SYSTEM CONFIGURATION

The multifunctional system can be used in four unique modes. Under the function of AUTO EQ (self-service EQ), the system will automatically adjust the sound quality for various playing directions to maintain the best tone balance.
You can quickly find the most suitable mode for the desired purpose through the following example.

PLANE FRAME HEIGHT

Place the machine on a flat surface. This placement method can project sound clearly and evenly, ensuring that you can fully enjoy the full-band effect of the system.

TILT BACK

In a performance where the audience is closer to you. Please tilt back with the rear side of the machine as the fulcrum. In order to achieve the best performance of sound quality, it is recommended that performers stand or sit at the side of the speakers to avoid blocking the speakers so that the audience can directly hear the sound emitted by the speakers.
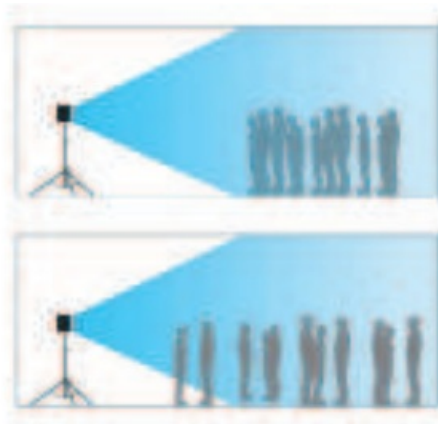

MONITOR

If you want to use the machine as a personal floor monitor speaker, place it horizontally on the floor in front of the performer and face the performer. The speaker should be tilted upward with its side on the ground.

SPEAKER BRACKET

Place one or two machines on the speaker bracket (sold separately) to meet various broadcast effects.

SAFETY MEASURES

To ensure proper use of this product, please take the time to read this instruction manual carefully before use. Please
observe all the instructions about safe operation and please keep this instruction manual in a safe place for future reference.

1. Protection of power supply wire: Do not place the cable in the path of foot traffic. Do not place heavy furniture on the cable. Never pull the cable to unplug the unit from the socket, always disconnect the unit from the main power supply by pulling the plug out of the socket.
2. Ventilation: In order to prevent this unit from overheating, place it in a well-ventilated area on stable surface. Never place it on a bed, sofa or carpet where the ventilation will be restricted.
3. Dismantling: In order to avoid the risk of electric shock, do not dismantle the unit. Should your unit be faulty or broken please refer servicing to an authorized service center.
4. Strange odour: Should your unit emit any strange odour, immediately unplug it from the wall socket. Do not use the unit again until you have had it repaired by a qualified service center.
5. Do not expose this unit to liquid of any kind.
