Linortek Netbell® is a network-enabled, affordable, reliable, and easy-to-deploy timed alert system. With the easy-to-use built-in web interface, you can access, control, and schedule bells, equipment, or any other timed events over the network from a web browser. No additional software or designated computer is required, eliminating the need for complex wiring and control systems. This cost-effective solution is ideal for schools, factories, warehouses, and other facilities to signal start and stop work, lunch breaks, shift changes, as well as using it as employee alarm system to satisfy the requirements of OSHA 29 CFR 1910.165 regulation.

The Netbell-KL-E2M is a self-contained extra loud break bell system.

This easy-to-use bell system was designed for busy school administrators and factory/warehouse managers to save valuable time in setting up a break time alarm system. The Netbell-KL-E2M comes with a built -in 6-inch high output bell (102dB), and a web-based bell controller installed within a NEMA-rated box of the main unit, two external bells mounted on weatherproof backbones. With this 3-bell system, you can cover up to 60,000 sqft area. All software and mounting hardware required for installation and operation are included. It's ready to connect; you will only need to prepare 2-conductor speaker wires to connect the external bells to the Netbell-KL-M2 at up to 500 feet away using 18 AWG cable. With the digital input, you can wire a push switch to ring the bells manually in an emergency.
