## Keyboard product range

**ASTRA2 Series – Backlit keyboards Mac & PC**

The ASTRA2 series features a modern, ergonomic design with built in backlighting optimized for use in dim environments such as a  studio. Choose your preferred lumination from five different levels to  create perfect working conditions.

The ASTRA2 keyboard features a USB 3.0 port to enable you to connect e.g. mouse, phone, contour shuttle or a USB-dongle. The ASTRA2 keyboard is developed with two USB cables; a grey one for the keyboard itself, and a black one for the USB hub to avoid problems with installations, that require a KVM extender.

## ASTRA2 series

- Dimmable backlit keys
- Built-in USB 3.0 port
- Scissor-switch keys
- USB Wired (5.9 ft. cable)
- Dimensions: 17.6"-6"-1.2"
- Weight: 2.1 lbs.
- OS: Mac and PC

TITAN Series – Backlit & Wiresless/Wired keyboards Mac Our TITAN keyboard offers dual connectivity, switch between Bluetooth wireless or USB-C wired connection. Optimized for use with MacOS but can easily be connected to an iPad or iPhone as well, or to two Macs – one corded and another wirelessly. The Titan keyboard uses a long-lasting rechargeable lithium battery for the wireless connectivity with state-of-the-art battery life. For the best adaptation to working in low-light environments the keys on TITAN are backlit, and the illumination is dimmable in 5 levels.

## MAC TITAN series

- Dimmable backlit keys
- BT Wireless or USB-C Wired
- Long lasting battery power
- Aluminum casing

- Scissor-switch keys
- Dimensions: 16.9"-4.7"-0.54"
- Weight: 1.3 lbs.
- Available in Titanium Gray
- OS: Mac

**Bluetooth – Mini Keyboard**

Our mini keyboard is the answer to anyone who wants to type with ease on a Bluetooth device. With the keyboard's Bluetooth connection, you will eliminate wires on the desk. The operating distance is up to 30 feet (10 meters) away from the host and enables working where the device or computer is not positioned in proximity. Depending on usage. With its small footprint and light form factor with only 78 keys, it is highly portable and ideal for carry along.

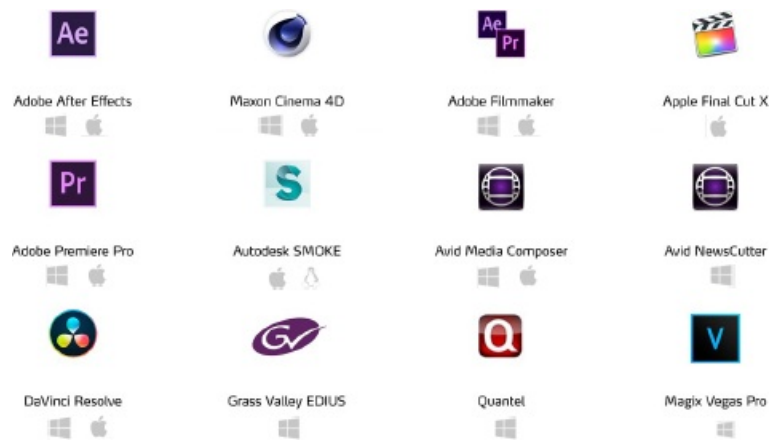

**Bluetooth Keyboard**

- Bluetooth version 3.0
- 2 x AAA batteries
- Operating distance up to 32,8 feet
- Dimensions: 11.2"-4.7" –0.9"
- Weight: 315 g – 11.1 oz
- Available in black
- MACos, iOS and Windows

## Creative software selection

### VIDEO

Video editing is our first and largest category in shortcut keyboards. Our decades-long collaboration with Avid ensures a strong position in a range of industries. Our video keyboards are now the industry standard in everything from broadcast production and live editing to film compositing, color grading, and much more.

Video editing shortcut keyboards

Adobe After Effects | Maxon Cinema 4D | Adobe Filmmaker | Apple Final Cut X

Adobe Premiere Pro | Autodesk SMOKE | Avid Media Composer | Avid NewsCutter

DaVinci Resolve | Grass Valley EDIUS | Quantel | Magix Vegas Pro

## ANIMATION

Animation and 3D is a booming category, and we are thrilled to provide solutions for popular tools in a range of niches including video games, VFX, 3D modelling, animation and more. There is room to grow and include more software as the world of 3D and animation grows into ever more industries and usages.

Unreal Engine | Blender | Autodesk Maya | Adobe After Effects

Maxon Cinema 4D | Adobe Photoshop

## Creative software selection

## GRAPHIC
Our graphic design category is another growing niche. More and more designers see the value in shortcut keyboards, with our Graphic Designer keyboard and its 225 shortcuts being a prime example. Illustrators, photographers and graphic designers around the world enjoy our solutions that free up time to be creative.
Graphic design shortcut keyboards

