## LIMINK S19 Portable Triple Monitor

## Overview

## HDMI Port Connection

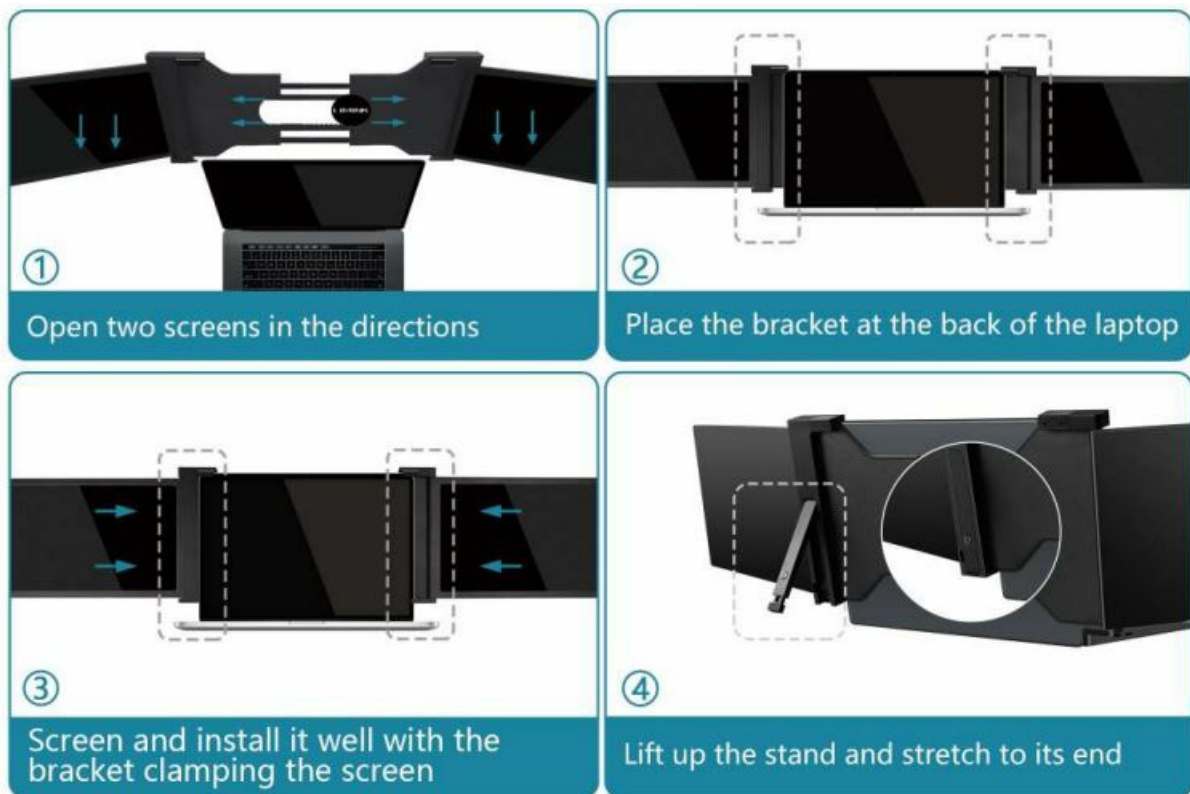

## Open two screens in the directions

Please handle the triple monitor with care and do not press the screens to avoid damage. Do not unfold it to exceed its maximum turning angle showing as below.

## Set It Up

## Connection Methods

### Two Full-Functioned USB-C/Thunderbolt-3 Ports Connection

If the laptop has 2 full-functioned USB-C or 2 Thunderbolt-3/4 ports, use two included USB-C cables to connect the laptop to the triple monitors. Be sure to connect the USB-C port of the monitor marked with this logo

### One Full Functioned USB-C and HDMI Port Connection

If there's one full functioning USB-C port and one HDMI port on the laptop:

1. Use the included full-functioned USB-C cable to connect one side of the monitor and the laptop.
2. Meanwhile, use the HDMI cable and an additional power adapter (USB-C to USB cable) to connect the other side of the monitor and the laptop. Or you can use a USB-C to USB-C cable to connect the monitor to your laptop via the USB-C port.

### Other Connection USB (Extra Adapter Needed)

If you do not have enough HDMI ports for the connection

1. Find a suitable HDMI adapter for your laptop. You can contact LIMINK to help you find a suitable adapter to buy. ([support@lilimink.com](mailto:support@lilimink.com))
2. You need to use 4 cables with an additional adapter for connection: First, connect one side of your LIMINK monitor to your laptop with an HDMI cable and a USB-C to USB-A cable. Second, connect the HDMI adapter to your laptop. Finally, connect the other side of your LIMINK monitor with another HDMI and a USB-C to USB-A cable.
