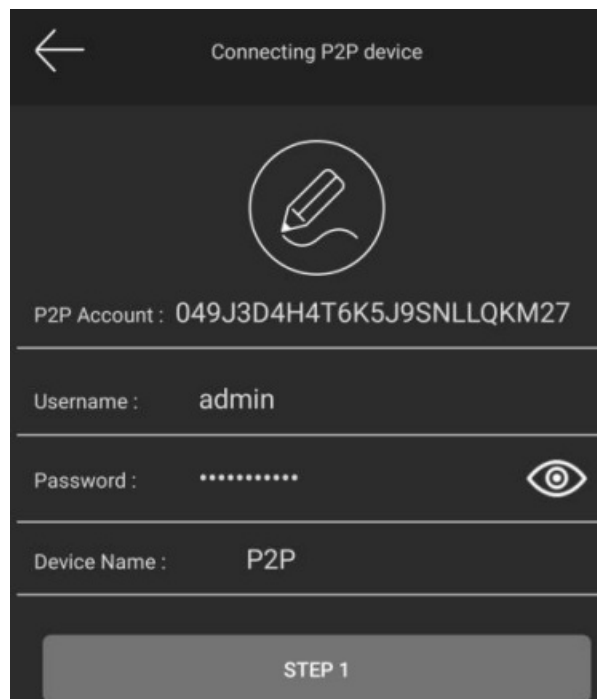

- Now select the 'Scan QR code' option as shown below.

- You will now need to scan the QR code being displayed on the NVR. Once scanned this will take you to a configuration screen where you will need to amend a few details specific to your site.

Please amend the following:

- Username
- Password
- Device Name

Connecting P2P device

P2P Account : 049J3D4H4T6K5J9SNLLQKM27

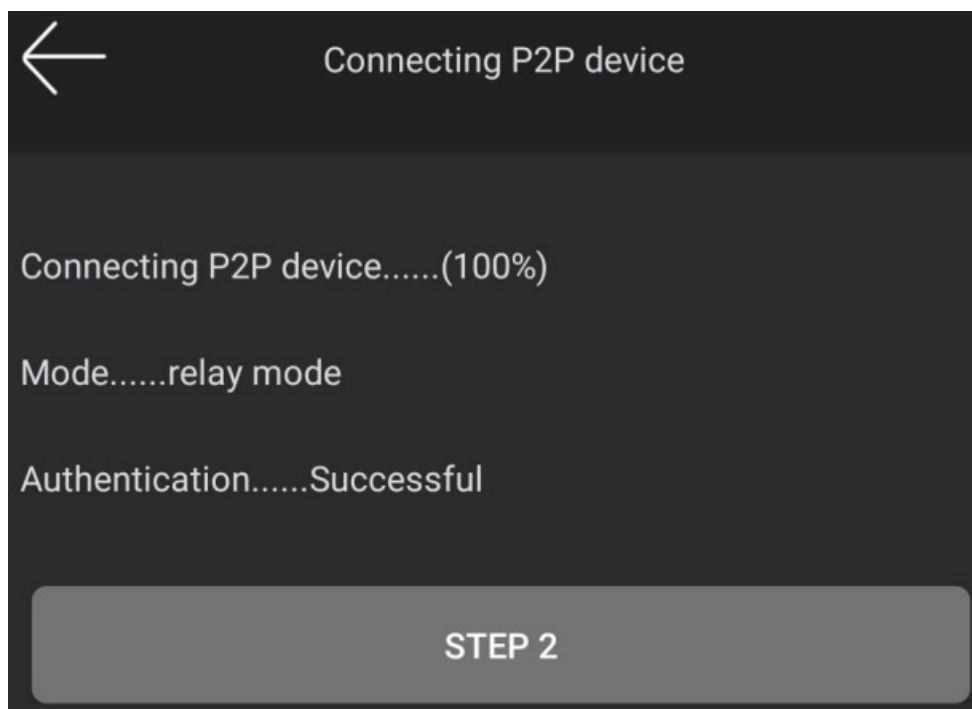

Username : admin

Password : 

Device Name : P2P

STEP 1

- The username and password you will need to enter are the authentication details for the NVR.
- Once the required details have been entered press 'Step 1' from the bar at the bottom of the app.
- The App will now check the information in Step 1 is correct.

Connecting P2P device

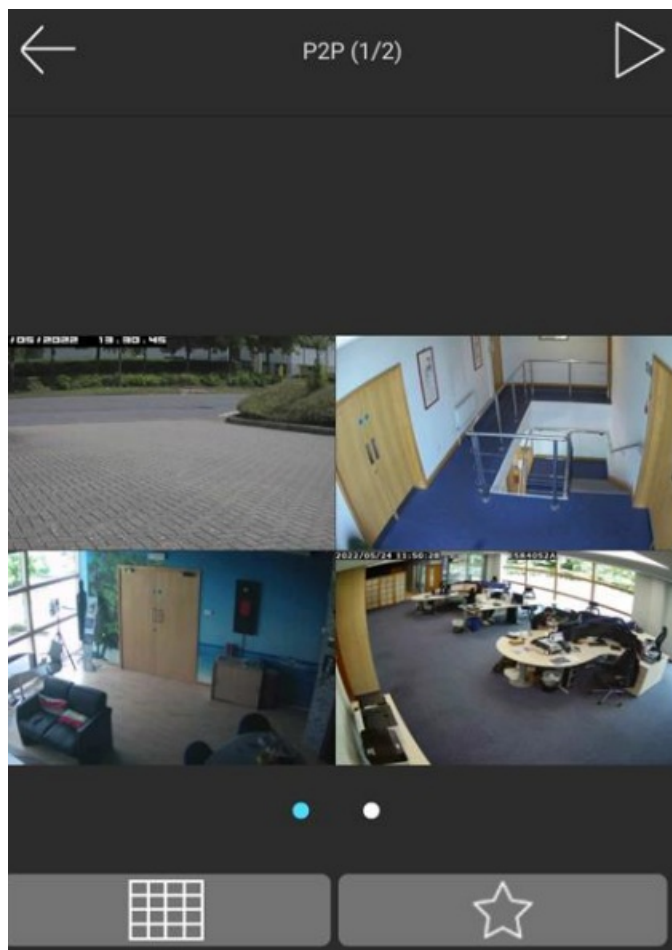

Connecting P2P device.....(100%)

Mode.....relay mode

Authentication.....Successful

STEP 2

- Now press Step 2 and the app should start to connect to your NVR and display cameras.

- If you find the app does not connect to the cameras after step 2 has been completed, it is recommended to close the app down and re-open it once again and the app should then display the cameras correctly.