Adobe Graphic Designer | Adobe Photographer | Adobe Lightroom | Maxon Cinema 4D
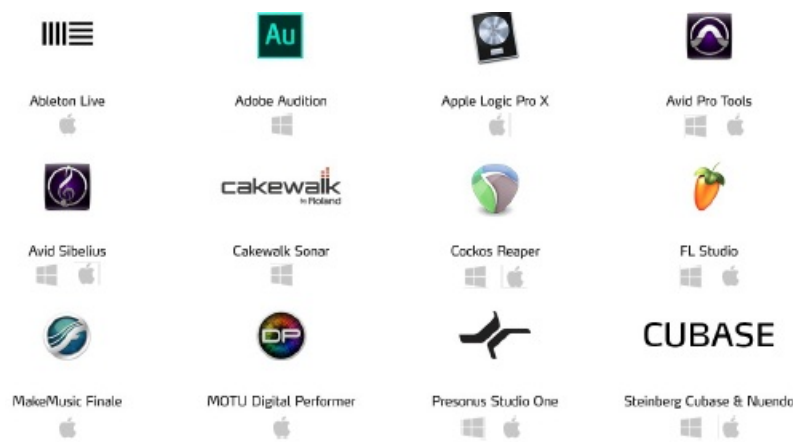

Adobe Illustrator | Adobe Photoshop

## AUDIO
Audio is another of our largest and most prominent categories. For years, our solutions have been standard for many Pro Tools, Logic Pro, FL Studio, Ableton Live and Studio One users.
The shortcut keyboards are popular in anything from sound design for video games to scoring movies or composing and producing music.

## Assistive solutions

Our Largeprint and Braille keyboard solutions help users with impaired vision navigate keyboards and computers with greater
freedom and ease. Designed with increased lettering sizes combined with a range of different high-contrast colors to fit individual
needs for visually impaired, blind and elderly users. Our Largeprint keyboards are available in 13+ local languages to support users
everywhere.
We have carefully designed our largeprint keyboards in collaboration with leading experts in sight and visual impairment in order to
create the best possible color contrasts and keyboard layout. Similarly, our unique and incredibly durable braille solution is carefully
designed with local braille users in each market.
We are able to fully customize and tailor keyboard layouts and color-combinations to suit any needs.

## Assistive solutions

Our Dyslexia keyboard, support dyslexic users with a unique typeface to make reading, learning, and working easier. The keyboard
font is developed in cooperation with www.dyslexiefont.com. The keyboard includes color-coded vowels, consonants, numbers and
function keys and helps the user learn the location of letters, numbers and other keys on a keyboard.
In addition to our wired keyboard solutions, we have designed a lightweight and compact battery-driven Bluetooth keyboard as a
perfect companion on the go for mobile Apple and Windows devices.
The Kids Learning Keyboard is an excellent way for your elementary-aged student to master keyboarding and computer skills in
schools and at home. With color-coded vowels, consonants, numbers and function keys the Learning Learning Keyboard helps the
user learn the location of letters, numbers and other keys on a standard hi-quality keyboard.

## Custom/office solutions

### Healthcare

We partnered with the Danish capital region "Region Hovedstaden" to provide a keyboard solution for doctors, nurses and secretaries. They use the software from the healthcare specialist Epic and the keyboard can therefore be adjusted to hospitals around the world.

This uniquely designed shortcut keyboard can be tailored to every healthcare group, such as doctors, and even provides shortcuts for use outside a healthcare software.

### Telecom

Our telecom and switchboard keyboards provide easy access to phone call's, e-mail, Facebook, Twitter or other enquiries. These solutions are made with our sleek Silver Line keyboard to provide two USB-ports as well as ergonomic and silent typing.

Our color-coded shortcut system provides easy navigation for a range of tools such as Comptella Multimedia Attendant, Mitel In Attend & MICC and Trio Enterprise.

### Office

Our office keyboards utilize the ease of use from color-coded shortcuts and apply them to everyday applications on Mac and PC. These keyboards enable you to improve your workflow, navigate tools quicker and increase your efficiency by up to 40%.

We have designed the keyboards to help prevent Repetitive Strain Injuries (RSI). With an 8o typing angle, low profile chassis and scissors-switch tactile keys, the keyboards are both ergonomic, silent and comfortable to use.

## Customized keyboards

Our unique supply chain and in-house production enable us to create customizable OEM keyboards for any software and industry. We are engaged in every step of the process from developing the initial idea and assisting with layouts and design to implementing or commercializing the final product.

Our full product range is available to meet any need imaginable. We have utilized our decades of experience to create solutions for photography, healthcare, legal, telecom, broadcasting, travel, ergonomics and more.

Keyboards are available for both PC and Mac, and the minimum order quantity is as little as 20 units.

**Logic keyboard accessories**

### Keyboard Bag

The keyboard bag is your protection on the road. It's made from a layer of protective material covered by a stylish black canvas finish.
It features short handles as well as an adjustable shoulder strap to suit all types of usage.
The bag also contains a large handy accessories pocket for additional equipment.

### Hygiene

Our clear silicone skins are washable and protect against dirt and spills. They also protect against wear and tear.

Keep your keyboard clean and free of bacteria using our cleaning wipes with 60% ethanol.

## Keyboard Light

**The Logic Light** is a great addition to shortcut and Large print keyboards. This lamp plugs directly into our keyboards' USB ports to provide additional light to the keyboard, while saving desktop space.

The Logic Light is made up of ten cool white LEDs. It features touch sensitive control on the end of the lamp to switch between off, half-light and full light. The lights can be rotated a full 360 degrees, and the flexible light arm can be adjusted to any desired angle.
