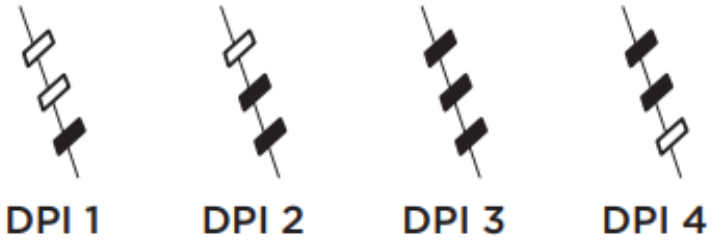
Onboard profile

Hyperion Fury allows you to tweak your settings until they are perfect and store them in its onboard memory. You can adjust button functions, DPI values, USB report rate, and logo lighting style using the optional Logitech Gaming Software, available for download from **www.logitech.com/support/g402hyperionfury**.

DPI indicators

DPI values are shown using the three LEDs indicated in the mouse drawing. The image below shows which DPI value is being indicated by the LED panel.



Tips
Try the default profile settings in practice games before changing these settings. Advanced gamers can customize each game according to their specific button configuration and sensitivity switching needs. In automatic game detection mode, the Logitech Gaming Software stores this information and applies it automatically when the game is detected.
