## Description

### Full HD 6-layer glass lens

With a 6-layer glass lens and H.264 encoded compression, the 1080P Full HD webcam produces incredibly crisp images and high-resolution video at a smooth 30 frames per second. Gain from automatic light correction technology, the computer webcam automatically changes color and brightness for natural lighting, providing you the best look even in low light conditions and superb video recording or talking time.

### Facial-enhancement Technology

The facial-enhancement technology used by the 1080P HD web camera optimizes the image automatically, ensuring that you always appear your best when chatting, recording, making video calls, playing games, and

teaching online. A streaming webcam offers the best possible video recording quality.

## Simple to Use

Simply insert this webcam into your computer and it will be ready to use in under a minute without the need for any drivers or software. In addition to being able to be fixed on top of a PC display and meeting your multi-angle demands on PCs, laptops, desktops, Macs, LCD monitors, and even other flat surfaces, the computer webcam features a privacy cover that enables you to have a safe digital web life while not in use and prevents hackers from spying on you.

## Uses at Different Places

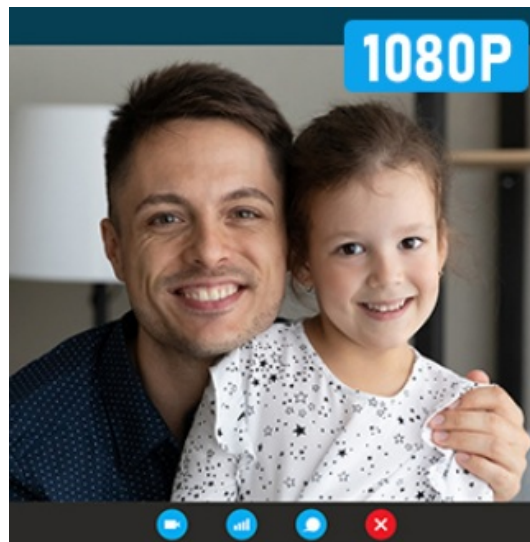

For webinars, video calling, conferencing, live streaming, online learning, etc., the built-in noise reduction microphone minimizes background noise to improve the sound quality of your video. Presentations benefit greatly from the high-definition video captured by the fixed focal length lens at an ultra-wide angle of up to 110 degrees.

## Compatibility

The web camera is compatible with a wide range of operating systems, including Windows 7/8/10, Mac OS, Smart TV, and Android 5.0 or later. Widely compatible with PC, Macs, MacBooks, laptops, desktop computers, and USB cameras. Compatible with the majority of popular video chat and recording programs, including Skype, Zoom, Netflix, OBS, Xbox, FaceTime, Facebook, MSN, Yahoo, and more fantastic initiatives.

## Features

### 1080P Web Camera

High-definition web camera with 1080p resolution, 2 million pixels, and accurate color photos. Supports 1080p video calls. This webcam offers crisp video in low light thanks to high dynamic range (HDR) technology and automated low light adjustment.

### Built-In Noise Canceling Microphone

When in use, improved noise-canceling microphones and audio processing chips will sense noise and automatically decrease annoying background noise for natural and clear sound. Excellent for screen sharing, online chat, gaming, video and audio conferencing, and web conferencing.

### **USB 2.0 Plug And Play Webcam**

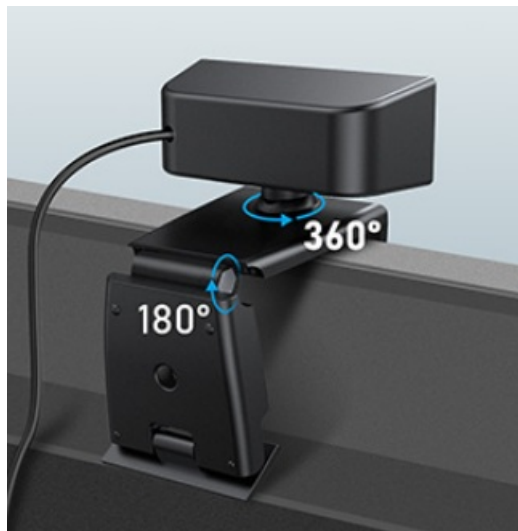

This webcam may be quickly plugged in and used without the need for additional drivers or software. The camera clip may be rotated 180 degrees, and the flexible adjustable clip supports 360 degrees of horizontal adjustment. It can be securely set up on a desktop, attached to a display, or on a tripod, and you may change the angle.

### **110 Degrees Wide-Angle View**

With a broad 110-degree field of vision, it can easily catch groups of people and whiteboards, display more of you to friends in 16:9 widescreen, stream videos easily, and share your recorded films or photos. Perfect for live streaming, web conferences, video broadcast recording, and online classes.

### **360 Degree Rotation & 180 Degree Clip Folding**

The camera clip may be rotated 180 degrees, and the flexible adjustable clip supports 360 degrees of horizontal adjustment. may be securely mounted on the desktop and clamped to the screen (without damaging the screen), and the angle may be changed to your preference. Access any laptop, LCD screen, desktop, or tripod safely.

### **Various Applicable Scenarios**

You may start your fantastic video time with this webcam by using it for live streaming, gaming, online classes, group video calls, conferences, etc. This camera makes it simple to complete any work that calls for a webcam. Start the video call with your best buddy.

## How To Install

1. Track down the USB cable that came with the webcam. Connect the USB cable by inserting one end into the computer's USB port and the other end into the webcam's USB port.
2. Locate a good spot for the webcam. It should ideally be set up on top of your computer monitor or on a sturdy surface close to your machine. To ensure a clear view, change the webcam's angle.
3. The LITEPRO C60 Webcam will typically be plug-and-play, meaning your computer will set up the required drivers on its own. However, you might need to install them from the included CD or download them from the manufacturer's website if your computer doesn't recognize the webcam or if it needs more drivers.
4. An integrated microphone is included with the LITEPRO C60 webcam. However, you can disable the webcam's microphone in your computer's audio settings and connect your favorite microphone separately if you'd rather utilize an external microphone.
